NOTICE OF PREPARATION AND SCOPING MEETING CITY OF ONTARIO

COUNTY OF SAN BERNARDINO
NOV 13 2023
CLERK OF THE BOARD

Date:	November 14, 2023
Subject:	Notice of Preparation (NOP) and Scoping Meeting for Ontario Regional Sports Complex Environmental Impact Report (EIR)
To:	State Clearinghouse, State Responsible Agencies, State Trustee Agencies, Other Public Agencies, Interested Organizations
Lead Agency/Sponsor:	City of Ontario, Planning Department
Project Title:	Ontario Regional Sports Complex Environmental Impact Report

NOTICE IS HEREBY GIVEN that the City of Ontario (Latitude 34°03'N / Longitude 117°39'W) will prepare an Environmental Impact Report (EIR) for Ontario Regional Sports Complex. The City is the lead agency for the project. The purpose of this notice is (1) to serve as a Notice of Preparation of an EIR pursuant to the California Environmental Quality Act (CEQA) Guidelines § 15082, (2) to advise and solicit comments and suggestions regarding the scope and content of the EIR to be prepared for the proposed project, and (3) to notice the public scoping meeting.

Notice of Preparation: The City of Ontario, as lead agency, requests that responsible and trustee agencies respond in a manner consistent with § 15082(b) of the CEQA Guidelines and § 21080.4 of the Public Resources Code. Responsible agencies must submit any comments in response to this notice during the 30-day public review period. The public review period will commence on **November 14, 2023,** and will close on **December 15, 2023**. A copy of the NOP can be viewed electronically on the City's web page at:

https://www.ontarioca.gov/Planning/Reports/EnvironmentalImpact

Written Comments: Comments in response to this notice can be emailed to Thomas Grahn at tgrahn@ontarioca.gov or can be physically mailed to the address below by the close of the 30-day NOP review period at 5:00 pm on December 15, 2023.

City Hall, Planning Department
303 East "B" Street
Ontario, CA 91764

Please include the name, email, and/or telephone number of a contact person at your agency or organization who can answer questions about the comment.

CLERK OF THE BOARD
Received on: 11/13/23
Remove on: 12/14/23

Scoping Meeting: The City will hold a scoping meeting in conjunction with this NOP in order to present the project and the EIR process and to provide an opportunity for agency representatives and the public to assist the lead agency in determining the scope and content of the environmental analysis for the EIR. The City will host an online public meeting to receive public comments on the scope of the EIR rather than an in-person event. The online public meeting will be hosted on the evening of **Wednesday, December 6, 2023, at 6:00 pm** and conducted via a live Zoom meeting. In order to participate in the scoping meeting, please email your full name and physical address to Thomas Grahn, at tgrahn@ontarioca.gov, by 5:00 pm on Wednesday, December 6, 2023, to obtain the Zoom meeting invite. The scoping meeting will begin with a presentation at 6:00 pm, followed by questions from the public.

Project Location

The approximately 199-acre project site is in the southern portion of the City of Ontario, known as the Ontario Ranch, as shown on Figure 1, *Regional Location*. The project site is bounded to the north by Riverside Drive, to the south by Chino Avenue, to the west by the unimproved right-of-way for Vineyard Avenue, and to the east by the Cucamonga Creek Flood Control Channel (see Figure 2, *Local Vicinity*, and Figure 3, *Aerial Photograph*). Regional access to the site is provided by State Route 60 (SR-60) north of the site and Interstate 15 (I-15) east of the site. Local access is provided by Riverside Drive, Chino Avenue, and Ontario Avenue.

APNs

Assessor's Parcel Numbers (APN) within the project site include: 218-101-01, 218-101-02, 218-101-03, 218-101-04, 218-101-05, 218-101-06, 218-101-07, 218-101-08, 218-102-10, 218-102-11, 218-111-04, 218-111-05, 218-111-06, 218-111-08, 218-111-09, 218-111-11, 218-111-12, 218-111-45, 218-111-49, 218-111-50 (see Figure 4a, *Assessor's Parcels in the Project Site)*. APNs with land use and zoning changes required to comply with Senate Bill (SB) 330 and SB 166 include: 216-214-05, 216-214-06*, 216-214-07*, 216-314-07, 216-314-08*, 218-121-01, 218-121-02*, 218-121-03*, 218-121-04, 218-181-02*, 218-181-15 (see Figure 4b *Assessor's Parcels for SB 330/SB 166 Compliance*). APNs listed with an asterisk (*) will only change the land use on a portion of the APN as shown in Figure 4b; the remaining portion of the parcel is not proposed to change.

Project Description

The Proposed Project, known as the Ontario Regional Sports Complex, would consist of developing the site with a 6,000-capacity, semi-pro, minor league baseball stadium and new City Parks and Recreation facilities, including a new recreational center; aquatics center; and baseball, softball, and soccer fields. The land use plan under the Proposed Project comprises four subareas: the baseball stadium and stadium retail hospitality, the City Parks and Recreation facilities, commercial retail, and the Community Recreation Center, as shown on Figure 5, *Conceptual Land Use Plan*. The proposed changes to the General Plan land use designations and zoning are described below under "Related Implementation Actions."

The Proposed Project would also require street widening and intersection improvements, with half-width to potentially full-width improvements along Vineyard Avenue, Riverside Drive, and Chino Avenue.

Table 1, *Proposed Project Amenities Summary*, shows the land use designations proposed for each subarea of the Proposed Project and the acreage, building square feet, and number of amenities for each component of the Proposed Project. As shown in Table 1, the Proposed Project would result in 540,750 square feet of commercial building space, 450,000 square feet of stadium space, and 272,000 square feet of parking structures.

Table 1 Proposed Project Amenities Summary

Land Use	Acres	Building Square Feet			Number of Amenities
		Commercial	Parking	Stadium

Activity Area	8.05	38,000	—		1 Field/8 Courts
Recreation Surface Parking	4.17	—	—	—	525 parking spaces
Right-of-Way	*16.10*	—	—	—	—
TOTAL	**199.01**	**540,750**	**272,000**	**450,000**	**6,000-Seat Capacity 100 rooms 6,263 Parking Spaces**

The following paragraphs describe each of the four major components.

BASEBALL STADIUM AND BASEBALL STADIUM RETAIL

The Ontario Regional Sports Complex would create a 16-acre sports entertainment area with a semiprofessional baseball stadium in Planning Area (PA) 1, supported by an ancillary retail buildings (135,000 square feet) and a 100-room hotel (70,000 square feet) for a total of 205,000 square feet of retail and hotel uses in PA-3 and PA-4 in the northeastern portion of the project site.

CITY PARK

The western part of the 199-acre project site, west of Ontario Avenue and excluding the stadium site, would be dedicated for use as a regional sports park in PA-5 and PA-6. The 118.5-acre regional sports park would have 13 lighted soccer fields, 8 multiuse lighted baseball/softball fields, and a 159,450-square-foot indoor athletic facility.

COMMERCIAL RETAIL

The commercial retail area in PA-2 is east of Ontario Avenue and west of the Cucamonga Creek Flood Control Channel but excludes the southeast corner of the project site. The 19.62-acre area is envisioned with 45,000 square feet of retail and with a 14.25-acre surface parking area to accommodate 1,500 surface parking spaces.

COMMUNITY RECREATION AREA

The community recreation center in PA-7 is at the southeast corner of the project site. It would be bounded by the commercial retail area to the north, the Cucamonga Creek Flood Control Channel to the east, Chino Avenue to the south, and Ontario Avenue to the west. The community recreation center would include a 70,000-square-foot, state-of-the-art community center/administration building; new, 13,000-square-foot aquatics facility with outdoor pool; Little League field; 25,000-square-foot operator facility; picnic shelter; exercise stations; playground; outdoor skate park; and eight tennis and pickleball courts.

RELATED IMPLEMENTATION ACTIONS

General Plan Amendments and Zoning Changes

The Ontario Plan (TOP) current land use designations are Low-Density Residential and Medium Density Residential with an Affordable Housing Overlay. The Proposed Project would require changing the existing land use designations to Open Space–Parkland (OS-R) and Hospitality to allow for recreational amenities and ancillary retail. Approval of the Proposed Project would nullify the existing Armstrong Ranch Specific Plan and rezone the defined area of the plan. The proposed rezoning involves changing the area to Open Space–Recreation and Convention Center Support Retail (CCS).

SB 330 and SB 166 Compliance

SB 330 mandates that there be no net loss of residential capacity throughout the city, and SB 166 mandates that a jurisdiction maintains an inventory of sites suitable to fulfill its low and very low RHNA obligation at all times. TOP 2050 allowed for a total of 1,471 units within the 199-acre project site, which are required to be reallocated throughout the city as a result of the proposed project to comply with SB 330. The City identified parcels in the Vineyard Corridor south of the project site where it will change the land use designations from Low-Density to Medium-Density (see Figure 6, *Existing TOP 2050 Land Uses of the Project Area*, and Figure 7, *Proposed General Plan Amendment of the Project Area*). A total capacity of 1,471 units within the project site will be reallocated to the Vineyard Corridor. The Vineyard Corridor parcels, where the residential capacity will be increased to offset the

reduced capacity on the project site, include 94 acres currently designated as Low-Density and currently have a development capacity of 424 units under the TOP. SB 330 requires the total existing capacity for project site and the Vineyard Corridor parcels combined be maintained so the Vineyard Corridor parcels must be redesignated to support a minimum capacity of 1,895 units to comply with SB 330. To achieve this, the Proposed Project requires a General Plan Amendment designating the Vineyard Corridor parcels (94 acres) as Medium Density instead of Low-Density creating capacity for 2,075 units (see Figure 7). As a result, the proposed project exceeds the requirements of SB 330, creating capacity for 180 units more than required.

The City's Housing Element also designated four parcels (36 acres) fronting Vineyard Avenue within the project site in the site inventory and allocated 194 units of its low and very low income RHNA obligation to those sites. To comply with SB 166, the City must maintain an inventory of sites with the capacity to accommodate its low and very low income RHNA obligation at all times. To offset the loss of the 194 low and very low income units allocated to the project site, the Affordable Housing Overlay, a zoning designation, will be applied to two of the Vineyard Corridor parcels (19.25 acres). With the application of the Overlay, the Vineyard Corridor parcels will qualify as sites suitable to support housing affordable to low and very low income households under State law. The Housing Element estimated the proportion of the units that could be used to satisfy their low and very low income RHNA obligation based on the anticipated time frame when water and sewer would be available. Because the proposed project will bring back bone infrastructure to the Vineyard Avenue parcels earlier than anticipated, it is estimated that the 19.25 acres designated with the Affordable Housing Overlay will create capacity for 212 units affordable to low and very low income households. This not only maintains the city's current capacity, but also creates a surplus of 13 low and very low income units that can be used to meet future SB 166 requirements (see Figure 7).

Environmental Factors Potentially Affected

The City determined that the Ontario Regional Sports Complex would require preparation of an EIR to address all 20 environmental topics identified in the CEQA Guidelines; thus, an Initial Study was not prepared in conjunction with this NOP.

The proposed project could potentially affect the following environmental factors, and each will be addressed in the EIR:

- Aesthetics
- Agriculture & Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Energy
- Geology/Soils
- Greenhouse Gas Emissions
- Hazards & Hazardous Materials
- Hydrology/Water Quality
- Land Use & Planning
- Mineral Resources
- Noise
- Population & Housing
- Public Services
- Recreation
- Transportation
- Tribal Cultural Resources
- Utilities & Service Systems
- Wildfire

The project site is on a list compiled pursuant to Government Code § 65962.5.

If you have further questions or require additional information, please contact Thomas Grahn, Senior Planner at 909-395-2413, or email tgrahn@ontarioca.gov.

CLERK OF THE BOARD OF SUPERVISORS
COUNTY OF SAN BERNARDINO
CALIFORNIA
2023 SEP 14 PM 12:49

CITY OF ONTARIO SOUTHERN CALIFORNIA

NOTICE OF PREPARATION AND SCOPING MEETING CITY OF ONTARIO

Date:	September 15, 2023
Subject:	Notice of Preparation (NOP) and Scoping Meeting for Ontario Regional Sports Complex Subsequent Environmental Impact Report (SEIR)
To:	State Clearinghouse, State Responsible Agencies, State Trustee Agencies, Other Public Agencies, Interested Organizations
Lead Agency/Sponsor:	City of Ontario, Planning Department
Project Title:	Ontario Regional Sports Complex Subsequent Environmental Impact Report

NOTICE IS HEREBY GIVEN that the City of Ontario (Latitude 34°03'N / Longitude 117°39'W) will prepare a Subsequent Environmental Impact Report (SEIR) for Ontario Regional Sports Complex. The City is the lead agency for the project. The purpose of this notice is (1) to serve as a Notice of Preparation of an EIR pursuant to the California Environmental Quality Act (CEQA) Guidelines § 15082, (2) to advise and solicit comments and suggestions regarding the scope and content of the EIR to be prepared for the proposed project, and (3) to notice the public scoping meeting.

Consistent with Section 15168 and Section 15162 of the CEQA Guidelines, the City will prepare a Subsequent EIR to address program-level environmental impacts associated with amendments to the Armstrong Ranch Specific Plan (Approved Project), which was adopted pursuant to the EIR (SCH 2006111009) certified in December 2017 (Certified EIR).

Notice of Preparation: The City of Ontario, as lead agency, requests that responsible and trustee agencies respond in a manner consistent with § 15082(b) of the CEQA Guidelines and § 21080.4 of the Public Resources Code. Responsible agencies must submit any comments in response to this notice during the 30-day public review period. The public review period will commence on **September 15, 2023**, and will close on **October 16, 2023**. A copy of the NOP can be viewed electronically on the City's web page at: https://www.ontarioca.gov/Planning/Reports/EnvironmentalImpact.

Written Comments: Comments in response to this notice can be emailed to Thomas Grahn at tgrahn@ontarioca.gov or can be physically mailed to the address below by the close of the 30-day NOP review period at 5:00 pm on October°16, 2023.

City Hall, Planning Department
303 East "B" Street
Ontario, CA 91764

Please include the name, email, and/or telephone number of a contact person at your agency or organization who can answer questions about the comment.

CLERK OF THE BOARD
Received on: 9/14/23
Remove on: 10/17/23

Scoping Meeting: The City will hold an open-house-style scoping meeting in conjunction with this NOP to present the project and the SEIR process and to provide an opportunity for agency representatives and the public to assist the lead agency in determining the scope and content of the environmental analysis for the SEIR. The open-house scoping meeting will be hosted on the evening of Wednesday, September 27, 2023, 6:00 pm to 8:00 pm, at the Westwind Park Community Center at 2455 E Riverside Drive in Ontario.

Project Location

The approximately 190-acre project site is in the southern portion of the City of Ontario, known as the Ontario Ranch, as shown on Figure 1, *Regional Location*. The project site is bounded to the north by Riverside Drive, to the south by Chino Avenue, to the west by the unimproved right-of-way for Vineyard Avenue, and to the east by the Cucamonga Creek Flood Control Channel (see Figure 2, *Local Vicinity*, and Figure 3, *Aerial Photograph*). Regional access to the site is provided by State Route 60 (SR-60) north of the site and Interstate 15 (I-15) east of the site. Local access is provided by Riverside Drive, Chino Avenue, and Ontario Avenue.

APNs

Assessor's Parcel Numbers (APN) within the project site include: 218-101-04, 218-101-03, 218-101-02, 218-101-01, 218-101-05, 218-101-06, 218-101-07, 218-101-08; 218-102-10, 218-102-11; 218-111-12, 218-111-49, 218-111-50, 218-111-11, 218-111-08, 218-111-09, 218-111-10, 218-111-06, 218-111-05, 218-111-04, 218-111-45 (see Figure 4, *Assessor's Parcels in the Project Site*).

Project Description

The Armstrong Ranch Specific Plan (Approved Project) was adopted in December 2017 and allows for the development of up to 891 residential dwelling units comprising a variety of single-family detached and attached dwelling units. The Specific Plan Area comprises six individual neighborhood Planning Areas, as shown on Figure 5, *Armstrong Ranch Specific Plan*.

The Proposed Project, known as the Ontario Regional Sports Complex, is a revision to the Approved Project and would consist of developing the site with a 6,000-capacity, semi-pro, minor league baseball stadium and new City Parks and Recreation facilities, including a new recreational center; aquatics center; and baseball, softball, and soccer fields. The land use plan under the Proposed Project comprises four subareas: the baseball stadium and stadium retail hospitality, the City Parks and Recreation facilities, commercial retail, and the Community Recreation Center, as shown on Figure 6, *Conceptual Land Use Plan*. The proposed changes to the General Plan land use designations and zoning are described below under "Related Implementation Actions."

The Proposed Project would also require street widening and intersection improvements, with half-width to potentially full-width improvements along Vineyard Avenue, Riverside Drive, and Chino Avenue.

Table 1, *Proposed Project Amenities Summary*, shows the land use designations proposed for each subarea of the Proposed Project and the acreage, building square feet, and number of amenities for each component of the Proposed Project. As shown in Table 1, the Proposed Project would result in 540,750 square feet of commercial building space, 450,000 square feet of stadium space, and 272,000 square feet of parking structures.

Table 1 Proposed Project Amenities Summary

TOTAL	**190.8**	**540,750**	**272,000**	**450,000**	**6,000 Capacity 100 rooms 6,263 Parking Spaces**

The following paragraphs describe each of the four major components.

BASEBALL STADIUM AND BASEBALL STADIUM RETAIL

The Ontario Regional Sports Complex would create a 16-acre sports entertainment area with a semiprofessional baseball stadium in Planning Area (PA) 1, supported by an ancillary retail buildings (135,000 square feet) and a 100-room hotel (70,000 square feet) for a total of 205,000 square feet of retail and hotel uses in PA-3 and PA-4 in the northeastern portion of the project site.

CITY PARK

The western part of the 190.8-acre project site, west of Ontario Avenue and excluding the stadium site, would be dedicated for use as a regional sports park in PA-5 and PA-6. The 118.5-acre regional sports park would have 13 lighted soccer fields, 8 multiuse lighted baseball/softball fields, and a 159,450-square-foot indoor athletic facility.

COMMERCIAL RETAIL

The commercial retail area in PA-2 is east of Ontario Avenue and west of the Cucamonga Creek Flood Control Channel but excludes the southeast corner of the project site. The 19.62-acre area is envisioned with 45,000 square feet of retail and with a 14.25-acre surface parking area to accommodate 1,500 surface parking spaces.

COMMUNITY RECREATION AREA

The community recreation center in PA-7 is at the southeast corner of the project site. It would be bounded by the commercial retail area to the north, the Cucamonga Creek Flood Control Channel to the east, Chino Avenue to the south, and Ontario Avenue to the west. The community recreation center would include a 70,000-square-foot, state-of-the-art community center/administration building; new, 13,000-square-foot aquatics facility with outdoor pool; Little League field; 25,000-square-foot operator facility; picnic shelter; exercise stations; playground; outdoor skate park; and eight tennis and pickleball courts.

RELATED IMPLEMENTATION ACTIONS

General Plan Amendments and Zoning Changes

The Ontario Plan (TOP) land use designations within the Armstrong Ranch Specific Plan are Low-Density Residential and Medium Density Residential with an Affordable Housing Overlay. The Proposed Project would require changing the existing land use designations to Open Space–Parkland (OS-R) and Hospitality to allow for recreational amenities and ancillary retail. Approval of the Proposed Project would nullify the Armstrong Ranch Specific Plan and rezone the defined area of the plan. The proposed rezoning involves changing the area to Open Space–Recreation and Convention Center Support Retail (CCS).

SB 330 and SB 166 Compliance

Changes to the residential land use designations require compliance with Senate Bill (SB) 330 and SB 166. The 891 units in the specific plan must be reallocated throughout the city. To comply with the City's SB 330 unit-count requirements, the City has identified parcels in the Vineyard Corridor, south of the project site, where it can change the land use designations. These parcels consist of 88.3 acres of Low-Density, which have a development capacity of 397 units. If 19.3 acres of this land has an Affordable Housing Overlay, it would result in a surplus of 1,518 units (SB 330) and 212 units (SB 166). These units would compensate for the loss of units in the City's Housing Element Sites Inventory due to the Proposed Project.

Environmental Factors Potentially Affected

The City determined that the Ontario Regional Sports Complex would require preparation of an SEIR to address all 20 environmental topics identified in the CEQA Guidelines; thus, an Initial Study was not prepared in conjunction with this NOP.

The proposed project could potentially affect the following environmental factors, and each will be addressed in the SEIR:

- Aesthetics
- Agriculture & Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Energy
- Geology/Soils
- Greenhouse Gas Emissions
- Hazards & Hazardous Materials
- Hydrology/Water Quality
- Land Use & Planning
- Mineral Resources
- Noise
- Population & Housing
- Public Services
- Recreation
- Transportation
- Tribal Cultural Resources
- Utilities & Service Systems
- Wildfire

The project site is on a list compiled pursuant to Government Code § 65962.5.

If you have further questions or require additional information, please contact Thomas Grahn, Senior Planner at 909-395-2413, or email tgrahn@ontarioca.gov.

Subject: Ontario Regional Sports Complex

Hi Thomas Grahn-

The Department of Toxic Substances Control received the NOP of the DEIR with a State Clearinghouse number of 2023110328. Our records indicate that there is also a similar project (difference of 9 acres in the project description) with a State Clearinghouse of 2006111009. The 2006 project was part of the Armstrong Specific Plan, and the 2023 description did not mention it. Is this the reason it became a new project? Should we reference the two SCH #'s as one project or should we expect the 2006 project to have its own DEIR forthcoming?

Thanks for your response and reach out if you would like more clarification of my inquiry!

Re: 2023110328, Ontario Regional Sports Complex Project, San Bernardino County

Dear Mr. Grahn:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, §15064.5 (b) (CEQA Guidelines §15064.5 (b)). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines §15064 (a)(1)). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). **AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements**. If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

1. Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project: Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

- **a.** A brief description of the project.
- **b.** The lead agency contact information.
- **c.** Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).
- **d.** A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).

2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report: A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subds. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1(b)).

- **a.** For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).

3. Mandatory Topics of Consultation If Requested by a Tribe: The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

- **a.** Alternatives to the project.
- **b.** Recommended mitigation measures.
- **c.** Significant effects. (Pub. Resources Code §21080.3.2 (a)).

4. Discretionary Topics of Consultation: The following topics are discretionary topics of consultation:

- **a.** Type of environmental review necessary.
- **b.** Significance of the tribal cultural resources.
- **c.** Significance of the project's impacts on tribal cultural resources.
- **d.** If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).

5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process: With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).

6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document: If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

- **a.** Whether the proposed project has a significant impact on an identified tribal cultural resource.
- **b.** Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

7. Conclusion of Consultation: Consultation with a tribe shall be considered concluded when either of the following occurs:

a. The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or

b. A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).

8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document: Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).

9. Required Consideration of Feasible Mitigation: If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b). (Pub. Resources Code §21082.3 (e)).

10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:

a. Avoidance and preservation of the resources in place, including, but not limited to:

i. Planning and construction to avoid the resources and protect the cultural and natural context.

ii. Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.

b. Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:

i. Protecting the cultural character and integrity of the resource.

ii. Protecting the traditional use of the resource.

iii. Protecting the confidentiality of the resource.

c. Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.

d. Protecting the resource. (Pub. Resource Code §21084.3 (b)).

e. Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).

f. Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).

11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource: An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:

a. The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.

b. The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.

c. The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf

SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf.

Some of SB 18's provisions include:

1. Tribal Consultation: If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code §65352.3 (a)(2)).

2. No Statutory Time Limit on SB 18 Tribal Consultation. There is no statutory time limit on SB 18 tribal consultation.

3. Confidentiality: Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).

4. Conclusion of SB 18 Tribal Consultation: Consultation should be concluded at the point in which:

- **a.** The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
- **b.** Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: http://nahc.ca.gov/resources/forms/.

NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center (https://ohp.parks.ca.gov/?page_id=30331) for an archaeological records search. The records search will determine:

- **a.** If part or all of the APE has been previously surveyed for cultural resources.
- **b.** If any known cultural resources have already been recorded on or adjacent to the APE.
- **c.** If the probability is low, moderate, or high that cultural resources are located in the APE.
- **d.** If a survey is required to determine whether previously unrecorded cultural resources are present.

2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.

- **a.** The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
- **b.** The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

3. Contact the NAHC for:

a. A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.

b. A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.

4. Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.

a. Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, §15064.5(f) (CEQA Guidelines §15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.

b. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.

c. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code §7050.5, Public Resources Code §5097.98, and Cal. Code Regs., tit. 14, §15064.5, subdivisions (d) and (e) (CEQA Guidelines §15064.5, subds. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address: Cameron.Vela@nahc.ca.gov.

Sincerely,

Cameron Vela

RE: NOTICE OF PREPERATION (NOP) AND SCOPING MEETING FOR THE ONTARIO REGIONAL SPORTS COMPLEX NON-TIERED ENVIRONMENTAL IMPACT REPORT (EIR) – NOTICE RECEIVED 11.16.23

Dear Mr. Grahn:

Thank you for the opportunity to comment on the Notice of Preparation (NOP) and Scoping Meeting for the Ontario Regional Sport Complex Non-Tiered Environmental Impact Report (EIR). Eastvale values its relationship with neighboring jurisdictions and is not opposed to development of this site; however, this project has the potential to generate traffic impacts in Ontario and Eastvale. The City of Eastvale offers the following comments for your consideration:

- **Area to be Studied –** According to the Riverside County Transportation Department's Traffic Impact Analysis (TIA) Guidelines, *the minimum area to be studied shall include any intersection of "Collector" or higher classification street, with "Collector" or higher classification streets, at which the proposed project will add 50 or more peak hour trips, not exceeding a 5-mile radius from the project site. The Transportation Department may require deviation from these requirements based on area conditions*.

  Please view the attached exhibit illustrating the intersections that the City of Eastvale requests be included as part of the study area within the TIA. In addition, contribution of fair share costs for any mitigations needed for the applicable intersections (as provided in the attached exhibit), shall also be considered.

- **Draft EIR** - The City of Eastvale will be awaiting to review the Draft EIR for the Ontario Regional Sports Complex.

Eastvale staff would like to request a meeting to discuss these comments and potential solutions that address concerns for both cities. Please contact me at (951) 703-4499 or ggonzalez@eastvaleca.gov to set a date and time to meet.

We look forward to working cooperatively with the City of Ontario on regional issues that affect our respective communities.

Sincerely,

Gustavo N. Gonzalez, AICP
Community Development Director

November 28, 2023

Dear Mr. Grahn:

I have reviewed the Notice of Preparation for the Ontario Regional Sports Complex, dated November 14, 2023 (SCH Number 2023110328.) Please see the comments below regarding the scope and content to be addressed for the proposed project.

a. Since the indicated parcels are zoned as agricultural, to include dairy operations, what are the associated environmental impacts and issues that warrant mitigation?
b. What are the environmental impacts, including cumulative impacts, and associated mitigation measures to local wildlife such as the burrowing owl and other sensitive species?
c. What are the negative effects of artificial lighting from this sports complex on local wildlife and migrating birds?
d. What are the environmental impacts, including cumulative impacts, and associated mitigation measures to declining vegetation communities to include sensitive species, such as alluvial fan sage scrub?
e. What are the proposed project's construction and operational emissions and compare those emissions to South Coast AQMD's recommended regional and localized CEQA air quality significance thresholds?
f. What mitigation measures are warranted due to the increase in traffic flow in terms of a higher risk for safety of drivers and pedestrians as well as delays and backups along the surrounding residential streets?
g. Ask that a priority be placed constructing infrastructure for public transportation, creating pedestrian-oriented environments, bike paths, which will reduce reliance on the automobile for access to the sports complex.
h. Establish and use design standards that improve the visual quality of the sports complex development and create unified, distinctive, and attractive mixed-use esthetics.
i. What are the sports complex operating hours and the impact of these hours on the quality of life for local residents along the routes and traffic corridors?
j. What are the environmental impacts from noise during construction, amount of light pollution to local residential areas, and stormwater runoff to include protection of the Cucamonga Creek Channel?

Thank you for your time and consideration.

Re: Notice of Preparation (NOP) and Scoping Meeting for Ontario Regional Sports Complex Subsequent Environmental Impact Report (SEIR)

Dear Thomas,

This letter is in response to the Notice of Preparation (NOP) and Scoping Meeting for Ontario Regional Sports Complex Subsequent Environmental Impact Report (SEIR), made available on November 14, 2023. The City's comments are outlined below:

Traffic / Transportation

1) The projects Traffic Impact Analysis should include the LOS analysis of any intersections and roadway segments expected to have 50 or more peak hour trips added by the project. The peak hour should not only include the typical morning and afternoon peak periods but an analysis of anticipated event arrival and dismissal peak periods for major events including weekends. A worse-case scenario should be included in the analysis. Impacts to adjacent facilities should be identified and mitigation measures recommended and conditioned upon the project.

2) As the project is expected to attract regional use, impacts to regional facilities such as freeways, major arterials and public transportation systems should be included to determine anticipated needs for services and impacts to the transportation system to ensure regional movement of traffic is not significantly impacted.

Public Works

3) The Regional Sports complex seems to be tributary to the Lower Cucamonga Spreading Grounds and Cucamonga Creek. Cucamonga Creek does convey to Mill Creek please describe the changes, if applicable, to any of the constructed wetlands in the Mill Creek wetlands.

13220 Central Avenue, Chino, California 91710
Mailing Address: P.O. Box 667, Chino, California 91708-0667
(909) 334-3250 • (909) 334-3720 Fax
Web Site: www.cityofchino.org

4) Please specify any deviations from the Regional Board letter dated 11/14/2016 to the design capture volume of the regional natural treatment system wetlands BMP to which this was a part of the development known as New Model Colony to which captured and treated areas by the Mill Creek Wetlands were roughly allocated by land use type.

Noise

5) The EIR should include an analysis on what mitigation measures would be put in place to mitigate noise impacts from the proposed baseball stadium or other parts of the complex that could be used for other events such as concerts, festivals, monster truck events, etc.

If you have any questions, please contact me by email at mhitz@cityofchino.org, or you can call me at 909-334-3448.

Sincerely,

Re: Proposed EIR-Ontario Regional Sports Complex

Mr. Grahn,

The following is a short list of subjects I would like to see thoroughly discussed and resolved during the preparation of the EIR.

1. TRAFFIC: What is the complete plan for speedy traffic into and out of the Stadium during baseball games and other significant activities held at the Complex?
2. STREET IMPROVEMENTS: What is the plan for major improvements to the adjacent streets to accommodate the increased traffic?
3. UNION CONTRACTORS: Will you make an effort to bring local labor unions in to consult about the planned construction and include a PLA to insure quality workmanship?
4. SOLAR PANELS: Will you commit to the use of Solar panels and batteries to the greatest extent possible for Stadium electrical power?
5. COMMUNITY INPUT: Please provide more education and opportunity for citizen participation not just the minimum.

Sincerely,

Raymond Smith
3937 San Lorenzo River Road

December 14, 2023

Dear Mr. Grahn:

I have reviewed the Notice of Preparation (NOP) for the Ontario Regional Sports Complex, dated November 14, 2023. Please see the comments below regarding my concerns that need to be addressed for this proposed project.

I agree with the NOP list of the following project issues: Aesthetics, Agriculture and Forestry Resources, Air Quality, Biological Resources, Cultural Resources, Cumulative Effects, Drainage/Absorption, Economics/Jobs, Energy, Flood Plain/Flooding, Geology/Soils, Greenhouse Gas Emissions, Growth Inducement, Hazards & Hazardous Materials, Hydrology/Water Quality, Land Use/Planning, Mandatory Findings of Significance, Mineral Resources, Noise, Population/Housing, Public Services, Recreation, Schools/Universities, Septic System, Sewer Capacity, Solid Waste, Transportation, Tribal Cultural Resources, Utilities/Service Systems, Vegetation, Wetland/Riparian, and Wildfire.

As a resident living close to this proposed project, the issues of the highest priority to my family and neighborhood are:

a. Transportation, specifically an increase in traffic for an already busy residential area. This includes Air Quality and Greenhouse Gas Emissions. What will the city do to keep trucks off streets where they are not permitted?
b. This land has been used for many years as dairy farms and currently has manure/affluent pits. What is the specific process to clean and dispose of manure in order to provide for safe drinking water, no contamination to the water table, and make the land safe for use as a sports park? Is the manure considered a hazardous waste?
c. What are the proposed project environmental impacts, including direct, indirect, and cumulative impacts to residents, plants and wildlife?
d. Due to the increase in traffic during construction and when the project is completed, what public safety measures will be in place to protect the safety of drivers, pedestrians and bicyclists?
e. What are the hours this sports park will be open and the sports field lights on (noise and light pollution)? Will the lights be on a shut off timer and it be fenced in to prevent use after hours?

Thank you for your time and consideration.

RE: NOP Ontario Regional Sports Complex EIR

Dear Mr. Grahn:

I have reviewed the City of Ontario's Notice of Preparation (NOP) for the Ontario Regional Sports Complex, dated November 14, 2023. By this letter, I'm providing my comments below, and want the EIR for this proposed project to address my concerns.

I agree with the City's NOP list of the following project issues:

Aesthetics, Agriculture and Forestry Resources, Air Quality, Biological Resources, Cultural Resources, Cumulative Effects, Drainage/Absorption, Economics/Jobs, Energy, Flood Plain/Flooding, Geology/Soils, Greenhouse Gas Emissions, Growth Inducement, Hazards & Hazardous Materials, Hydrology/Water Quality, Land Use/Planning, Mandatory Findings of Significance, Mineral Resources, Noise, Population/Housing, Public Services, Recreation, Schools/Universities, Septic System, Sewer Capacity, Solid Waste, Transportation, Tribal Cultural Resources, Utilities/Service Systems, Vegetation, Wetland/Riparian, and Wildfire.

As a resident affected by this proposed project, the issues of the highest priority to my family are:

1. Transportation, specifically an increase in traffic for an already busy residential area. This includes Air Quality and Greenhouse Gas Emissions.
2. This land has been used for many years as dairy farms and currently has manure/effluent pits. What is the specific process to clean and dispose of manure to provide safe drinking water, no contamination to the water table, and make the land safe for use as a sports park? Is the manure considered a hazardous waste?
3. What are the proposed project environmental impacts, including direct, indirect, and cumulative impacts on residents, plants, and wildlife?
4. Due to the increase in traffic during construction and when the project is completed, what public safety measures will be in place to protect the safety of drivers, pedestrians and bicyclists?
5. What are the hours this sports park will be open and the sports field lights on (noise and light pollution)? Will the lights be on a shutoff timer and fenced in to prevent use after hours?
6. Cultural and historical. These lands were occupied by indigenous peoples for thousands of years prior to the City of Ontario's existence. What is being done to protect the historic record and honor those people? Since the dairy industry has played a significant role in the history of Ontario and its economy, how will that be preserved and respected?

7. This project will require increased amounts of signage for directing traffic and advertising the amenities/businesses within. Signage size, type, and amount can become excessive and should be significantly restricted to accommodate the aesthetics of the community.
8. What is the expected carbon footprint of construction and on-going operation? This should be lowered beyond today's standards since the project will be long-lasting. Alternative energy sources should be considered?
9. Economically, if this project reaches the construction phase, it should be built with 100% union labor. The hotel and other businesses or contracted services should have a unionized workforce. All effort should be made to prioritize hiring from Ontario so that 90% of the workforce lives in the city. There must be a commitment to fostering diversity and promoting minority, women, Veteran, and small business through this project by providing supportive efforts that help them bid for construction, operation, and maintenance with a minimum of 90% of awards going to them. Large contractors/operators must be required to use 75% minority, women, veteran, small Ontario businesses to win contracts/bids.
10. With high winds and flash flooding regular occurrences in Ontario, what is the plan to mitigate and protect the project and surrounding community/neighborhoods?
11. From a fiscal aspect, how will this proposed project compare to using the same funds to generate equivalent amenities throughout Ontario rather than concentrating them in this one area that is difficult to access by 70% of residents? What are the operational costs for the city?
12. Water supply. What is being done to use reclaimed water for irrigation? How much additional water will be needed to support this project in both construction and on-going operations? Where will that water come from and how will it be sustained over time given the increased housing construction and warehousing in the city? How will sewar systems be impacted?
13. What is the impact on utilities and service systems? How will the increased demand generated by this project be addressed so that it will not impact residents? Will power and communication systems be trenched? If trenched, how far will this impact streets and other rights of way beyond the footprint of this project?
14. Will residents be given priority for use of this "Regional" project? What are the estimates of resident/non-resident usage? How much of the resulting project will be open to the public, free of charge and how much will be pay-for-use? Will a police substation be included? Will a fire station or paramedic center be included?
15. What kind of retail/shopping will be allowed? What will their hours of operation be? What type of hotel and its hours of operation?

Respectfully submitted,

Chris Robles

Re: Comments on Notice of Preparation for the Ontario Regional Sports Complex Subsequent EIR

Dear Mr. Grahn:

I am writing to comment on the updated Notice of Preparation (NOP) for the proposed Ontario Regional Sports Complex Subsequent EIR. The City of Rancho Cucamonga appreciates the opportunity to participate in the scoping process for this significant project, which seeks to develop a new minor league baseball stadium and sports complex in Ontario Ranch. In response to the initial release of the NOP, the City of Rancho Cucamonga provided comments on October 16, 2023. We have reviewed the updated NOP, and thank you for updating the project description. It has been expanded to include new details, including a map showing which parcels are proposed to be utilized for SB330 and SB166 compliance. However, the project description and updated NOP only address some of our comments.

Our previous letter also addressed statements from several City of Ontario officials expressing the City's desire to create a new home for the Rancho Baseball, LLC., franchise, which currently plays its home games at LoanMart Field (the Epicenter) in the City of Rancho Cucamonga, with the stated intent of relocating the team from Rancho Cucamonga to this new facility in the City of Ontario. If this is indeed Ontario's intended course of action, the City of Rancho Cucamonga asked that it be disclosed in the revised NOP as part of the project description. The revised NOP includes information about the proposed development of a Regional Sports Complex with a semiprofessional baseball stadium. However, no clarification is provided on the statements made by several City of Ontario officials expressing the City's desire to create a new home for the Rancho Baseball, LLC. franchise. Since no clarification is provided on this issue, we assume the City of Ontario will work to establish a second minor league baseball team in the area. Alternatively, if the City of Ontario intends to create a new home for the Rancho Baseball, LLC. franchise, the environmental impacts of moving this *local and* regional draw from one city to another should be disclosed in the Subsequent EIR, including impacts to the City of Rancho Cucamonga. Otherwise, if Ontario's intent is to establish a new team to play at the stadium, then that should likewise be disclosed in the Subsequent EIR. Without fully understanding the intent to relocate the Rancho Baseball, LLC., franchise, it is difficult to fully comment on the necessary considerations and analysis for the Subsequent EIR.

While we acknowledge and appreciate that some changes were made to the NOP, we still request that the Subsequent EIR address each of the comments made in our October 16, 2023 letter. A copy of that letter is attached for your reference. In conclusion, we emphasize the importance of a comprehensive and transparent environmental review process for the proposed Ontario Regional Sports Complex. We are excited about the potential benefits for the region such a facility might provide. Please consider all of our comments during the development of the EIR, and feel free to contact me if you require any additional information or clarification. We

appreciate the City of Ontario sharing the NOP with the City of Rancho Cucamonga and request that you continue to notify the City of Rancho Cucamonga of all future steps and opportunities to participate in the environmental review process.

Sincerely,

Matt Marquez
Director of Planning and Economic Development
City of Rancho Cucamonga

City of Ontario
City Hall, Planning Department
Attn: Mr. Thomas Grahn
TGrahn@ontarioca.gov
303 East "B" Street
Ontario, CA 91764

Dear Mr. Grahn:

I have reviewed the Notice of Preparation (NOP) for the Ontario Regional Sports Complex, dated November 14, 2023. I oppose this project at this time primarily because the residents in the area have not been notified in a meaningful and targeted way, that I know of. This is a project which according to city advertisements will bring 1.2 million people to this area. Residents in a 2 mile radius should be targeted with information about this project because it will impact the area in a significant way. I am a college-educated, English dominant resident of 20 years, and I was not even aware of the city newsletter that is considered one form of notifying residents of projects. I fear that other residents don't have access to notices about the project. Please see the comments below regarding my concerns that need to be addressed for this proposed project.

I agree with the NOP list of the following project issues: Aesthetics, Agriculture and Forestry Resources, Air Quality, Biological Resources, Cultural Resources, Cumulative Effects, Drainage/Absorption, Economics/Jobs, Energy, Flood Plain/Flooding, Geology/Soils, Greenhouse Gas Emissions, Growth Inducement, Hazards & Hazardous Materials, Hydrology/Water Quality, Land Use/Planning, Mandatory Findings of Significance, Mineral Resources, Noise, Population/Housing, Public Services, Recreation, Schools/Universities, Septic System, Sewer Capacity, Solid Waste, Transportation, Tribal Cultural Resources, Utilities/Service Systems, Vegetation, Wetland/Riparian, and Wildfire.

As a longtime resident living close to this proposed project, the issues of the highest priority to my family are:

a. Transportation, specifically an increase in traffic for an already busy residential area. This area already has a lot of semi-trucks traffic as well. This includes Air Quality and Greenhouse Gas Emissions. All of the 60 freeway exits from Grove to Haven including

Vineyard and Archibald) may be impacted as well Riverside Dr. itself. There are many houses and a mobile home park (at Vineyard) along Riverside Drive that will be impacted.

b. This land has been used for many years as dairy farms and currently has manure/effluent pits. What is the specific process to clean and dispose of manure in order to provide for safe drinking water, no contamination to the water table, and make the land safe for use as a sports park? Is the manure considered a hazardous waste?
c. What are the proposed project environmental impacts, including direct, indirect, and cumulative impacts on residents, plants, and wildlife?
d. What are the hours this sports park will be open and the sports field lights on (noise and light pollution)? Will the lights be on a shutoff timer and fenced in to prevent use after hours?

Again, in addition to the environmental concerns noted above, I would like for the residents in a 2 mile radius to be informed of this large project in an effective and thorough way so that they can comment on it. Thank you for your time and consideration.

Dear Mr. Grahn:
I have reviewed the Notice of Preparation (NOP) for the Ontario Regional Sports Complex, dated November 14, 2023. Please see the comments below regarding my concerns that need to be addressed for this proposed project.
I agree with the NOP list of the following project issues: Aesthetics, Agriculture and Forestry Resources, Air Quality, Biological Resources, Cultural Resources, Cumulative Effects, Drainage/Absorption, Economics/Jobs, Energy, Flood Plain/Flooding, Geology/Soils, Greenhouse Gas Emissions, Growth Inducement, Hazards & Hazardous Materials, Hydrology/Water Quality, Land Use/Planning, Mandatory Findings of Significance, Mineral Resources, Noise, Population/Housing, Public Services, Recreation, Schools/Universities, Septic System, Sewer Capacity, Solid Waste, Transportation, Tribal Cultural Resources, Utilities/Service Systems, Vegetation, Wetland/Riparian, and Wildfire.
As a resident living close to this proposed project, the issues of the highest priority to my family are:

1. Transportation, specifically an increase in traffic for an already busy residential area. This includes Air Quality and Greenhouse Gas Emissions.
2. This land has been used for many years as dairy farms and currently has manure/affluent pits. What is the specific process to clean and dispose of manure in order to provide for safe drinking water, no contamination to the water table, and make the land safe for use as a sports park? Is the manure considered a hazardous waste?
3. What are the proposed project environmental impacts, including direct,

indirect, and cumulative impacts on residents, plants, and wildlife?

4. Due to the increase in traffic during construction and when the project is completed, what public safety measures will be in place to protect the safety of drivers, pedestrians and bicyclists?
5. What are the hours this sports park will be open and the sports field lights on (noise and light pollution)? Will the lights be on a shutoff timer and fenced in to prevent use after hours?

The ripple effect: historically speaking, sports complexes lead to increased rents including small businesses and increased overall cost of living. A lot of us are already living paycheck to paycheck just to keep up with the rents. Homelessness will increase even more because of greedy landlords. Landlords are at the root of working ppl becoming homeless. Seventy percent of CA are renters….the Roman Empire fell after they built the Colosseum…Ontario already has other sports complexes, do we really need another one?

Thanks.

Ontario, CA 91764

Dear Mr. Grahn:

I have reviewed the Notice of Preparation (NOP) for the Ontario Regional Sports Complex, dated November 14, 2023. Please see the comments below regarding my concerns that need to be addressed for this proposed project.

I agree with the NOP list of the following project issues: Aesthetics, Agriculture and Forestry Resources, Air Quality, Biological Resources, Cultural Resources, Cumulative Effects, Drainage/Absorption, Economics/Jobs, Energy, Flood Plain/Flooding, Geology/Soils, Greenhouse Gas Emissions, Growth Inducement, Hazards & Hazardous Materials, Hydrology/Water Quality, Land Use/Planning, Mandatory Findings of Significance, Mineral Resources, Noise, Population/Housing, Public Services, Recreation, Schools/Universities, Septic System, Sewer Capacity, Solid Waste, Transportation, Tribal Cultural Resources, Utilities/Service Systems, Vegetation, Wetland/Riparian, and Wildfire.

As a resident living close to this proposed project, my family's primary concerns revolve around:

a. Transportation, specifically the potential increase in traffic for an already bustling residential area, considering Air Quality and Greenhouse Gas Emissions.

b. Given that the land has historically been used for dairy farming and currently features manure/effluent pits, I seek clarity on the precise process for cleaning and disposing of manure. This is to ensure the provision of safe drinking water, prevent contamination of the water table, and guarantee the land's safety for use as a sports park. Additionally, I am curious whether the manure is classified as hazardous waste.

c. What are the proposed project environmental impacts, including direct, indirect, and cumulative impacts on residents, plants, and wildlife?

d. In light of the expected increase in traffic during both construction and post-completion phases, I am interested in understanding the public safety measures that will be implemented to safeguard drivers, pedestrians, and bicyclists.

e. Finally, I would appreciate information on the operating hours of the sports park and the schedule for sports field lights. Specifically, will there be measures such as a shutoff timer and fencing to mitigate noise and light pollution and prevent unauthorized use after hours?

Thank you for dedicating your time to consider these inquiries.

Sincerely

Calvin Yee and Katie Cheng

Re: Ontario Regional Sports Complex (File No. PGPA23-002 & PZC23-004)

Hello Mr. Grahn,

I looked at the Notice of Preparation (NOP) for the Ontario Regional Sports Complex (dated 11.14.23) and wanted to express some concerns on the proposed project.

There were multiple project issues listed on the NOP and I live close to the project location. Here are my concerns:

1. Traffic – There will be increased traffic and Riverside Drive is already congested as it narrows down to one lane.

2. Environmental Impact - With more vehicles going through residential areas, there will be negative effects to air quality due to greenhouse gas emissions.

3. Security/Safety

   A. Auto - The increase in traffic (during construction and once the complex is open) opens up the potential for an increase in traffic accidents. What safety measures will be put in place to protect drivers, pedestrians, and bicyclists?

B. Residential – With more people coming into the City of Ontario to use the complex, there is the likelihood of more crimes being committed in the residential areas near the complex. It is already a concern as a resident living near Haven Avenue. Are there plans for more Police Officers patrolling the area? What measures will be put in place to ensure the safety of residents and their property?

4. Hazardous Waste - This land housed dairy farms. Will there be measures to ensure that the waste from any leftover manure pits does not contaminate drinking water for residents and the sports complex?

Thank you for your time and consideration.

Regards,

Mina Young

Notice of Preparation of a Draft Environmental Impact Report for the Ontario Regional Sports Complex (Proposed Project)

South Coast Air Quality Management District (South Coast AQMD) staff appreciates the opportunity to comment on the above-mentioned document. Our comments are recommendations on the analysis of potential air quality impacts from the Proposed Project that should be included in the Environmental Impact Report (EIR). Please send a copy of the EIR upon its completion and public release directly to South Coast AQMD as copies of the EIR submitted to the State Clearinghouse are not forwarded. **In addition, please send all appendices and technical documents related to the air quality, health risk, and greenhouse gas analyses (electronic versions of all emission calculation spreadsheets, air quality modeling, and health risk assessment input and output files, not PDF files). Any delays in providing all supporting documentation for our review will require additional review time beyond the end of the comment period.**

CEQA Air Quality Analysis

Staff recommends that the Lead Agency use South Coast AQMD's CEQA Air Quality Handbook and website[1] as guidance when preparing the air quality and greenhouse gas analyses. It is also recommended that the Lead Agency use the CalEEMod[2] land use emissions software, which can estimate pollutant emissions from typical land use development and is the only software model maintained by the California Air Pollution Control Officers Association.

South Coast AQMD has developed both regional and localized significance thresholds. South Coast AQMD staff recommends that the Lead Agency quantify criteria pollutant emissions and compare the emissions to South Coast AQMD's CEQA regional pollutant emissions significance thresholds[3] and localized significance thresholds (LSTs)[4] to determine the Proposed Project's air quality impacts. The localized analysis can be conducted by either using the LST screening tables or performing dispersion modeling.

The Lead Agency should identify any potential adverse air quality impacts that could occur from all phases of the Proposed Project and all air pollutant sources related to the Proposed Project. Air quality impacts from both construction (including demolition, if any) and operations should be calculated. Construction-related air quality impacts typically include, but are not limited to, emissions from the use of

[1] South Coast AQMD's CEQA Handbook and other resources for preparing air quality analyses can be found at: http://www.aqmd.gov/home/rules-compliance/ceqa/air-quality-analysis-handbook.
[2] CalEEMod is available free of charge at: www.caleemod.com.
[3] South Coast AQMD's CEQA regional pollutant emissions significance thresholds can be found at: http://www.aqmd.gov/docs/default-source/ceqa/handbook/scaqmd-air-quality-significance-thresholds.pdf.
[4] South Coast AQMD's guidance for performing a localized air quality analysis can be found at: http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/localized-significance-thresholds.

heavy-duty equipment from grading, earth-loading/unloading, paving, architectural coatings, off-road mobile sources (e.g., heavy-duty construction equipment) and on-road mobile sources (e.g., construction worker vehicle trips, material transport trips, and hauling trips). Operation-related air quality impacts may include, but are not limited to, emissions from stationary sources (e.g., boilers and air pollution control devices), area sources (e.g., solvents and coatings), and vehicular trips (e.g., on- and off-road tailpipe emissions and entrained dust). Air quality impacts from indirect sources, such as sources that generate or attract vehicular trips, should be included in the analysis. Furthermore, emissions from the overlapping construction and operational activities should be combined and compared to South Coast AQMD's regional air quality CEQA ***operational*** thresholds to determine the level of significance.

In the event that implementation of the Proposed Project requires a permit from South Coast AQMD, South Coast AQMD should be identified as a Responsible Agency for the Proposed Project in the EIR. The assumptions in the air quality analysis in the EIR will be the basis for evaluating the permit under CEQA and imposing permit conditions and limits. Questions on permits should be directed to South Coast AQMD's Engineering and Permitting staff at (909) 396-3385.

The California Air Resources Board's (CARB) *Air Quality and Land Use Handbook: A Community Health Perspective*[5] is a general reference guide for evaluating and reducing air pollution impacts associated with new projects that go through the land use decision-making process with additional guidance on strategies to reduce air pollution exposure near high-volume roadways available in CARB's technical advisory[6].

The South Coast AQMD's *Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning*[7] includes suggested policies that local governments can use in their General Plans or through local planning to prevent or reduce potential air pollution impacts and protect public health. It is recommended that the Lead Agency review this Guidance Document as a tool when making local planning and land use decisions.

Mitigation Measures

In the event that the Proposed Project results in significant adverse air quality impacts, CEQA requires that all feasible mitigation measures that go beyond what is required by law be utilized to minimize these impacts. Any impacts resulting from mitigation measures must also be analyzed. Several resources to assist the Lead Agency with identifying potential mitigation measures for the Proposed Project include South Coast AQMD's CEQA Air Quality Handbook,[8] South Coast AQMD's Mitigation Monitoring and Reporting Plan for the 2022 Air Quality Management Plan,[9] and Southern California Association of Government's Mitigation Monitoring and Reporting Plan for the 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy.[10].

Mitigation measures for operational air quality impacts from other area sources that the Lead Agency should consider in the EIR may include the following:

[5] CARB's *Air Quality and Land Use Handbook: A Community Health Perspective* can be found at: http://www.arb.ca.gov/ch/handbook.pdf.
[6] CARB's technical advisory can be found at: https://www.arb.ca.gov/ch/landuse.htm.
[7] South Coast AQMD. 2005. *Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning*. Available at: http://www.aqmd.gov/docs/default-source/planning/air-quality-guidance/complete-guidance-document.pdf.
[8] https://www.aqmd.gov/home/rules-compliance/ceqa/air-quality-analysis-handbook
[9] South Coast AQMD's 2022 Air Quality Management Plan can be found at: http://www.aqmd.gov/home/air-quality/clean-air-plans/air-quality-mgt-plan (Chapter 4 - Control Strategy and Implementation).
[10] Southern California Association of Governments' 2020-2045 RTP/SCS can be found at: https://www.connectsocal.org/Documents/PEIR/certified/Exhibit-A_ConnectSoCal_PEIR.pdf.

- Maximize use of solar energy by installing solar energy arrays.
- Use light colored paving and roofing materials.
- Utilize only Energy Star heating, cooling, and lighting devices, and appliances.
- Use of water-based or low VOC cleaning products that go beyond the requirements of South Coast AQMD Rule 1113.

Design considerations for the Proposed Project that the Lead Agency should consider to further reduce air quality and health risk impacts include the following:

- Clearly mark truck routes with trailblazer signs, so that trucks will not travel next to or near sensitive land uses (e.g., residences, schools, day care centers, etc.).
- Design the Proposed Project such that truck entrances and exits are not facing sensitive receptors and trucks will not travel past sensitive land uses to enter or leave the Proposed Project site.
- Design the Proposed Project such that any check-in point for trucks is inside the Proposed Project site to ensure that there are no trucks queuing outside.
- Design the Proposed Project to ensure that truck traffic inside the Proposed Project site is as far away as feasible from sensitive receptors.
- Restrict overnight truck parking in sensitive land uses by providing overnight truck parking inside the Proposed Project site.

South Coast AQMD staff is available to work with the Lead Agency to ensure that air quality, greenhouse gas, and health risk impacts from the Proposed Project are accurately evaluated and mitigated where feasible. If you have any questions regarding this letter, please contact me at swang1@aqmd.gov.

Sincerely,

Sam Wang

Subject: Ontario Sports Complex Project

Good Afternoon Mr. Grahn,

I am reaching out today on behalf of the Cahuilla Band of Indians, I have also CC the Cultural Director BobbyRay Esparza. Due to the large ground disturbance and project vicinity being within traditional Cahuilla land use, we wish to consult on this project. We request that you send any cultural material reports associated with the project for review. Thank you for reaching out in regards to the project, have a good weekend.

Respectfully,

Lorrie Gregory
Cultural Resource Coordinator
Cahuilla Band of Indians
Phone: 1 (760) 315-6839
Email: lgregory@cahuilla-nsn.gov

Cahuilla Band of Indians
Cultural Department

52701 CA-Highway 371 Anza, California 92539

September 15, 2023

Mr. Thomas Grahn
City of Ontario

RE: Ontario Regional Sports Complex

To Whom It May Concern:

Thank you for contacting the Cahuilla Band of Indians concerning the above referenced project.

On behalf of the Cahuilla Band of Indians the Cahuilla Cultural Department would like express the concern that the proposed project area may be sensitive for cultural resources, based on the maps provided and location, the proposed project is located in the Tribes Traditional Land Use Area. The Cahuilla Cultural Department believes that in order to mitigate the disturbance of known cultural resources and possible undiscovered resources that may be found during ground disturbances it would be best practice to have Cahuilla Tribal Monitor(s) on site for all ground disturbances. However, the heavy disturbances of the Project Area may have displaced cultural resources on the surface, it is possible that intact cultural resources exist at depth. Incorporation of Cahuilla Tribal Monitors would reduce impacts to known and unknown cultural resources to a level of less than significant. The Cahuilla Band of Indians would like to be consulted on this project. We request to setup a meeting to discuss the project at your earliest convenience. Please let us know a date and time that best fits your schedule.

Sincerely,

BobbyRay Esparza
Cultural Director
Cahuilla Band of Indians

The region where Gabrieleño culture thrived for more than eight centuries encompassed most of Los Angeles County, more than half of Orange County and portions of Riverside and San Bernardino counties.
It was the labor of the Gabrieleño who built the missions, ranchos and the pueblos of Los Angeles. They were trained in the trades, and they did the construction and maintenance, as well as the farming and managing of herds of livestock.
“The Gabrieleño are the ones who did all this work, and they really are the foundation of the early economy of the Los Angeles area “ . “That’s a contribution that Los Angeles has not recognized--the fact that in its early decades, without the Gabrieleño, the community simply would not have survived.”

Re: 2006111009, Ontario Regional Sports Complex Subsequent EIR Project, San Bernardino County

Dear Mr. Grahn:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, §15064.5 (b) (CEQA Guidelines §15064.5 (b)). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines §15064 (a)(1)). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). **AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements.** If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.

AB 52

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

1. Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project: Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

- **a.** A brief description of the project.
- **b.** The lead agency contact information.
- **c.** Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).
- **d.** A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).

2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report: A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subds. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1(b)).

- **a.** For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).

3. Mandatory Topics of Consultation If Requested by a Tribe: The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

- **a.** Alternatives to the project.
- **b.** Recommended mitigation measures.
- **c.** Significant effects. (Pub. Resources Code §21080.3.2 (a)).

4. Discretionary Topics of Consultation: The following topics are discretionary topics of consultation:

- **a.** Type of environmental review necessary.
- **b.** Significance of the tribal cultural resources.
- **c.** Significance of the project's impacts on tribal cultural resources.
- **d.** If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).

5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process: With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).

6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document: If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

- **a.** Whether the proposed project has a significant impact on an identified tribal cultural resource.
- **b.** Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

7. Conclusion of Consultation: Consultation with a tribe shall be considered concluded when either of the following occurs:

a. The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or

b. A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).

8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document: Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).

9. Required Consideration of Feasible Mitigation: If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b). (Pub. Resources Code §21082.3 (e)).

10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:

a. Avoidance and preservation of the resources in place, including, but not limited to:

i. Planning and construction to avoid the resources and protect the cultural and natural context.

ii. Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.

b. Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:

i. Protecting the cultural character and integrity of the resource.

ii. Protecting the traditional use of the resource.

iii. Protecting the confidentiality of the resource.

c. Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.

d. Protecting the resource. (Pub. Resource Code §21084.3 (b)).

e. Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).

f. Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).

11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource: An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:

a. The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.

b. The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.

c. The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf

SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf.

Some of SB 18's provisions include:

1. Tribal Consultation: If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code §65352.3 (a)(2)).
2. No Statutory Time Limit on SB 18 Tribal Consultation. There is no statutory time limit on SB 18 tribal consultation.
3. Confidentiality: Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).
4. Conclusion of SB 18 Tribal Consultation: Consultation should be concluded at the point in which:
    a. The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
    b. Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: http://nahc.ca.gov/resources/forms/.

NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center (https://ohp.parks.ca.gov/?page_id=30331) for an archaeological records search. The records search will determine:
    a. If part or all of the APE has been previously surveyed for cultural resources.
    b. If any known cultural resources have already been recorded on or adjacent to the APE.
    c. If the probability is low, moderate, or high that cultural resources are located in the APE.
    d. If a survey is required to determine whether previously unrecorded cultural resources are present.

2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.
    a. The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
    b. The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

3. Contact the NAHC for:
   a. A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.
   b. A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.

4. Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.
   a. Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, §15064.5(f) (CEQA Guidelines §15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.
   b. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.
   c. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code §7050.5, Public Resources Code §5097.98, and Cal. Code Regs., tit. 14, §15064.5, subdivisions (d) and (e) (CEQA Guidelines §15064.5, subds. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address: Cameron.Vela@nahc.ca.gov.

Sincerely,

Cameron Vela

Cameron Vela
Cultural Resources Analyst

cc: State Clearinghouse

Hi Thomas,

Thanks for sharing the plans for the regional sports complex. Omnitrans has two bus stops adjacent to this project which are noncompliant with ADA:

- Riverside @ Whispering Lakes EB NS
- Riverside @ Ontario EB NS

So we'd like to request that the project bring these two bus stops up to compliance with ADA, with a curb-connected sidewalk boarding area (at least 5'x8' to meet ADA, but it would be preferable to make it 10' wide x 25' long so we could fit a future bus shelter). It would also be great to get a concrete bus pad in the pavement of the street where the buses stop as well. The bus stop locations could also be shifted a little to where they best fit with the project plans. Our design guidance is attached, please let me know if you would like me to review plans or have any questions.

Thanks so much!

SECTION 1 - INTRODUCTION

GOALS OF THE GUIDE

Design stops and stations as introductions to the transit system

- National Association of Transportation Officials (NACTO) Transit Street Design Guide[3]

The primary goal of a transit agency is to provide customers with transportation to their destination in a safe, convenient, efficient, and reliable manner.[1] Stops and stations are the introduction to the transit system, and thus their design, safety, and accessibility are crucial for any community.

The purpose of this manual is to provide design criteria guidelines (developed by Omnitrans and working with local jurisdictions) for use by planners, designers, traffic engineers, and property developers when designing and placing bus stops and transit facilities. This information is not to be used as a set of standard details on which to base a final design, but rather as recommended criteria and general guidelines for the placement and safe design of transit facilities.

It cannot be overemphasized that these guidelines must be used in conjunction with the full evaluation of the facts and local conditions, as well as the application of sound planning / engineering judgment. Each site must be thoroughly examined, and each project must be evaluated from the aspect of safety, operational requirements, and cost-effectiveness. Design solutions may need to be adjusted accordingly to satisfy site specific constraints and applicable local ordinances. It is also important to note that the preferred dimensions should be planned for, and minimum dimensions are applicable only in specific constrained circumstances.

The goals of the guidelines are to:

- Promote consistency in local bus stop and transit facility placement and design throughout Omnitrans' service area.
- Provide guidance for cities, property owners, real estate developers, and other partners to incorporate bus stops and other facilities within new development that meet Omnitrans' operational needs.
- Help communities meet their mobility needs by providing safe, comfortable, and convenient transit facilities that encourage public transportation use.

GUIDING VALUES

Omnitrans is the transit agency serving the San Bernardino Valley and, as part of the agency's strategic plan, strives to provide innovative mobility solutions that connect the region and strengthen the economy. Omnitrans is committed to the values of safety, a focus on customer needs, performance, integrity, innovation, diversity, collaboration, and leadership. Towards the

mission of connecting the community with coordinated and sustainable transit service, the following values undergird these design guidelines for bus stops so that Omnitrans can best serve the needs of its riders. For more information about Omnitrans' strategic plan, please visit: https://omnitrans.org/about/strategicplan/

- Safety

Safety First

  - The physical safety of customers is vital to the success of any transit system to not only retain existing ridership but also encourage new riders.[1] Ultimately, it is important that bus stops are easily identifiable, safe, accessible, and a comfortable place to wait for the bus.[2]

- Equity

Universal Design is Equitable Design

  - It is vital to design streets so that people of all ages and abilities can safely reach transit stops and board comfortably. The elements that make transit more smoothly accessible can benefit all transit riders, regardless of physical or sensory ability. Thoughtful, human-centered design of transit infrastructure elevates the experience of riding transit and can save both time and money.[3]

- Community

More than Transit Infrastructure

  - Bus stops are integral parts of a local community connecting riders with transit often at important local destinations. Valuing and responding to the community's voiced needs and desires not only can provide safe and equitable bus stops but can also create a sense of place and local identity.

OMNITRANS SERVICES

As of June 2023, Omnitrans operates fixed bus route services, one bus rapid transit (BRT) line (sbX), paratransit services (OmniAccess) for individuals with disabilities and microtransit service (OmniRide) in three local communities. For the most up-to-date information on routes, schedules, and other services, please visit: https://omnitrans.org/services/overview/

These guidelines focus on bus stop design, requirements and amenities for fixed routes and BRT stops. OmniRide service uses virtual stops rather than established stops on fixed routes, and OmniAccess operates curb-to-curb.

SECTION 2 – COORDINATING AND WORKING WITH OMNITRANS AND LOCAL JURISDICTIONS

When a development is constructed adjacent to an existing or proposed bus stop location, the developer should be responsible for providing the minimum requirements and preferred amenities as described in the sections below. Jurisdictions are encouraged to require the placement of shelters that conform to local standards for customer recognition and ease of maintenance. Cities should submit a copy of all street improvement and development plans to Omnitrans to ensure proper coordination and placement of transit amenities. (See Appendix B for more details).

In most cases, transit agencies are limited in their ability to improve sidewalks and curb ramps around bus stops.[1] Thus, coordination between local jurisdiction, Omnitrans and developers is vital. It should be noted that Omnitrans currently coordinates and partners with all 16 member jurisdictions.

See Appendix A for Omnitrans Development Review flow chart. Omnitrans uses the flow chart for steps to take when considering bus stop design and placement in development plans. Developers can contact Omnitrans with questions about bus stops at or around their development at BusStops@Omnitrans.org.

REQUESTS TO CHANGE A BUS STOP

Placement of potential bus stops or concerns regarding existing stops may originate from city staff, Omnitrans staff, riders, developers, or the public. These requests include issues such as requests to add, move, or remove bus stops or bus service; add, move, or remove amenities at existing bus stops; and operational or safety/security concerns related to the stop location.

Requests for information or changes in bus stops should be sent to:

BusStops@Omnitrans.org

The process below will be followed:

- Both Omnitrans and local jurisdiction (city or county) staff will review the request and will jointly determine if a stop should be changed, relocated, or removed; if amenities should be removed or added; or if the stop in question raises any safety or operational challenges.
- If the issue affects the safety and security of Omnitrans riders, both Omnitrans and the local jurisdiction will perform an analysis of the site to identify options to reduce the dangerous condition. Careful consideration should be taken to determine how removal of the stop will affect persons who utilize the stop regularly.
- Omnitrans and the local jurisdiction will confirm, in writing, the work to be completed by each agency.
- The jurisdiction will notify adjacent property owners if necessary.

City officials should see Appendix B, when a local jurisdiction (city or county) begins the process of creating or updating a general plan, specific plan, or roadway project for coordinating and incorporating transit in the process.

Also see Appendix C, for informing Omnitrans when construction could impact bus stops or bus operations.

RESOLUTION OF CONFLICTS BETWEEN OMNITRANS AND JURISDICTIONS

While the local jurisdiction will consider Omnitrans' recommendations prior to making a final determination, ultimately the decision on the location of bus stops is the responsibility of the local jurisdiction. Jurisdictions have the authority to remove bus stops in cases where safety and security issues exist. When jurisdictions remove stops for such concerns, they shall notify and work in conjunction with Omnitrans to solve the safety and security problem with the goal to reopen or relocate the stop in a timely manner.

If situations occur where the staff of Omnitrans and that of the jurisdiction are unable to agree on a proposed plan, bus stop locations, or other concerns, the issue is to be raised to higher levels. Normally, a meeting will be held at the director level in an attempt to resolve disagreements. If the issue remains unresolved, an additional meeting will be held at the CEO/General Manager and City Manager level. If the issue is still unresolved, the jurisdiction's representative may present the disagreement to the Omnitrans Board of Directors at the next regular meeting.

SECTION 3 – VEHICLE TYPES

The dimensions of Omnitrans' vehicles impact the design criteria for bus stops and roadways.

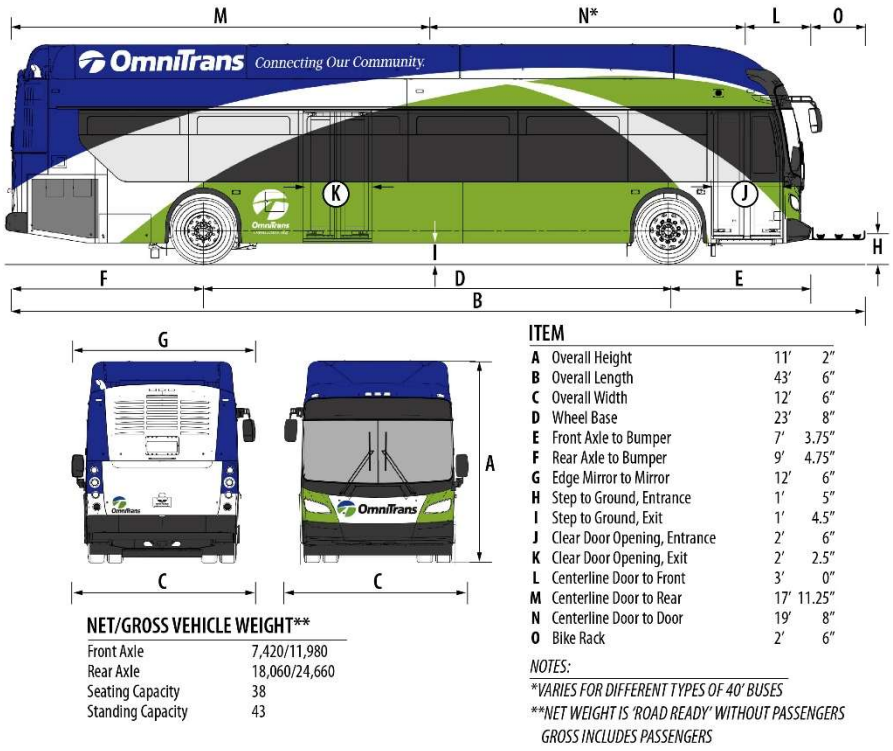
25' Cutaway Vehicles

Access vehicles, some fixed routes and some of Omniride's micotransit fleet are 25' long, 16-seat cutaway vehicles, as shown in Figure 3-1. The smaller size of these vehicles allows for navigation through narrow residential streets more cost-effectively than standard 40' coaches.

Figure 3-1

Standard 40' Vehicle

The majority of Omnitrans' fleet is the standard 40' coach, whose dimensions are shown in Figure 3-2. These are the primary vehicles used for most fixed routes. See Figure 3-3 for an example of a 40' vehicle design for future use as part of the Bus Rapid Transit (BRT) sbX fleet.



ITEM		
A	Overall Height	11′ 2″
B	Overall Length	43′ 6″
C	Overall Width	12′ 6″
D	Wheel Base	23′ 8″
E	Front Axle to Bumper	7′ 3.75″
F	Rear Axle to Bumper	9′ 4.75″
G	Edge Mirror to Mirror	12′ 6″
H	Step to Ground, Entrance	1′ 5″
I	Step to Ground, Exit	1′ 4.5″
J	Clear Door Opening, Entrance	2′ 6″
K	Clear Door Opening, Exit	2′ 2.5″
L	Centerline Door to Front	3′ 0″
M	Centerline Door to Rear	17′ 11.25″
N	Centerline Door to Door	19′ 8″
O	Bike Rack	2′ 6″

NET/GROSS VEHICLE WEIGHT**	
Front Axle	7,420/11,980
Rear Axle	18,060/24,660
Seating Capacity	38
Standing Capacity	43

NOTES:
**VARIES FOR DIFFERENT TYPES OF 40' BUSES*
***NET WEIGHT IS 'ROAD READY' WITHOUT PASSENGERS*
GROSS INCLUDES PASSENGERS

Figure 3-2: Dimensions for 40' vehicle

60′ Articulated Vehicle

The sbX system uses specialized 60′ articulated vehicles. While longer, the articulated design of the 60′ vehicles allows for a tighter turning radius than a 40′ vehicle. The 60′ buses used currently by Omnitrans are specially designed for the features of the Bus Rapid Transit (BRT) line. However, in the future, 60′ articulated vehicles may be used for local service, depending on ridership needs. All future Omnitrans BRT lines will have the sbX branding, with a color line designation for each line, and similar station architecture on all lines ("E" Street – Green Line; West Valley Connector – Purple Line).

Figure 3-3: Design for 40′ sbX vehicle

Figure 3-4: Design for 60′ sbX vehicle

ZERO-EMISSION FLEET

In 2018, the California Air Resources Board mandated that California transit agencies transition to a 100 percent zero-emission bus fleet by 2040. Under this mandate, Omnitrans has begun converting its fleet to battery electric buses as well as considering fuel cell buses. As part of this transition, charging infrastructure is needed, particularly on-route to charge buses during end-of-line layovers. This will require space for installing the chargers, as well as electrical infrastructure to power them.

As further guidelines and criteria are specified for charging stations on bus routes, Omnitrans will make these available for developers and city jurisdictions to incorporate for designs of transit centers and end-of-line layover stops.

SECTION 4 – BUS STOP TYPES AND PLACEMENT

BUS STOP TYPES

There are five types of bus stops – *minimum, basic, preferred, premium, and custom*. For a minimum stop, these are the essential requirements that are needed at any bus stop. The listed amenities for basic and preferred bus stops are recommended when space allows. Premium bus stops offer more amenities to riders for convenience and comfort. Finally, custom bus stops are generally for BRT stations (such as the sbX) or transit centers.

A summary for each of these requirements and recommendations is provided below for reference. Details for each of these types of bus stops are explained later in the document. (See pg. 23 and/or pg. 29)

Table 4-1: BUS STOP TYPES

FEATURE	Minimum	Basic	Preferred	Premium	Custom/ sbX	Transit Center
ADA Compliance	✓	✓	✓	✓	✓	✓
Bus pole & Signage	✓	✓	✓	✓	✓	✓
Trip System Info	✓	✓	✓	✓	✓	✓
Lighting	✓	✓	✓	✓	✓	✓
Bench* or Lean Bar		✓	✓	✓	✓	✓
Trash Receptacle*		✓	✓	✓	✓	✓
Shelter*			✓	✓	✓	✓
Standard Shelter			✓			
Premium Shelter				✓		
Bike parking					✓	✓
Landscaping					✓	✓
Local Art					✓	✓
Variable Message Sign (with real-time bus arrival)				✓	✓	✓
CCTV & public announcement Security System					✓	✓
Elevated platform with guardrails (BRT stop)					✓	✓
Restrooms for staff/public						✓
Charging for electric buses on layover						✓

* **Private / City Amenities:** Benches, trash receptacles, and shelters can be owned and maintained by Omnitrans, by the city, or by a private party. Check with the local jurisdiction for local requirements as some cities prefer to have amenities unique to their community versus the standard Omnitrans ones.

BUS STOP PLACEMENT

Bus stops are generally located at intersections as this maximizes pedestrian accessibility from both sides of the street and provides connection to intersecting bus routes. There are three possible locations to place a bus stop relative to an intersection, the far-side (after the intersection), near-side (before the intersection) and mid-block. See Figures 4-1 to 4-3 for these placements.

Local fixed-route bus stops are generally placed about ¼ mile apart to accommodate average acceptable walking distance for transit riders. sbX bus rapid transit stations are generally placed further apart, such as ½ mile apart, to reduce travel times. sbX bus rapid transit lines are generally underlaid by a less frequent local route that provides access to the more closely spaced local bus stops.

The exact location of bus stops at intersections varies from site to site. However, general considerations for the placement of bus stops include:

- Mid-block stops are highly discouraged because they typically place transit riders far away from a safe (signalized) crossing and encourage unsafe street crossings.
- When a route requires a left turn or a right turn, the preferred location for the bus stop is on the far side of the intersection after the left or right turn is completed.
- If there is a high volume of right turns at an intersection, the preferred location for a stop is on the far side of the intersection away from the turning traffic.
- In circumstances where the accumulation of buses at a far side stop would spill over into the intersection and additional stacking length is not available, the stop should be placed on the near side of the intersection. This removes the potential for queuing buses to overflow into and block the intersection.
- At complex intersections with multi-phase signals or dual right or left turn lanes, far side stops are preferred because they remove the buses from the area of complicated traffic movements at that intersection.
- Finally, far side placement is preferred as the safest for pedestrians because they are more visible in the crosswalk to other drivers who are entering the intersection.

For a fuller comparison of advantages and disadvantages of each placement, see the table in Appendix D.

Rural areas may present challenges for bus stop design and placement because of limited sidewalk networks, high-speed roadways, and non-supporting transit land uses such as industrial buildings, vacant parcels, and open spaces. In these cases, efforts should be made by local jurisdictions (in coordination with Omnitrans) to find the most level and open area for the bus stop to ensure customer access and safety. Stops must include ADA accessible waiting pads, a landing area for the bus ramp, any necessary wheelchair ramps constructed of concrete or asphalt, and connections to existing intersections or developments. See Section 6 for further details about ADA compliance at bus stops.

Figure 4-1

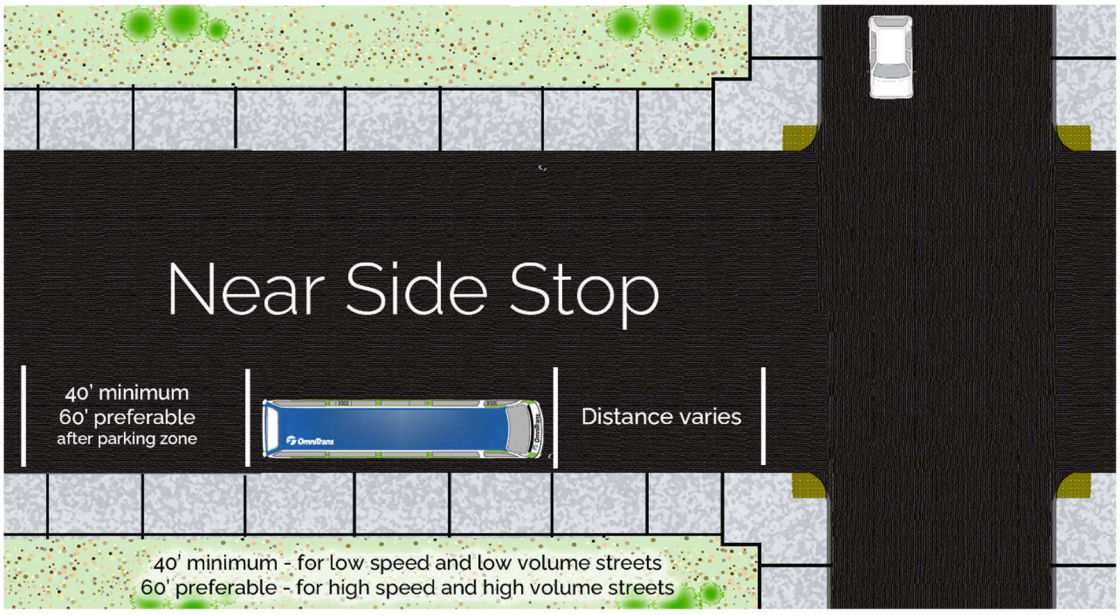


Figure 4-2

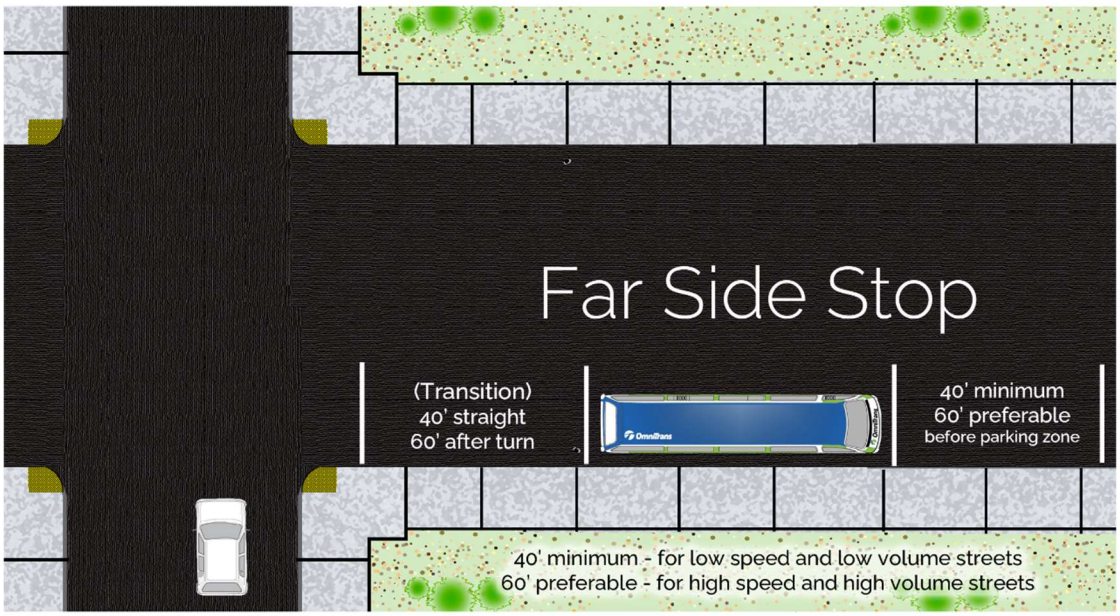

Figure 4-3

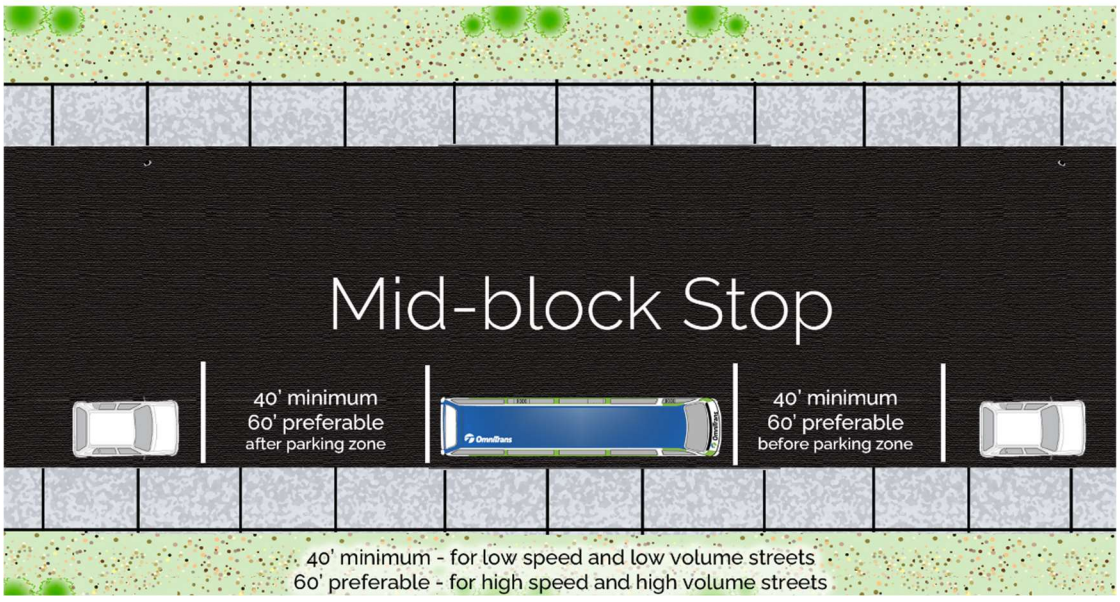

BUS RAPID TRANSIT (BRT)

Bus Rapid Transit (BRT) is a high-quality bus-based system that seeks to blend features similar to a light rail system with the flexibility and affordability of a bus route, thereby providing more reliable, convenient and faster service than regular bus services.[4] Planned future sbX BRT lines in Omnitrans' service area will have a portion of dedicated bus lane, transit signal priority system throughout the corridor, elevated platforms and premium station amenities with real-time customer information and security systems at stations. These features provide comfort and efficiency helping buses avoid the delays from being stuck in traffic and stopping frequently between major arteries.

Figure 4-4: center-running BRT station

Figure 4-5: side-running BRT station

Although developers and city officials generally will not build BRT stations, the information and dimensions are particularly useful for future BRT lines and corridors to ensure there is enough ROW to build potential stations (60' x 10-14') and dedicated bus lanes (12' wide lanes).

BRT Features on Omnitrans' sbX Lines

- Corridor: sbX lanes are 12' wide, separate lanes for each direction of bus traffic, and ideally run down the center of the street to avoid conflicts with other traffic. A concrete median or landscape median is needed in the center of the street to avoid other traffic turning left across bus lane; legal turns and u-turns for other traffic must be made available only at signalized intersections.
- Corridor: sbX lines have transit signal priority throughout the corridor and could use queue jump lanes to help buses avoid traffic at intersections where there are not dedicated lanes. (See Figure 4-6).
- Corridor: sbX BUS ONLY lane markings are needed, particularly at intersections to denote that other traffic cannot use bus lanes. Colored pavement, such as red pavement, is also ideal to denote bus lanes. Dedicated bus lanes also have separate vertical/horizontal line signals instead of the standard 3 color traffic light at intersections to avoid confusion for other traffic.

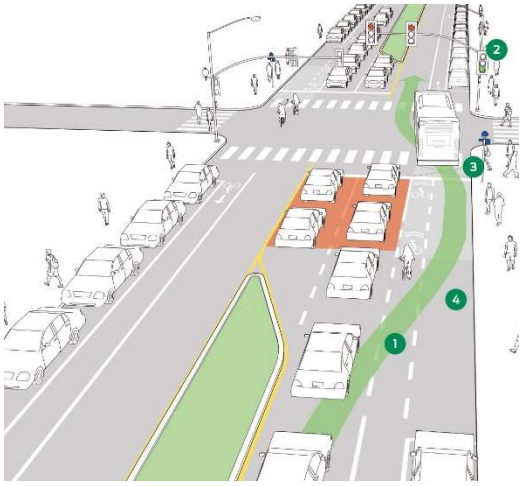

Figure 4-6: National Association of City Transportation Officials (NACTO) example of a queue jump where buses can use transit signal priority to skip ahead of traffic at an intersection.

*For more info see the resources page for the link to NACTO's website.

- Station: sbX stations should be designed for use by 40′ or 60′ vehicles (as shown in Figures 3-3 and 3-4). For 40′ vehicles, a bike-loading ramp is needed at 13″ platform height stations for riders to take the bike to street level for loading it onto the front of the bus. (See Figure 4-8).
- Station: Omnitrans uses left-side boarding stations for center-running lanes. These stations have level boarding with a 13″ platform height and truncated dome warning strips along the edge of the platform. Side running stations that are at standard curb height can be used by local buses.

Figure 4-7: side-running BRT station diagram.

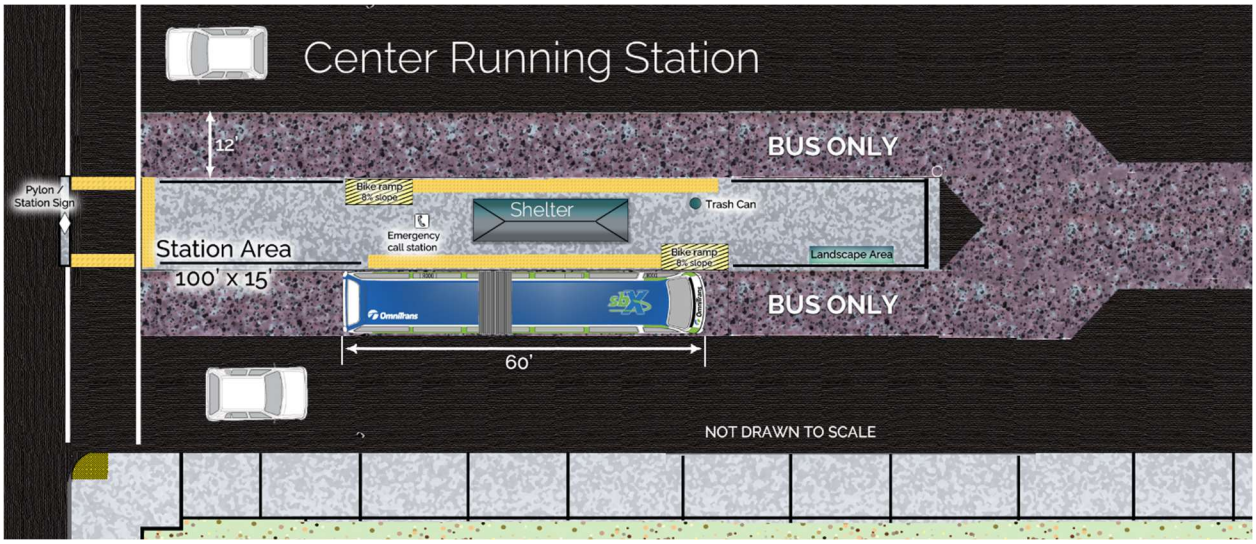

Figure 4-8: center-running BRT station diagram.

BUS STOP PLACEMENT AND BICYCLE SAFETY

As a part of Omnitrans' Bus Stop Safety Improvement Plan (BSSIP)[5], Omnitrans is building relationships with residents and local community groups to improve the safety of riders and gather essential information about pedestrian and bicycle access. Beyond simply putting in a bus stop, city planners, designers, developers, and other public officials should consider how greater pedestrian and bicycle access can encourage transit use and how such features can be integral to the development's design. For more information and ideas, see Omnitrans' document on Transit-Oriented Development.[6]

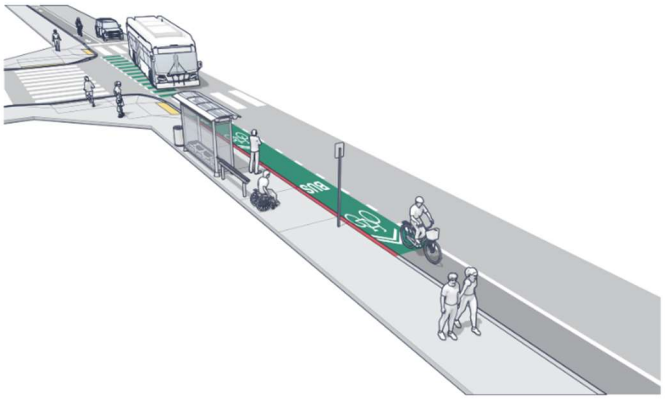

Fig 4-9: Bus stop with Class II bike lane

Source: AC Transit[6]

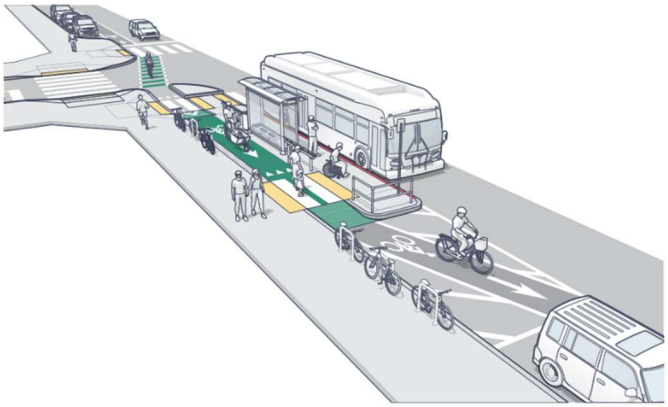

Fig 4-10: Class 2 bike lane with floating bus stop.

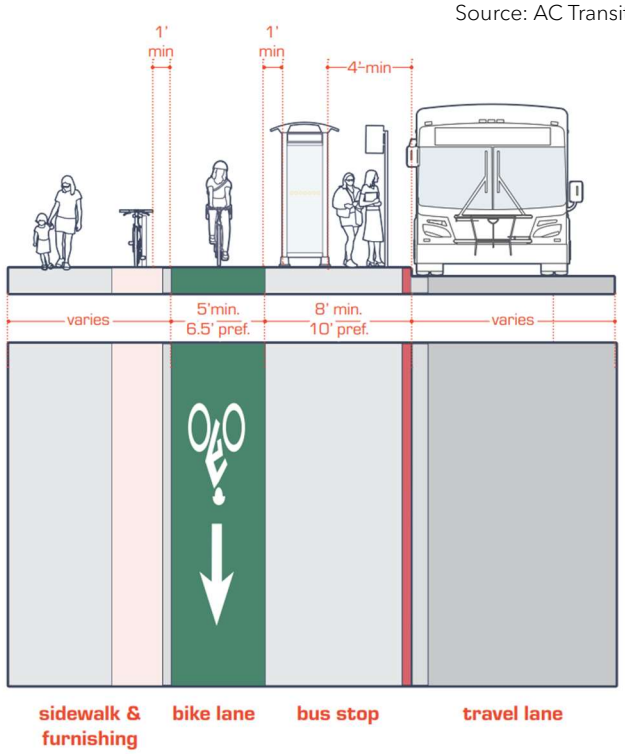
Source: AC Transit[6]



Designing bus stops that limit the potential for conflict between buses and bike riders, particularly when there is a bike lane next to a bus stop, can promote safety for all. Figure 4-9 from AC Transit's Multimodal Corridor Guidelines shows a typical bus stop at the curb with a Class II bike lane. When a bus is stopped for boarding/alighting riders, cyclists are likely to move out of the bike lane and are at great risk of an accident with a car in the traffic lane or with a pedestrian on the sidewalk.

Figures 4-10 and 4-11 show a different option for a floating bus stop where the bike lane is routed behind the stop. This allows for riders to board or alight a bus without causing an obstruction and potential accident with cyclists.

Considerations for floating bus stops and the effect on traffic flow need to be considered, particularly if the flow of traffic is stopped for boarding / alighting riders. Typically, floating bus stops should not be installed on high-speed roads where the average travel speed is 35 miles per hour or greater, as stopping in the travel lane in such conditions may be unsafe.[7] For further details on how infrastructure that supports both transit and cyclists, please see the link for AC Transit Multimodal Corridor Guidelines in the references section.

Fig 4-11: Floating bus stop and bike lane spacing.

SECTION 5 – BUS INFRASTRUCTURE RECOMMENDATIONS / OPTIONS

This section provides details of infrastructure design guidelines for bus facilities.

BUS PADS (*Highly recommended for street longevity*)

Roadway pavements (or shoulders, if that is where the buses stop) need to be of sufficient strength to accommodate repetitive bus axle loads of up to 25,000 pounds. Exact pavement designs will depend on site-specific soil conditions. Areas where buses start, stop, and turn are of particular concern because of the increased loads associated with these activities. Using reinforced concrete pavement pads (see Figures 5-2 and 5-3) in these areas reduces pavement failure problems that are common with asphalt.

A minimum 8" thick reinforced concrete pad should be provided, with engineering consideration of the specific soil conditions. The pad should be 12' wide with a pavement section designed to accept anticipated loadings. The length of the pad should be based on the anticipated length of the bus that will use the bus stop and the number of buses that will be at the stop simultaneously.

Figure 5-1: Bus turnout with bus pad

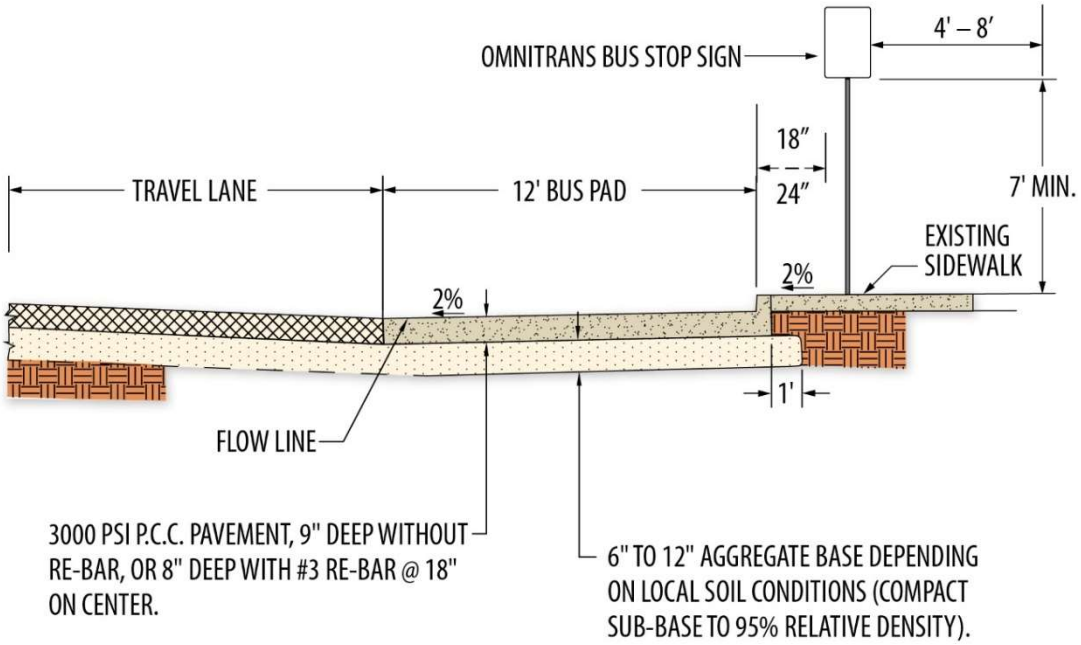

Figure 5-2: Specifications for a bus pad

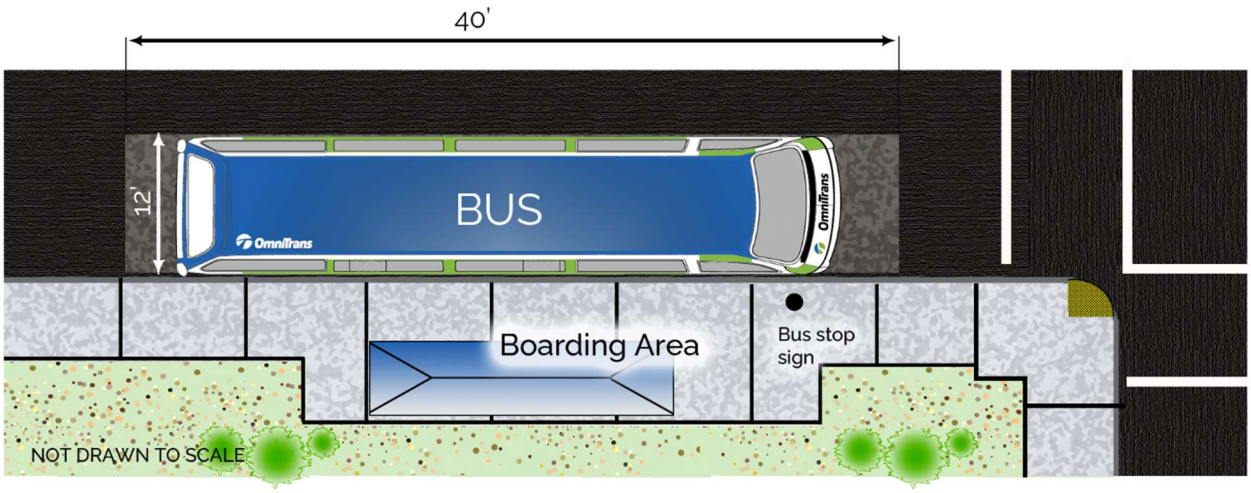

Figure 5-3: Bus pad dimensions

BUS TURNOUTS (*Recommended for certain locations when conditions are met*)

Bus turnouts are designated areas where buses can pull out of the flow of traffic to stop for boarding or alighting riders. Because bus turnouts use additional right-of-way and make it more difficult for buses to re-enter traffic, turnouts should only be used when the first criterion is met as well as one of the following conditions:

- Street traffic speeds are 40 mph or higher
- Peak period boarding average exceeds 20 boardings per hour
- Average peak period dwell time exceeds 30 seconds per bus (i.e. a bus timepoint or an end-of-line break time).
- The local jurisdiction becomes aware of a high frequency of accidents involving buses and/or pedestrians within the past year.
- When traffic in the curb lane exceeds 250 vehicles during the peak hour or when bus volumes exceed 10 or more during peak hours.
- Where bus stops in the curb lane are prohibited.
- Where sight distances prevent traffic from stopping safely behind a stopped bus (i.e. hills, curves).
- At stops where there are consistent wheelchair boardings.
- Where buses are expected to layover at the end of a trip. These turnouts may also include electrical infrastructure to charge electric buses (see pg. 8 of Section 3).
- Where there is adequate space for turnout length and depth given to allow a bus to safely exit and enter the flow of traffic.

The far side of an intersection is the preferred location for turnouts. Nearside turnouts typically should be avoided because of conflicts with right turning vehicles, and delays to transit service as buses attempt to re-enter the travel lane. The exception is where buses use a right turn lane as a queue jump lane. Often, this is associated with transit signal priority for transit and where a far side pullout is not possible. Turnouts in mid-block locations are not desirable unless associated with key pedestrian access to a major transit-oriented activity center and safe ways to cross the street. See the above guidelines about bus stop placement.

Guidelines for bus turnouts:

- Turnouts should be placed at signalized intersections where the signal can create gaps in traffic allowing the bus to re-enter the street.
- On streets with bike lanes and where bus layovers occur, the width of the turnout should not block bike traffic. (See section 4 for other considerations and potential options to consider for bus stops next to bike lanes).
- Where the outside travel lane is wide, a partial turnout width may be used. The minimum combined width of the outside travel lane plus turnout width must be at least 24′ 6″, to allow traffic to pass the bus.

Bus turnout designs are illustrated in Figures 5-4 through 5-7.

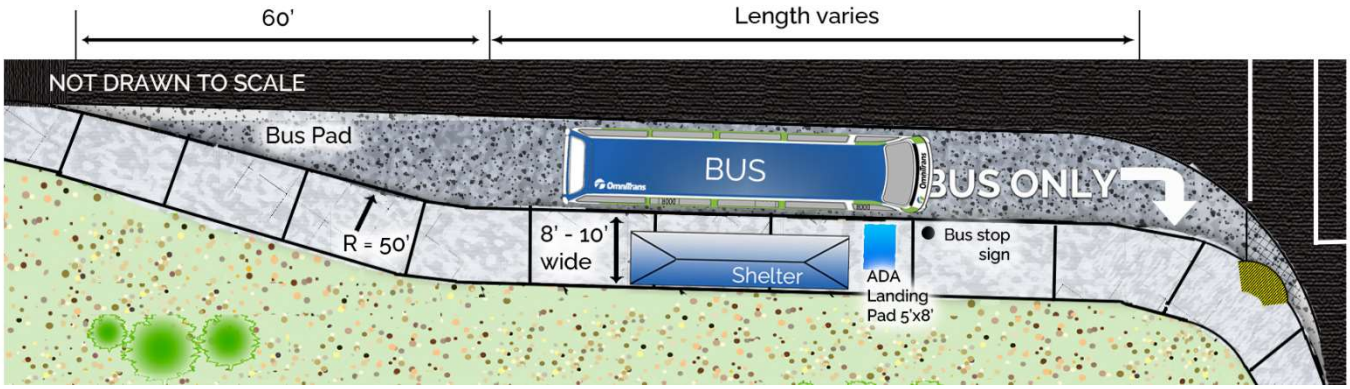

Figure 5-4: Nearside Turnout Design

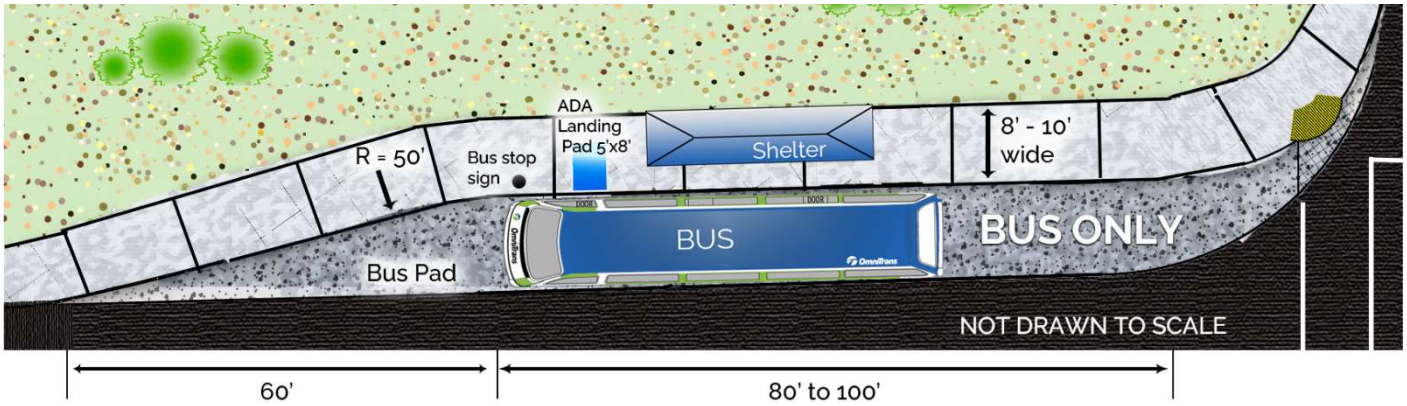

Figure 5-5: Farside Turnout Design

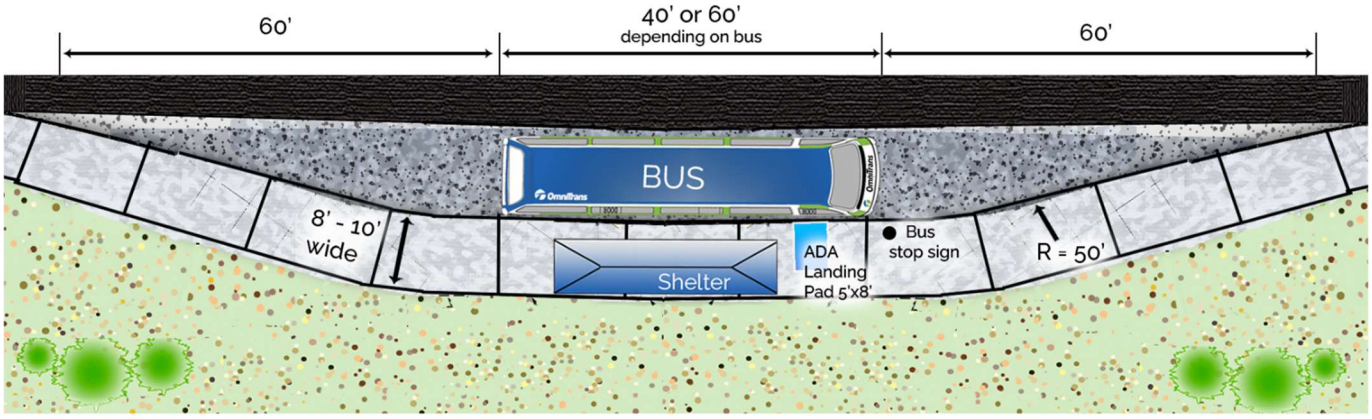

Figure 5-6: Turnout design where not immediately at an intersection (60' spacing).

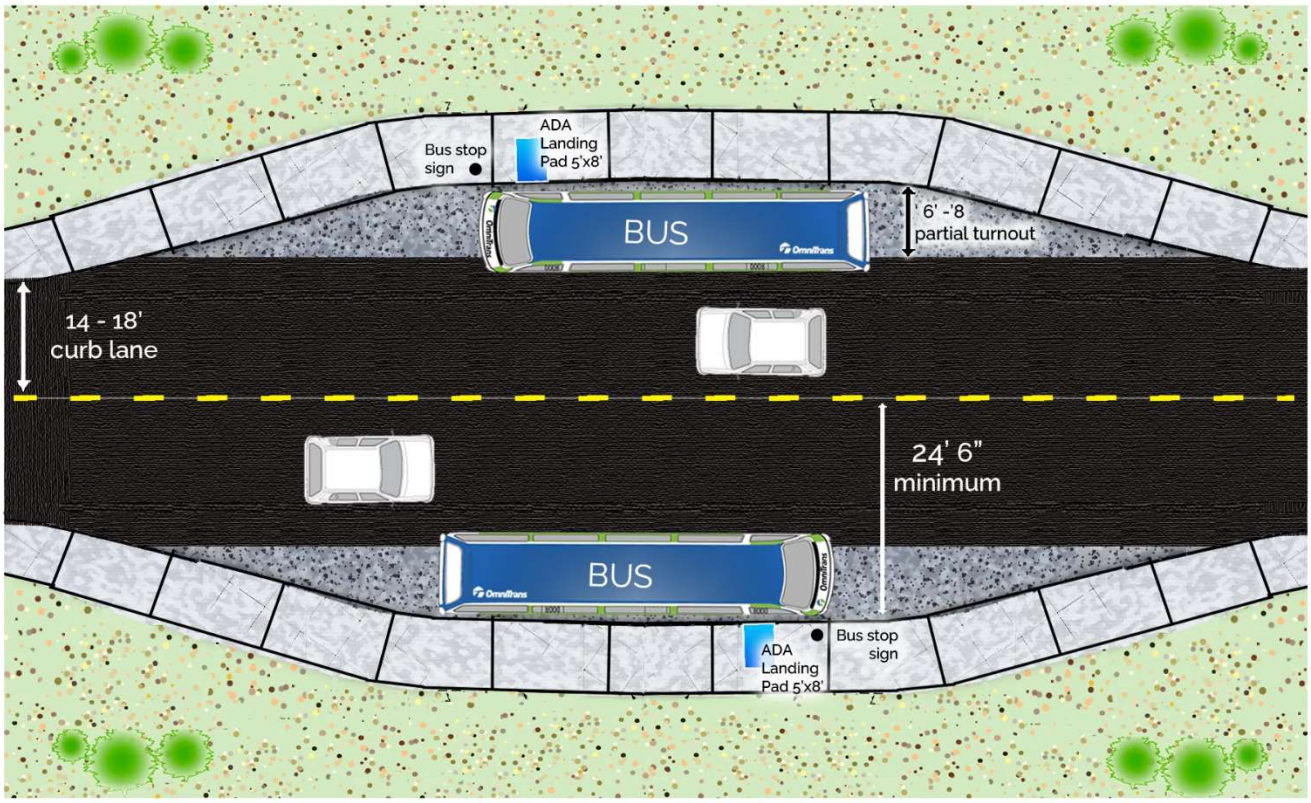

Figure 5-7: Partial Bus Turnout with curb lane but limited ROW. This allows buses to pull out of traffic and allows vehicles to pass.

CURB EXTENSIONS (*Depends on location if recommended when conditions are met*)

Curb extensions, also known as bus bulbouts or nubs, are essentially a sidewalk extension through the parking lane that becomes directly adjacent to the travel lane. This can create more space for bus stop amenities in dense urban environments with considerable pedestrian traffic. With a bulbout, a bus will stop in the traffic lane instead of weaving into the parking lane.

Additionally, curb extensions provide enough space for bus patrons to comfortably board and alight from the bus away from nearby general pedestrian traffic. Nubs shorten the pedestrian walking distance across a street, which reduces pedestrian exposure to on-street vehicles.

Curb extensions should be considered at sites with the following characteristics:

- High pedestrian activity
- Crowded sidewalks
- A need to reduce pedestrian crossing distances
- Bus stops in travel lanes

Curb extensions have application along streets with lower traffic speeds and/or low traffic volumes where it would be acceptable to stop buses in the travel lane. Collector streets in neighborhoods and designated pedestrian districts are good candidates for this type of bus stop. Curb extensions should be designed to accommodate vehicle turning movements to and from side streets. Major collector and arterial streets should be designed to accommodate larger bus turning radius and therefore may not be good candidates for bus bulbouts. Figures 5-8 and 5-9 shows typical curb extension design.

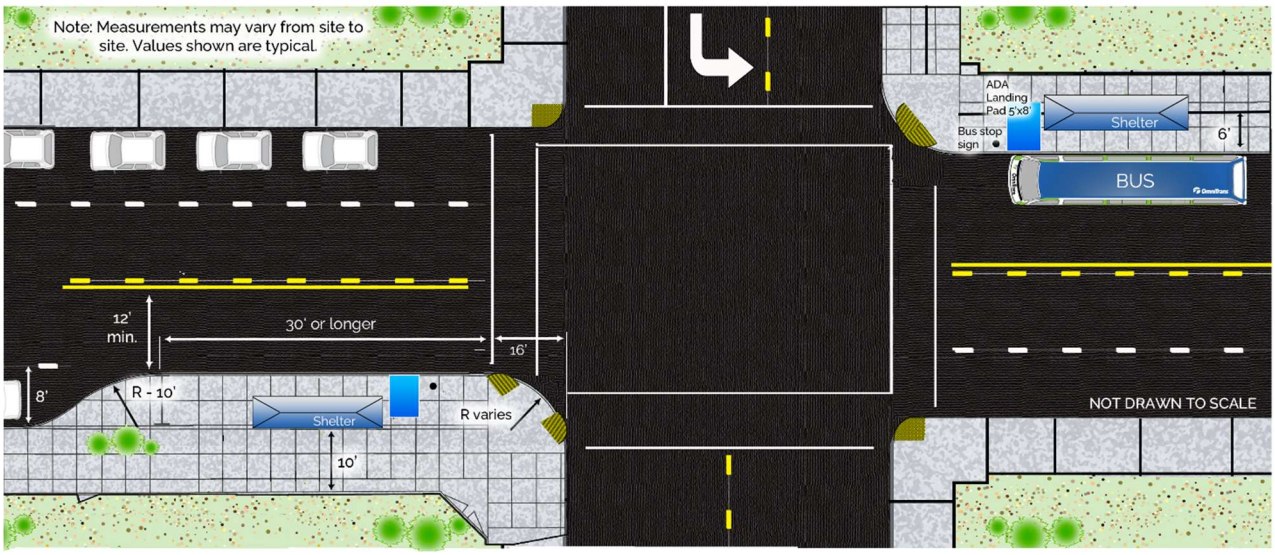

Figure 5-8: Extended curb installed at intersection.

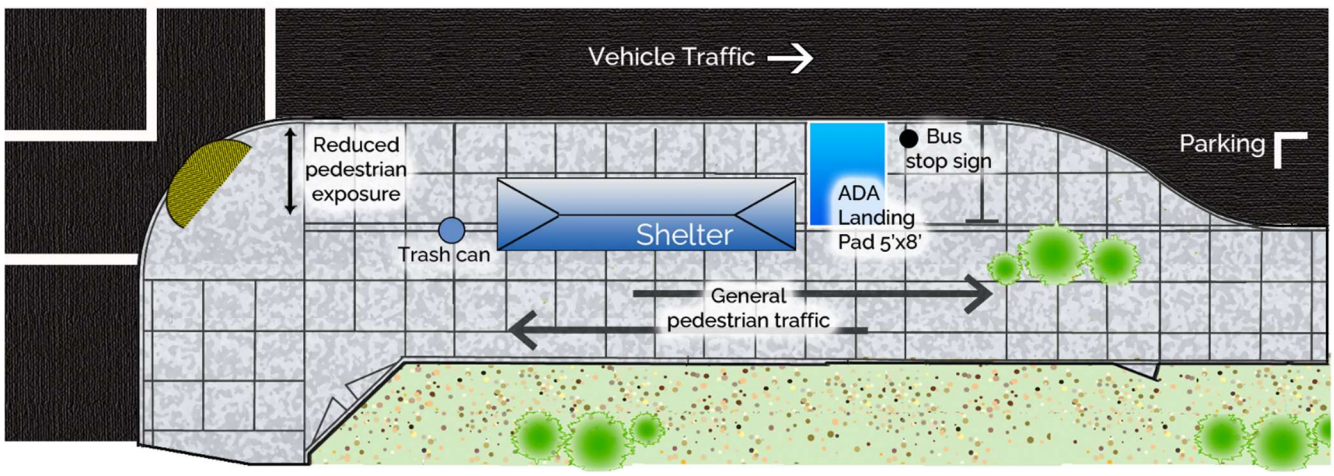

Figure 5-9: Close up of extended curb installed at intersection.

CURB TURNING RADII (*Depends on location if required; check with bus operations*)

The corner curb radii used at intersections can affect bus operations when the bus makes a right turn. The design of corner curb radii should be based on the following elements:

- Design vehicle characteristics, including bus turning radius
- Width and number of lanes on the intersecting street
- Allowable bus encroachment into other traffic lanes
- On-street parking
- Angle of intersection
- Operating speed and speed reductions
- Pedestrian safety

A trade-off in providing a large curb radius for easier turning is that the crossing distance for pedestrians is increased. This greater crossing distance increases the pedestrians' exposure to on-street vehicles and can influence how pedestrians cross an intersection, both of which are safety concerns. The additional time that a pedestrian is in the street because of larger curb radii should be considered in signal timing and median decisions.

Figures 5-10 and 5-11 provide specific information on bus dimensions and on bus turning radii.

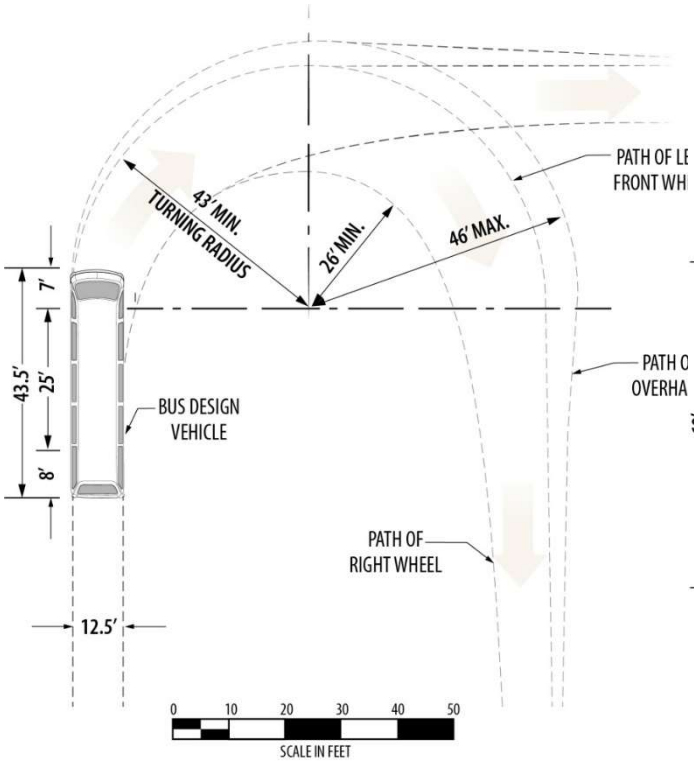

Figure 5-10: Design turning for 40′ bus

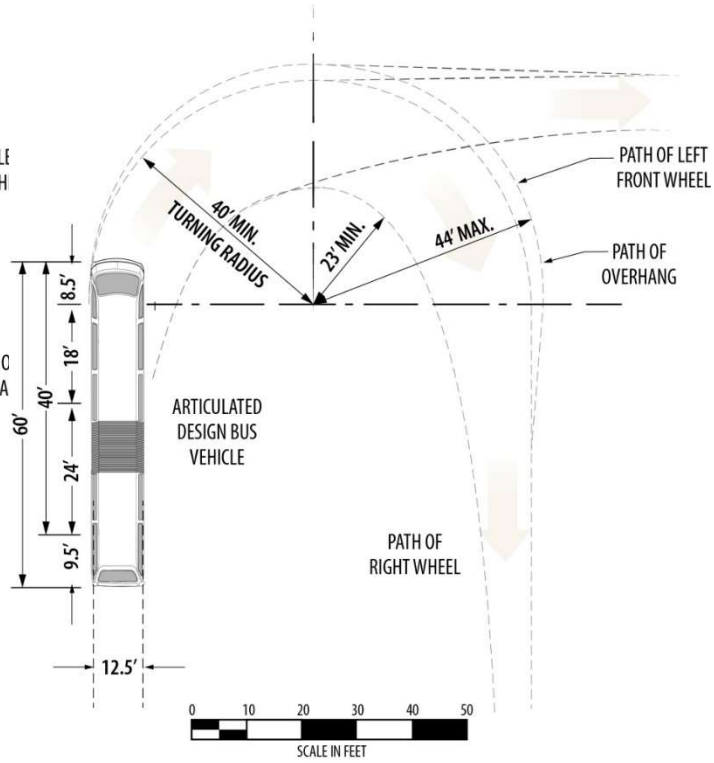

Figure 5-11: Design turning for 60′ bus

SECTION 6 – MINIMUM BUS STOP REQUIREMENTS

Bus stops are critical connection points between modes of transportation. Stops should be accessible, comfortable, convenient, and designed for the local context. They should provide a sense of safety at all times of the day and complement the larger transportation network.

ADA COMPLIANCE

Americans with Disabilities Act (ADA) – These are the standards in design that allow access for people with disabilities or mobility limitations. Being ADA-compliant eliminates physical obstacles to mobility and safe access for vulnerable groups while raising overall user safety.

THE ADA GUIDELINES - MINIMUM REQUIREMENTS FOR BUS STOPS

- ADA Landing pad (5′ x 8′) – These are the minimum dimensions needed to deploy a lift or ramp and allow a customer in a wheelchair to board or alight from the vehicle. An unobstructed paved (stable and firm surface such as concrete, asphalt, brick, stone, or tile) area located immediately where the front door of the bus would stop. The landing pad shall be at a minimum of 5 ft long (parallel to the street) by 8 ft wide and near the bus stop pole.
- Curb connection – The landing pad shall connect the curb to the sidewalk.
- Accessible Path – A firm concrete path from the landing pad to the sidewalk that allows for travel to a nearby intersection.
- Curb Ramps – All intersections within a short distance of a bus stop shall have an accessible curb ramp.
- Slope –The landing pad, boarding area, and sidewalk shall be flat with no more than a 2% slope. The path of travel shall not have cracks bigger than 2 inches.

To verify a bus stop's ADA requirements, use the ADA Compliance checklist in Appendix E. See Appendix F for examples of bus stops that are and are not ADA compliant.

BOARDING AREA

Beyond the ADA guidelines above, there are additional considerations for the boarding area. The 40′ buses do not have ADA ramps at the back door, but the 25′ cutaway buses do have an ADA lift at the back which requires more space. As a result of each bus's differing needs, a boarding area of 25′ long by 8′ or 10′ wide is strongly recommended, but even longer (as much as 30′ to 40′) is ideal (especially if a tree or utility pole needs to be accommodated for, see Figure 6-4). This not only meets the minimum ADA requirement for the landing pad but allows the cutaway buses to use the lift in the back as well as allowing space for a shelter and amenities. There is a minimum 4′ wide sidewalk required outside of the landing areas. Typical Dimensions are shown in Figures 6-2 through 6-6.

Stops where more than one bus is boarding/alighting riders at the same time will need additional boarding and alighting areas which are determined by the size, placement and number of buses serving the stop.

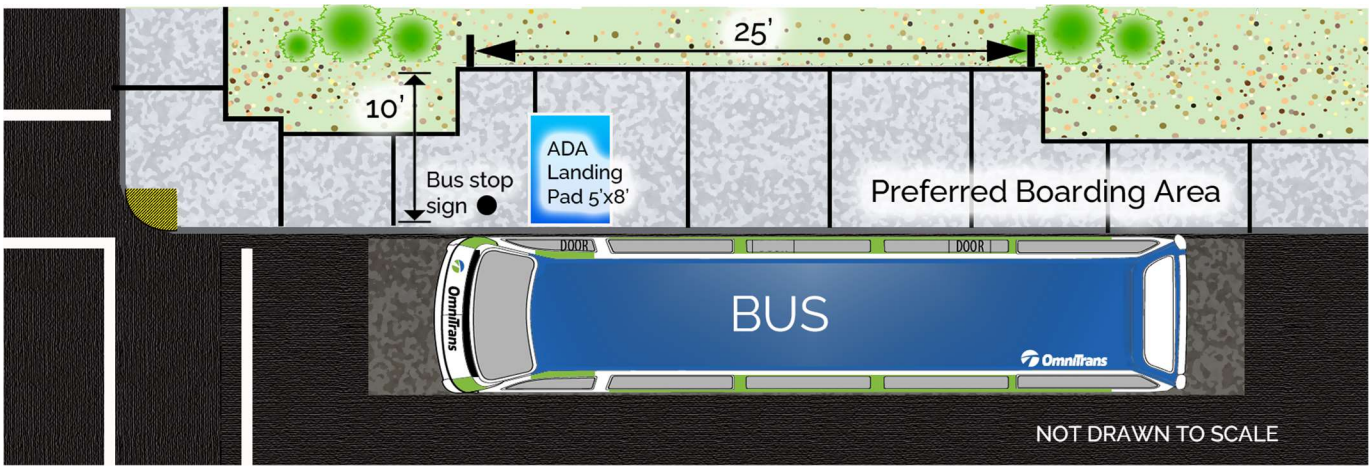

Figure 6-1: Preferred stop dimensions when sidewalk is adjacent to curb.

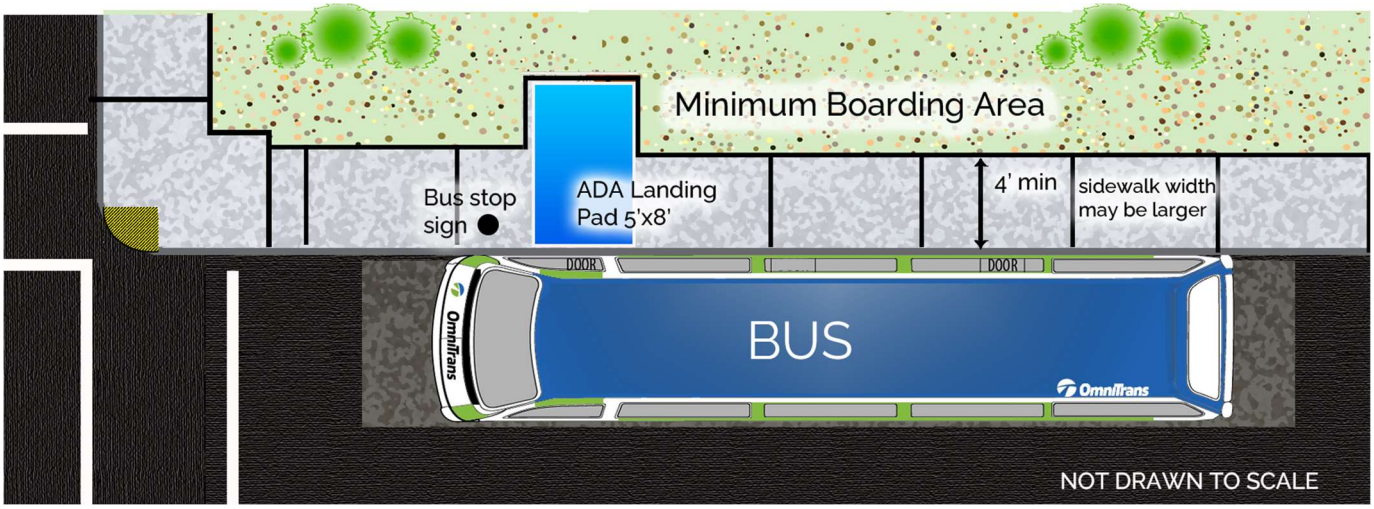

Figure 6-2: Minimum stop dimensions when sidewalk is adjacent to curb.

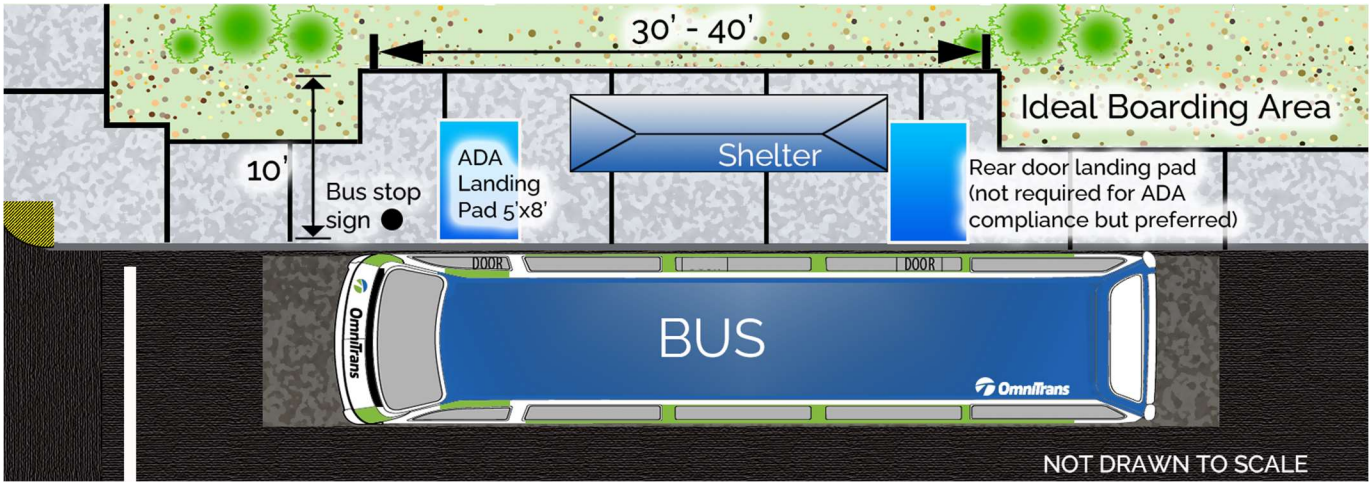

Figure 6-3: Ideal dimensions for boarding area to accommodate rear boarding and amenities.

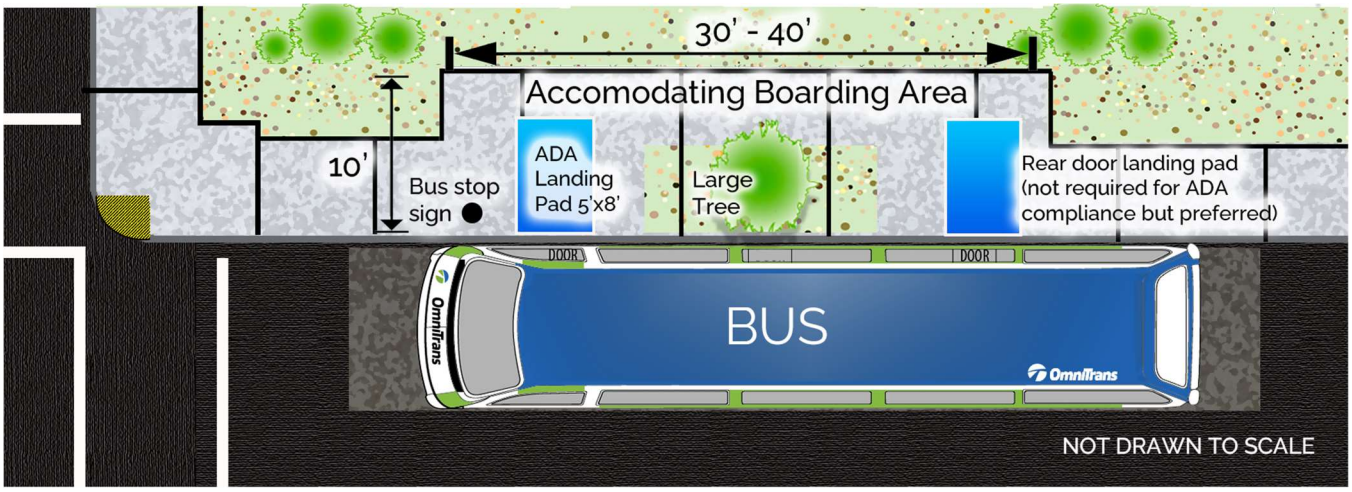

Figure 6-4: Example of accommodating a tree/utility pole while meeting ADA compliance.

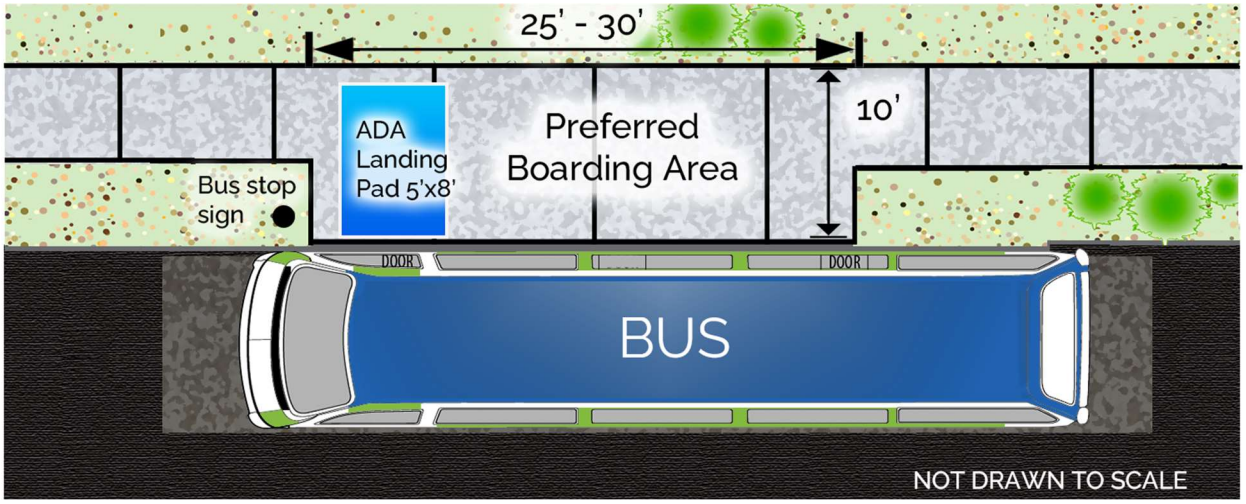

Figure 6-5: Preferred stop dimensions for sidewalk behind parkway strip.

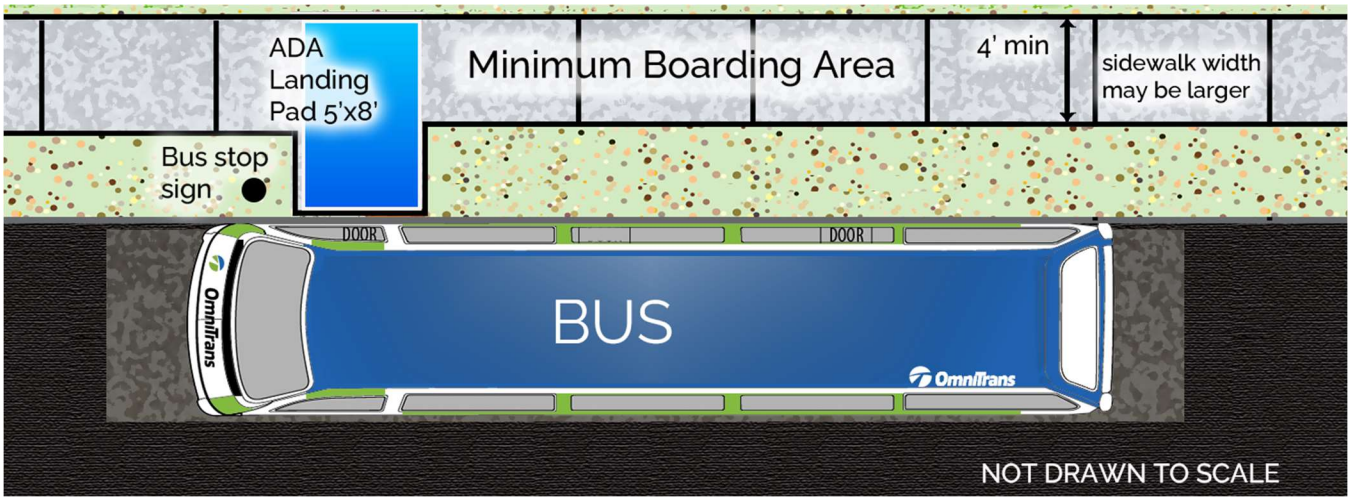

Figure 6-6: Minimum stop dimensions for sidewalk behind parkway strip.

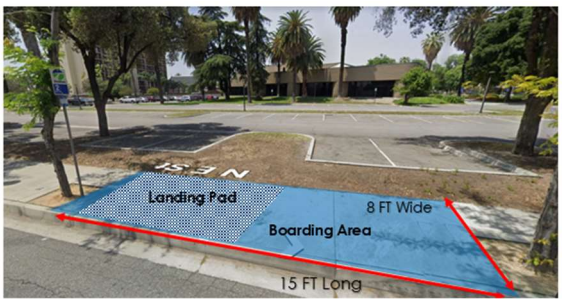
STANDARDS FOR MINIMUM, BASIC, AND PREFERRED BUS STOPS



MINIMUM: Meets all the minimum requirements but no amenities

BASIC: Meets all the requirements and has a bench as a basic amenity.

PREFERRED (Standard): Meets all the requirements and has a standard shelter.

Compliant Bus Stops

MUST MEET ALL OF THE FOLLOWING CRITERIA:

- ✓ **Landing Pad:** Minimum unobstructed 8'x5' area.
- ✓ **Sidewalk Curb Connection:** The curb immediately connects to the boarding area and sidewalk.
- ✓ **Sidewalk Condition:** The boarding area and sidewalk have less than 2% slope and are in good condition.
- ✓ **Path of Travel:** Paved and unobstructed route from the boarding area to an intersection/crosswalk.
- ✓ **Ramps:** Nearby intersections/crosswalks have ramps.

BASIC: Meets all the requirements. The landing pad is at a minimum of 8' x 5' but is not immediately adjacent to the bus stop pole.

PREFERED (Standard): Meets all the requirements. The landing pad is 10' x 5' but is not immediately adjacent to the bus stop pole.

PREMIUM: Meets all the requirements. The landing pad is 10' x 5' and the boarding area is larger than 25' x 10'.

SIGNAGE

In addition to ADA compliance, bus stops require signage. The sign:

- Identifies the location as a designated bus stop.
- Provides a reference for coach operators.
- Provides details for accessing up-to-date route schedule and arrival information.
- Displays general transit information (agency telephone number and website).

Omnitrans is responsible for the removal, relocation and installation of any bus sign but requires proper spacing and other criteria to be met. Coordinate with Omnitrans at BusStops@Omnitrans.org.

- Whenever possible bus stop signs should be placed independently of all other street signs for transit stop clarity.
- The bus stop sign should be located at the front of the boarding area, approximately one foot beyond the landing pad. Placement of the pole shall not impede a 48" ADA path of travel around it.
- The bottom of the sign should be 7' high (ADA compliance requires 80" at minimum) and no higher than 10' (as in Figure 6-7).
- The top of the informational cassette should be mounted no higher than 60" above the ground.
- Bus stop signs should be mounted on square uni-strut posts. See Figure 6-8 for more details.
- Pole should be placed 18" -24" from curb line to prevent obstruction or scratching of bus mirrors.

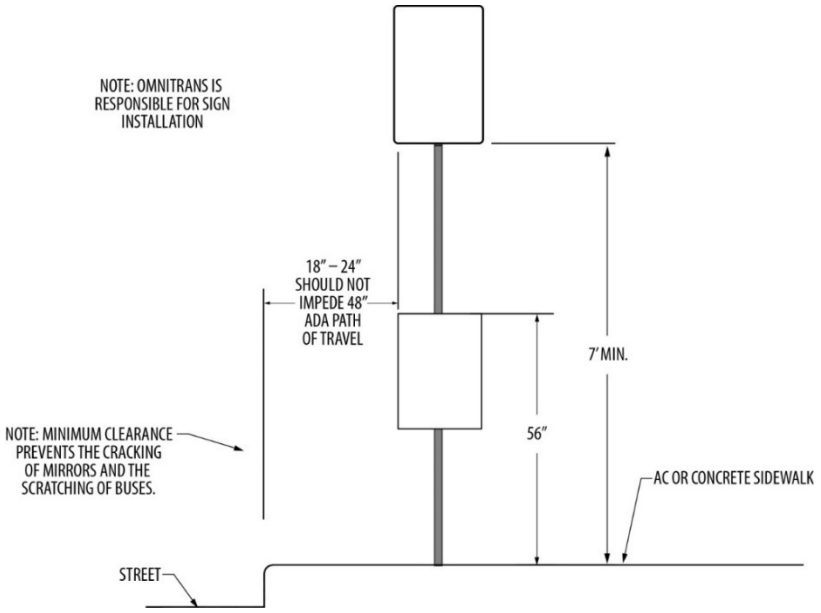


Figure 6-7

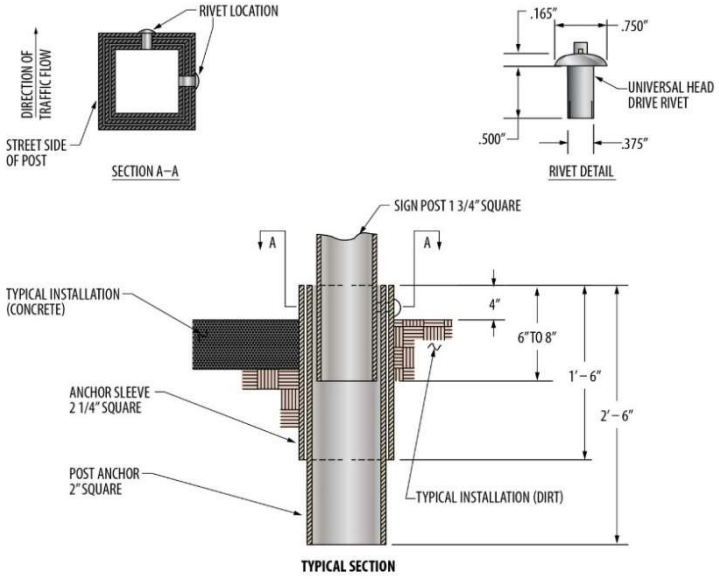

Figure 6-8

LIGHTING

Figure 6-9 – Solar light in Rialto.

Lighting is a foundational component for creating a safe environment. As a part of the community outreach for Omnitrans' Bus Stop Safety Improvement Plan (BSSIP) plan[4], online survey results from 100 participants highlighted that over 62 percent of responses mentioned that lack of lighting was their main concern at bus stops.

Omnitrans has been working to install hundreds of pole-mounted solar lights at bus stops throughout the system. When existing streetlights do not provide adequate lighting, proper lighting ideally from solar lights should be a priority to ensure the safety and security of all transit riders.[8] In addition, bus stops should be visible from nearby buildings, roads, and near crosswalks so passersby can help monitor the bus stop.

The placement and maintenance of lighting is normally the responsibility of the local jurisdiction, except at advertising shelters where the interior lighting is provided and maintained along with the shelter, usually by Omnitrans. The following are considerations and recommendations for developments around a bus stop.

- Where feasible, bus stops should be placed so that they will be illuminated by existing streetlights.
- At bus stops where additional light is needed, solar technology is recommended. Ornamental streetlights may also be used. Particularly for solar units, they should be installed with vandal-resistant hardware and a modular design to allow for independent replacement of solar collector, light bar, light fixtures, etc.
- In addition to street lights, stops can be lit by backlighting from advertising installed at bus shelters. If a shelter is present, both interior and area lighting are recommended.
- Lighting external to a shelter shall use 2–5-foot-candles (ft-c). For lighting within a shelter, a lighting level of 3 ft-c at 3' above ground is required throughout.
- Illumination is to be provided for a period of no less than 6 hours after dusk and 2 hours before dawn.
- All electrical work for street lighting shall follow standard practices, local electrical utility, and local municipalities' traffic engineering requirements.

Figure 6-10 - a standard solar light in Omnitrans' service area.

SECTION 7 – BUS STOP AMENITIES RECOMMENDATIONS

Omnitrans and its JPA members have been striving to provide amenities for customers at all 2,300 bus stops across Omnitrans' service area. Amenities are typically prioritized by the highest-ridership locations. ADA/sidewalk improvements will also need to be constructed at many bus stops (which typically falls under the responsibility of cities/local jurisdictions or property developers) before Omnitrans will be able to install rider amenities such as shelters and seating.

As activity and ridership increase, expanded amenities beyond the required bench or shelter are also warranted. The following best practice policies and design details are aimed to help local jurisdictions on how to create attractive bus stops that are safe and comfortable places to board and alight.

This section explains the various options for amenities, space requirements and other design criteria in placing them at bus stops.

TABLE 7-1: AMENITIES AND SPACE REQUIREMENTS SUMMARY

Amenity	*Space Requirement*
Lean Bar and Trash Receptacle	15′ x 8′ minimum boarding area
6′ Metal Bench & Trash Receptacle	15′ x 8′ minimum boarding area
13′ Non-Advertising Shelter	20′ x 8′ minimum boarding area
17′ Non-Advertising Shelter	25′ x 8′ minimum boarding area
13′ Advertising Shelter	20′ x 10′ minimum boarding area
17′ Advertising Shelter	25′ x 10′ minimum boarding area
Premium Shelter	25′ x 10′ minimum boarding area
BRT Side-Running Station	60′ x 10′-14′ minimum boarding area

AMENITIES

BASIC AMENITIES

BENCHES

Benches are installed inside typical bus shelters, but they may also be installed independently at bus stops that do not have shelters. Local communities may also install benches as one element of an improved streetscape; in this case, efforts should be made to locate benches near bus stops where they do not create barriers to accessible bus boarding or sidewalk usage.

The design factors for benches should include the following (see Figure 7-1 for reference):

- Benches should be placed on a concrete boarding area allowing for wheelchair accessibility and loading at the bus stop.

- Benches should be placed toward the back side of the sidewalk a minimum of 6′ to 9′ from the bus stop signpost, to allow pedestrians to move past people sitting on the bench. If located on the ADA landing pad, the bench should be a minimum of 8′ from curb; if outside ADA landing pad, a minimum of 4′ from curb.
- Benches should be anchored to prevent unauthorized movement, yet ideally be constructed for easy relocation to allow for bus route changes, street improvement projects, etc.
- Benches should have bars or dividers between seats, placed no more than 24″ apart. Seat divider bars should be at least 6″ high and should either be solid, have cross-bars, or have an angled shape.
- Although Omnitrans still uses many existing concrete bus benches throughout its system, new benches should not be concrete because of Crime Prevention Through Environmental Design (CPTED) guidance for transparency; benches should be of durable perforated steel or steel mesh, poly-coated for heat and graffiti-resistance.
- The structure materials and paint treatments should be strong, durable and resistant to weather conditions, graffiti, cutting, defacing, fire, and other forms of vandalism.

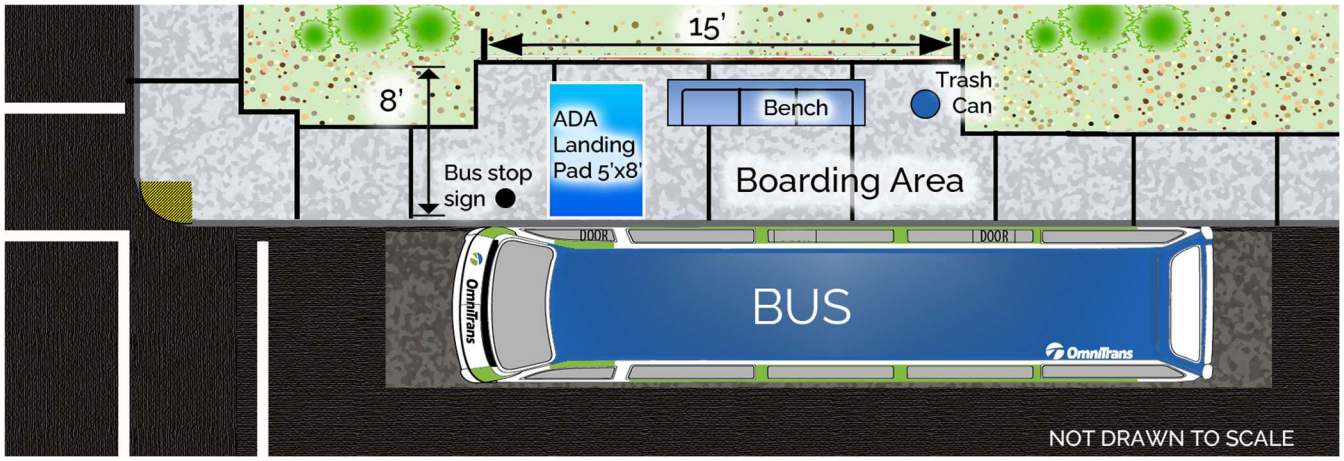

Figure 7-1: Boarding area dimensions for a bench and trash receptacle.

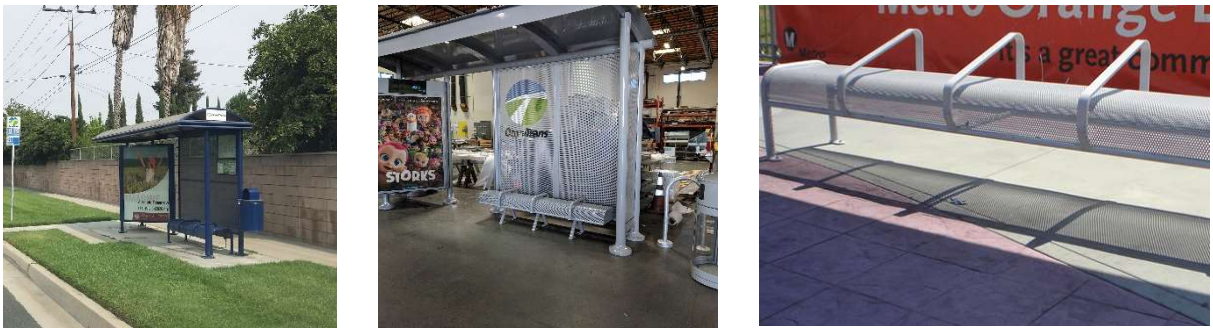

Figure 7-2: Examples of benches at a standard shelter, premium shelter, and a bench with dividers without a shelter.

Developers and local jurisdictions may design a special style of bench or shelter to fit into the landscape and complement the architectural style of their project or streetscape. However, benches and shelters that are provided through the private sector or local jurisdictions are to be maintained by the developer, landowner, or local jurisdiction. Omnitrans requests the opportunity to review the design of benches for any potential safety and security issues.

TRASH RECEPTACLES

Trash receptacles are typically provided at all stops that have shelters and should also be provided at high ridership stops or stops near locations that generate the need for a trash receptacle, such as fast-food restaurants or convenience stores.

Local communities may also install receptacles as part of an improved streetscape; in this case, efforts should be made to locate them where they do not create barriers to accessible bus boarding or sidewalk usage. Trash receptacles are to be serviced by the entity that placed them.

The design factors for trash receptacles should include:

- Made from strong, durable materials and paint that is resistant to weather conditions, fire, graffiti, cutting, defacing, and other forms of vandalism.
- Ensure that there are no conflicts with wheelchair accessibility and loading at the bus stop, locating them outside of curb clear zone or landing pad.
- Trash receptacles should be anchored to prevent unauthorized movement.
- Avoid installing trash receptacles with design features that permit liquids to pool or remain near the receptacle and attract insects or rodents.
- Trash receptacles should be lockable to prevent rummaging.
- Trash receptacles should be of durable perforated metal or metal mesh for transparency and use a semi-transparent inner plastic lining can for easy trash removal and cleanup.
- If possible, install trash receptacles in shaded areas a minimum of 3′ from a bench. When installed in areas that receive direct sunlight most of the day, the heat may cause foul odors to develop.
- Solar compacting trash receptacles are also desirable, as they are more efficient for maintenance.

Omnitrans empties trash receptacles that are placed by Omnitrans, while local jurisdictions and developers are responsible for picking up trash from receptacle placed by them. Developers and local jurisdictions may design a special style of receptacle to fit into the landscape and complement the architectural style of their project or local streetscape.

PREFERRED AMENITIES (Standard and Premium)

SHELTERS

Transit shelters are installed at selected bus stops to provide weather protection as well as seating for waiting customers. Shelters can also be provided by local jurisdictions and may be required of a new development around the stop. Maintenance of shelters is typically done by Omnitrans; however, for certain jurisdictions, maintenance is the responsibility of the jurisdiction or developer.

Design factors for shelters should consider placement, structure, and other considerations:

Shelter Placement

- Locate shelters in reasonable proximity to where the front door of the bus will open to facilitate timely transit rider loading.
- Shelter must be located outside ADA-required 5′ x 8′ landing area.
- Shelters should not be placed such that they block sight distance at intersections or driveways. This can normally be accomplished by placing the shelter more than 25′ from the beginning or end of curb return of an intersection or driveway.
- The back of the shelter should be located at least 12″ from a building face, wall, or other broad vertical surfaces to facilitate trash removal and panel cleaning.
- Shelters should not be placed between a regularly used building exit and the curb so that pedestrians retain direct access to the street from the building.
- Whenever possible, do not place shelters in front of building windows used for commercial purposes (e.g. advertising, display, business names, etc.).
- Shelters should be located to avoid exposing persons to splashing water from passing vehicles and runoff from adjacent buildings and landscaping.
- Shelters should be located so that their orientation provides as much protection as possible from wind and rain, and with consideration of the sun's angles to allow maximum shade during peak use in the morning and afternoon.
- Shelters should not be placed under large shade trees that prohibit the functioning of the shelter's rooftop solar panels.

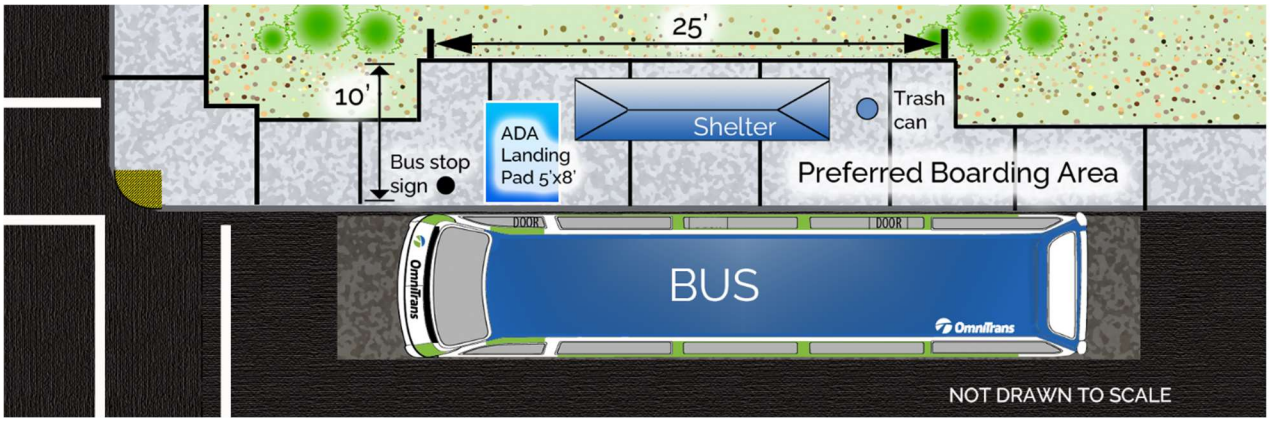

Figure 7-3: Typical Shelter Layout

Shelter Structure

- Minimum dimensions
  - Overhead canopy – 72 square feet (6′ x 9′) but larger canopy is preferred.
  - Vertical clearance – 7.5′ between underside of roof and sidewalk surface.
  - Lateral clearance – 2′ between overhead canopy and curb face is required.
- Required dimensions of the concrete pad landing area to ensure wheelchair accessibility depends on the shelter size. See Table 7-1 and Figures 7-3 to 7-5.
- A minimum space of 30″ x 48″ of clear floor space for people in wheelchairs is required under the shelter per ADA regulations (See Figure 7-4)

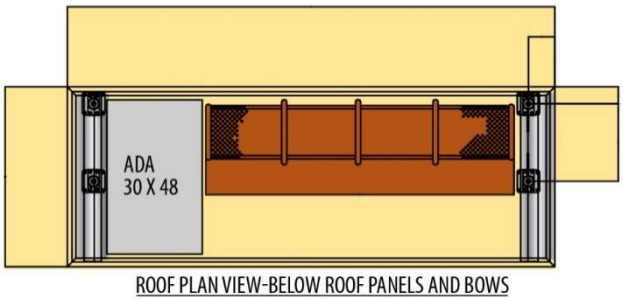

Figure 7-4: Aerial view of bus shelter

- The structure should be built of strong, durable materials and paint that is resistant to weather conditions, fire, graffiti, cutting, defacing, and other forms of vandalism.
- There should be internal lighting for the shelter and external lighting, when possible.
  - Provision of conduit for power and lighting and if possible, accommodations for solar power on the shelter roof.
- Seating for three to four people located under the shelter canopy is desired.
- Shelter screens should keep a minimum 6″ vertical clearance from sidewalk to avoid collection of trash and debris.
- Shelter canopy should be waterproof with provisions for drainage away from waiting riders and boarding area.

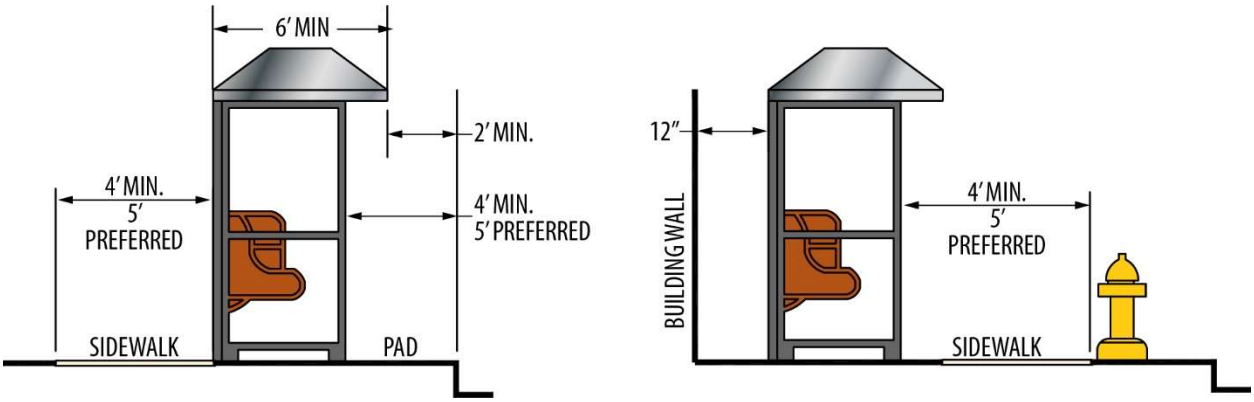

Figure 7-5: Shelter clearance

Other Considerations

- Design should be appropriate to the neighborhood (context sensitive)
- Maintenance of the shelter and other amenities ideally is simple and easy.
- Accessories to be added to the transit shelter and rider boarding area (such as bike racks, water fountains, additional information panels, etc.) are a decision for the individual jurisdiction responsible for the shelter. Each item can be weighed to balance the concerns for greater customer comfort and convenience versus concerns for security, maintenance, and cost.
- Crime Prevention Through Environmental Design (CPTED) guidelines should be considered when planning a shelter layout and materials[9]
    - Natural Surveillance: clear lines of sight where the shelter minimizes hiding places for people and packages. Good lighting and use of transparent yet vandalism-resistant screens allow operators to see riders and discourages criminal activity. Landscaping should be chosen that promotes visibility.
    - Territoriality: establishing recognized authority and control over the environment cultivates purpose and distinguishes the space from public areas. The use of signage, environmental cues (such as pavement markings) can denote the bus area.

Shelter Options

Standard Shelter – Basis of design is Tolar Model 1497-02 (for 17′ shelter) or 1496-02 (for 13′ shelter) or equal – includes shelter, solar lighting, map case, bench, and 32-gallon trash can. Shelter can include ad panel or no ad panel.

Premium Shelter – Basis of design is Tolar Model 31570-00 or equal – includes shelter, solar lighting, map case, bench, 32-gallon metal trash can, and electronic real-time arrival message board. Shelter can include ad panel or no ad panel. The premium shelter also allows for custom artwork on the back screen.

Any of these amenities can be powder coated in the standard colors of blue, green, or silver.

Figure 7-6 (from left to right): 13′ non-ad shelter, 17′ ad shelter, and premium shelter.

CUSTOM AMENITIES

BICYCLE PARKING

Bicycle parking facilities, such as bike racks (Figure 7-7) and storage lockers, may be provided at bus stops by local jurisdictions or adjacent property owners for the convenience of bicyclists using transit. Bicycle parking facilities help to maintain a clear ADA pathway at the bus stop, discourage the practice of locking bicycles onto bus facilities or onto adjacent property, and reduce visual clutter. The guidelines below are for the placement of bicycle parking facilities:

Figure 7-7: Examples of bike racks

- Locate bike rack or lockers at a convenient proximity to the bus stop and in sight of the transit riders, but outside of the clear ADA pathway.
- Coordinate the location of bicycle parking facilities with existing on-site or street lighting.
- Ensure parked bikes are always visible. Do not locate bicycle parking where views are restricted by a bus shelter or landscaping. Design and placement of bicycle parking facilities should complement other transit furniture at bus stop.
- Covered or weather protected parking locations are an important bonus to bicyclists.

When selecting bike racks or locker devices, consider the following:

- Provide ability to lock bicycle frame and at least one wheel.
- Support bicycle without pinching or bending the wheel. If the wheel slot is too narrow, a mountain bike tire will not fit.
- Avoid scratching the paint on the frame of the bike.
- Provide a place to lean the bike while locking the bike.
- Locking procedure should be quick and easy to identify.
- Design of bike rack or locker device should not trap debris.
- Device should be easy to install but difficult to steal.
- Secure bike parking rooms and bike maintenance cooperatives/shops are also ideal at locations with high volumes of transit centers who use bicycles.

LANDSCAPING

Landscaping can enhance the level of customer comfort and attractiveness of transit, but should be positioned and maintained so that safety, security, and accessibility are not compromised.

Tree branches that extend into the roadway below 11′ should be trimmed back at least 2′ from the curb; otherwise, they become an obstacle that the bus driver may or may not be able to avoid hitting. The area between the sidewalk and the curb at bus boarding areas should not be planted for at least 5′ parallel to the street and 8′ perpendicular to the street to provide accessibility (ADA landing area).

Trees for shade and lightning arrestors should not be placed within the clear curb area, and centerline 2-1/2′ of back of curb line. Trees may be placed immediately outside of clear curb area, or back of sidewalk. A bus bulbout or nub may be installed to accommodate the tree line and still give proper ADA landing pad and clear curb space.

All landscaping design should adhere to Crime Prevention through Environmental Design guidelines[8].

Omnitrans does not maintain landscaping except for landscaping installed by Omnitrans located immediately on sbX bus rapid transit platforms or in transit centers maintained by Omnitrans. All other landscaping is maintained by cities/local jurisdictions or adjacent private property owners.

BUS STOP MAINTENANCE

Omnitrans maintains bus stop amenities installed by Omnitrans, including bus stop signage, pole-mounted lights, Omnitrans standard shelter models, customer information, benches, and trash cans. Custom bus stop amenities installed by cities or private property owners must be maintained by the cities or private property owners.

Well-maintained bus stops are crucial to the image of the transit system. Damaged street furniture and trash build-up should be tended to immediately to create a positive impression for transit patrons and the public. Maintenance frequency of not less than once per week (except as noted) should include:

- Full wash-down of shelter and accessories at least once a month, or more often as needed.
- Removal of all dirt, graffiti, chewing gum and pasted material.
- Wipe-down of glass surfaces.
- Removal and replacement of trash bags once a week. Should be performed more than once a week if trash accumulates frequently.
- Litter pick up around stop or shelter/accessories to a distance of 15′.
- Manual or chemical removal of weeds.
- Pruning of obstructing foliage.
- Insect control as needed.
- Touch up of marred paint.
- Verify shelter lighting levels and replace bad bulbs and ballasts.

Repair of items that pose a safety or security problem should be performed as soon as possible.

ADOPT A BUS STOP

The development of bus stop amenities can be a community process through Omnitrans' Adopt-A-Stop program. Through the program, local businesses, non-profit organizations, community groups, families and individuals can select a stop to care for. Businesses and organizations can make a financial contribution to purchase amenities or sponsor cleaning services, while groups, families and individuals can volunteer to pick up trash at their stop once a week. A one-year commitment is required. Partners of the Adopt-a-Stop program will receive recognition on signs at their selected bus stop or through social media posts.

For more information about community partnerships and events, visit Omnitrans.org/news/adopt-a-stop/ or contact the Adopt-A-Stop coordinator at AdoptAStop@omnitrans.org or 909-379-7256.

PLACEMAKING AND SPACE ACTIVATION

Figure 7-8: Placemaking examples

Right: Parklet example along VIA Metropolitan transit line (San Antonio, TX). **Below**: Go Human project from Southern CA Association of Governments (SCAG).

Placemaking to increase personal safety and quality of life at bus stops is the idea of integrating the bus stop into an attractive destination for people to meet and socialize while patronizing adjacent centers of activity and be part of a person's full day's journey - instead of just a bench and a ride to start your day's activities. The bus stop can become a positive focal point for a street or small neighborhood. There is potential for secondary effects like improved economic activity near the bus stop that increases the overall sense of safety and security for everyone.

A major aspect of placemaking is partnering with the surrounding community to help identify positive features and activities in a small area that are being considered for a bus stop. The process starts with community coordination to find positive existing assets near a bus stop to build upon and make an overall positive experience for the bus rider. Walkability, safe connected sidewalks, wayfinding signage, an events calendar, or suggestions of things to do near the bus stop all contribute to placemaking and attracting people to use transit.

Place-building activities near a bus stop typically include small parks, coffee shops, restaurants, entertainment centers, a blank wall that gets a locally developed mural or sculpture, and local efforts to paint or wrap city-owned utility boxes with art as shown in the samples below.

Programs such as utility box art and mural programs in several Omnitrans member cities can increase a local community's sense of ownership of the streetscape and bus stop. Adopt-a-stop and adopt-a-litter-container programs can also help neighbors build a sense of place around a bus stop and reduce fear of crime at a bus stop. Special events, such as Omnitrans' pop-up outreach on its ConnecTransit Plan where artists and residents painted bus benches with artistic designs, can build ownership and integrate the community in placemaking.

For more ideas and best practices, see Omnitrans' Transit-Oriented Development document[5] and Omnitrans' Bus Stop Safety Improvement Plan (BSSIP) plan[4], which were generated by analyzing policies, goals, objectives and best practices from the cities and communities in the project, as well as regional jurisdictions and discussions with other agencies. The intent of these documents is to provide Omnitrans and local jurisdictions opportunities to collaborate and improve safety at and around bus stops while accessing bus stops and transit centers through active transportation.

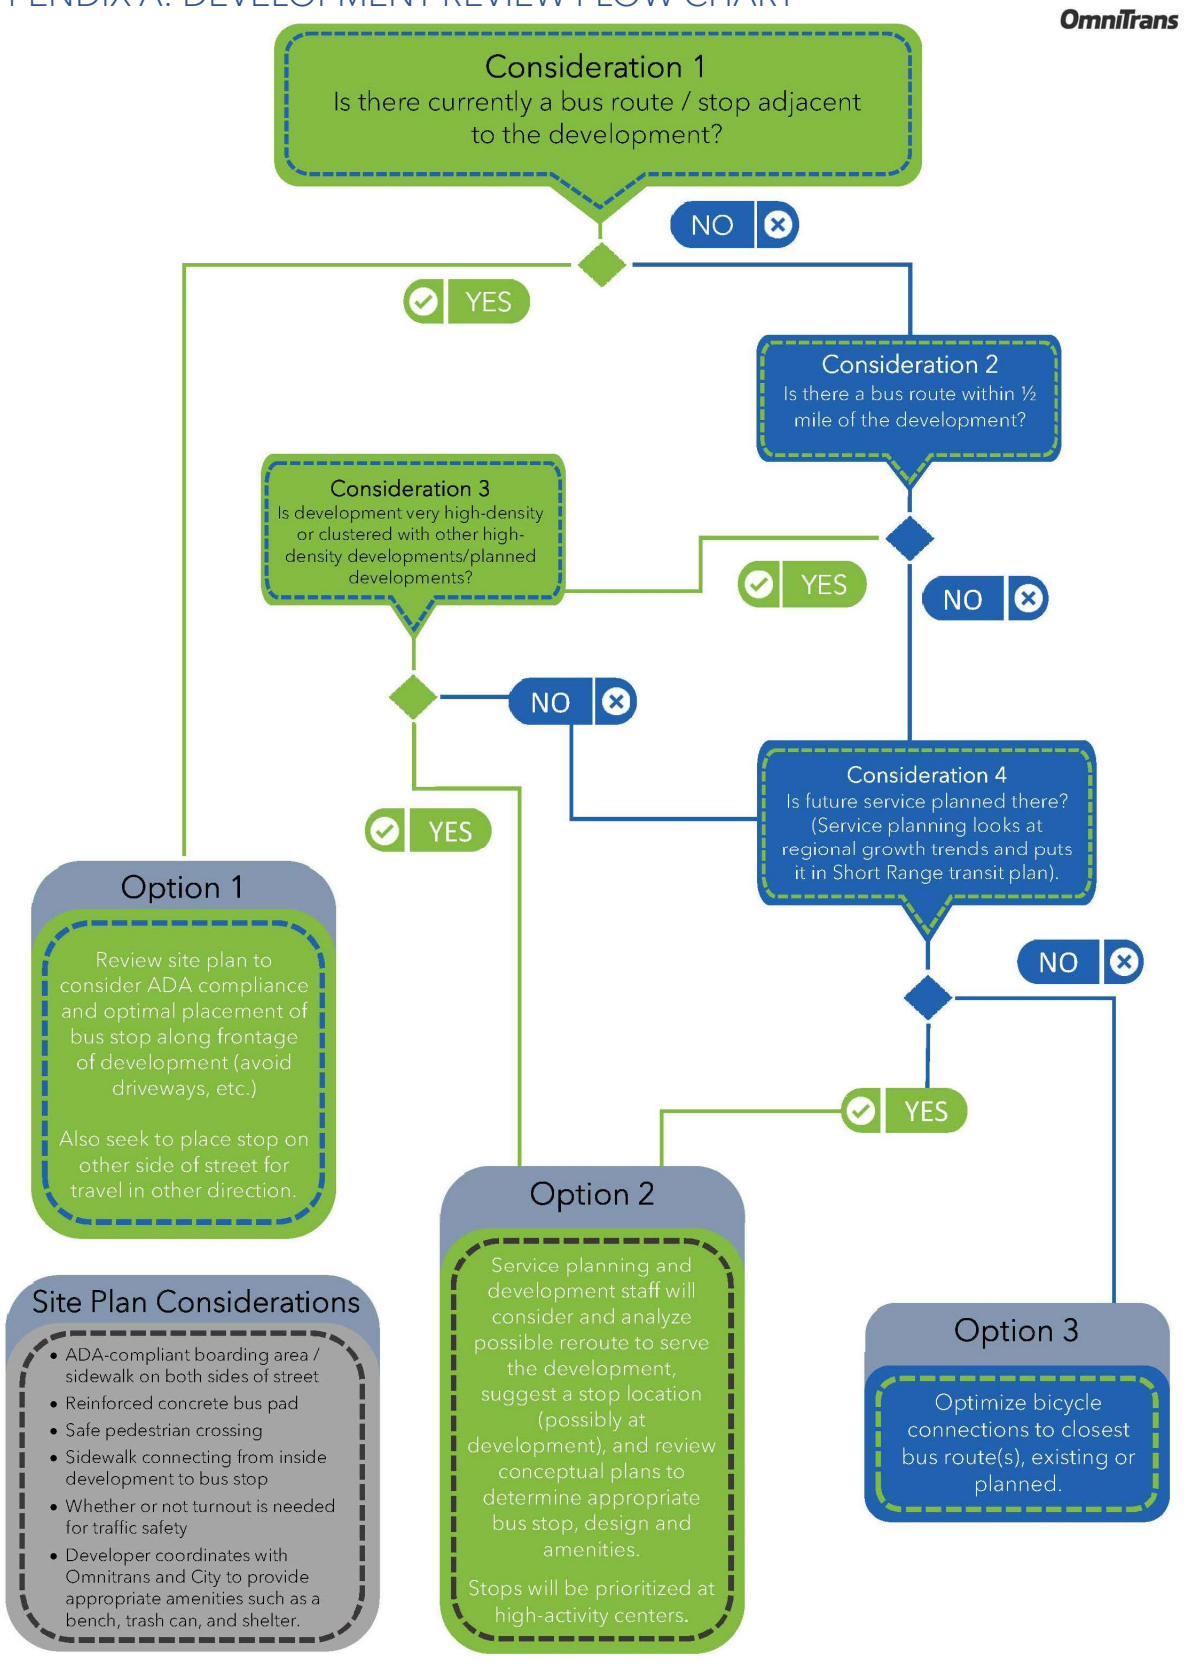
Figure 7-9: Other placemaking examples

Top left: Local mural **Top Right**: Painted utility box. **Bottom Right**: A local resident helps paint bus benches for an Omnitrans event.

Bottom Left: A local artist displays her unique art design for a bus bench as part of Omnitrans' ConnecTransit pop-up outreach event.

APPENDICES

APPENDIX A: DEVELOPMENT REVIEW FLOW CHART



©TemplateLab.com

APPENDIX B: COMMUNITY PLANNING AND PROJECT DEVELOPMENT

When a local jurisdiction (city or county) begins the process of creating or updating a general plan, specific plan, or roadway project, or to review a development proposal, there is an opportunity to incorporate transit into the planning process. For examples and more information, see Omnitrans' document on Transit-Oriented Development[5].

Omnitrans shall be provided the opportunity to review and respond to all proposed plan changes before and during the public review process. Any amendments to these plans that will have a direct impact on the location of stops should be forwarded to Omnitrans for review and comment. For new developments being planned, adjacent bus stops should be improved with ADA-compliant sidewalk boarding area, concrete bus pad in the pavement, and preferably amenities such as bench, trash can, or shelter.

Omnitrans will use the Development Review Flow chart in considering changes to bus stops as well as standards and recommendations in the Transit Design Guidelines.

Communications should include the name of the contact person at the jurisdiction, and the name and contact information of the developer. Omnitrans will review the plans and consult with the jurisdiction or others as necessary to properly comment on the plans. Omnitrans will provide written comments on the plans to the jurisdiction. Revised plans should be returned to Omnitrans along with prior comments for subsequent reviews.

Meeting invitations, notices, scoping letters, and copies of plans should be sent to:

Planning@Omnitrans.org

Or mailed to:

Strategic Development Department, Omnitrans
1700 W. Fifth St.
San Bernardino, CA 92411

It is recommended to include a transit element in community general plans, with information such as proposed bus routes, transit centers, and planned BRT corridors. Some cities also require property developers to construct and maintain bus turnouts or shelters in conjunction with private development.

Development and roadway improvement plans received by jurisdictions will be evaluated for potential impacts on current or future transit operations using the following criteria. Plans which meet one or more of the following criteria should be sent to Omnitrans for review:

- Identified transit streets in General or Specific Plans
- Existing streets with transit routes
- Major streets
- Projects that affect streets serving high density residential, commercial, industrial areas or educational or medical institutions

- Streets that would logically connect existing or planned transit routes or connecting areas which have or are planned to have transit service
- Any other project that in the jurisdiction's opinion should be assessed for current or future transit needs.

The following is a checklist that can be used to review development plans (see also Development Review Flow Chart), to ensure that the design is conducive to transit access:

- Any adjacent bus stops in a development must include an ADA-compliant sidewalk boarding area, a concrete bus pad in the pavement is recommended, and preferably amenities such as bench, trash can, or shelter will added after such improvements.
- Pedestrian routes to bus stops should be designed to meet the needs of all users (including those with disabilities, elderly, and children).
- The pedestrian system should provide convenient connections between destinations including residential areas, schools, shopping centers, public services and institutions, recreation, and transit.
- Provide a dedicated sidewalk and/or bike paths through new development that are safe and direct to the nearest bus stop or transit center.
- Minimize the distance between buildings and the bus stop through proximity and orientation. This can be encouraged by including transit accessibility concerns in zoning policies, setback guidelines, building orientation guidelines, and parking requirements to encourage transit-oriented development.
- Buildings should be located with entrances from sidewalks, wherever possible.
- Minimize the use of elements that restrict pedestrian movement such as meandering sidewalks, walled communities, and expansive parking lots.
- Pathways should be designed so pedestrians traverse a straight, direct path wherever possible.
- Eliminate barriers to pedestrian activity. This includes sound walls, landscaping, berms, or fences which impede pedestrian access or visibility. If there is restricted access, gates should be installed at access points.
- Pave pedestrian pathways and ensure they are accessible to everyone. Provide accessible circulation routes that include curb cuts, ramps, visual guides, signage (visual and Braille) and railings where needed. Place ADA compliant curb ramps at each corner of intersections.
- Adequate drainage should be provided to avoid pooling and muddy conditions.
- Provide street lighting along bus stop access routes and safety lighting at intersections to promote safety and security for transit patrons. Ideally bus stops should be illuminated by nearby street lighting, if not; consider installation of solar lighting at the bus stop.

For more information and ways to incorporate transit into development, please see Omnitrans' Transit-Oriented Development document[5].

APPENDIX C: CONSTRUCTION IMPACTS

Public Works and private development construction activities often impact bus operations and bus stops. The following information attempts to reduce construction conflicts, provide information for the contractor, and guide local jurisdiction staff coordinating both design and construction work with the private development community. Omnitrans considers construction coordination a local function but is available to provide assistance if requested. Omnitrans will participate in any decisions on construction that requires temporary stop closures, relocations, or route disruptions.

Construction coordination information should be directed to:

Detours@Omnitrans.org

Construction impacts caused by private development or public projects can be minimized through conditions of approval applied to the development, such as the following two examples:

> *Provide the public transportation agency, Omnitrans, a written notification five (5) days prior to any construction that will impede a nearby bus stop or service.*
>
> *Provide written notification to Omnitrans five (5) day prior to any road closures and/or construction detours that will impact a bus stop or service as a result of this project.*

Plans and specifications usually contain language requiring contractors to maintain pedestrian access and signage, etc. Notes on the construction plans provide instructions to contractors and construction inspectors.

Typical standard plans and specifications may include the following notes:

> *A minimum four (4) feet wide walkway shall be provided to maintain rider access to and from bus stops during construction.*
>
> *Temporary access to bus stop zones during construction shall be approved by Omnitrans in advance of construction activities.*
>
> *The contractor shall notify Omnitrans at least 5 workdays in advance for all street closures affecting transit operations regardless of the duration of the closure. This will allow Omnitrans sufficient time to plan detours and notify the general public.*
>
> *The contractor shall work with Omnitrans to establish an approved temporary bus stop location.*
>
> *Omnitrans will provide and post the appropriate temporary bus sign signage.*
>
> *The contractor shall notify Omnitrans at least 5 days in advance of construction completion so that permanent bus stop signs can be re-installed by Omnitrans.*

Recommended construction plan notes include:

- *Contact Omnitrans at BusStops@Omnitrans.org for coordination and review requirements.*

- *Contractor may not remove any bus stop signs without prior authorization from Omnitrans.*
- *All work shall conform to the requirements of the Americans with Disabilities Act (ADA) including provisions for temporary access to and from bus stops.*
- *Temporary access to bus stop zones during construction shall be approved by Omnitrans at least 5 days in advance of construction activities.*
- *The contractor is responsible for all costs incurred for loss or damage to bus stop signs, hardware, and street furniture. Project acceptance will be delayed at the request of the local jurisdiction for any damaged street furniture or non-payment of costs.*
- *Temporary removal of street furniture to avoid damage and conflict during construction requires a 30-day advance notice to both the city and the owner of the street furniture.*
- *The contractor is responsible for construction of the rider boarding pad on which street furniture will be placed. The pad must be designed and located in conformance with local jurisdiction standard details. Any necessary deviations from standard details require the written approval of the local jurisdiction.*
- *The contractor shall receive approval from the local jurisdiction for the location of street furniture placement prior to construction of the rider boarding area.*
- *Prior to final acceptance or release of certificate of occupancy, the local jurisdiction must be notified to inspect and approve all bus stop related improvements.*
- *A minimum of 48 hours advance notice to local jurisdiction and Omnitrans for final inspections is required.*

In addition, the construction plans need to show existing and proposed bus stop locations. The following special provisions may be included in the permitting process, the inspection process, pre-construction conferences, or wherever it is most appropriate:

> *Contractor shall provide Omnitrans with the name and telephone number of the contractor's construction manager prior to the commencement of all construction projects involving bus stops or bus route detours.*
>
> *Contractors shall make every effort to schedule their work to minimize impacts and the duration of impacts to transit operations and the general public.*
>
> *The contractor is responsible for the construction of the rider boarding area.*

A representative of Omnitrans should be invited to the project's pre-construction conference.

APPENDIX D: BUS STOP PLACEMENT COMPARISON

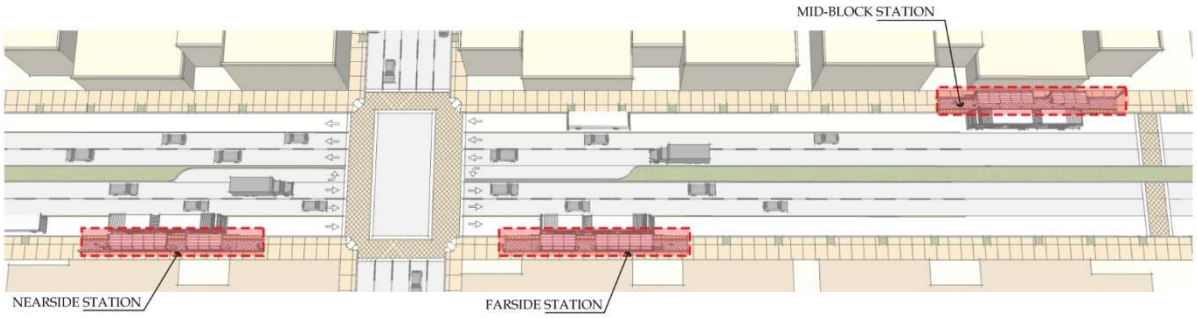


Figure D: Three types of bus stop placements

BUS STOP LOCATION COMPARISON

Bus Stop Location	*Advantages*	*Disadvantages*	*Recommended when these location conditions exist.*
Near side Located immediately before an intersection	• Less potential conflict with traffic turning onto the bus route street from a side street. • The bus boarding door is close to the crosswalk. • Bus has intersection to merge into traffic. • Bus driver can see oncoming buses with transferring riders.	• Potential conflicts with right turning traffic due to cars cutting in front of the bus. • The stopped bus obscures the sight distance of drivers and pedestrians entering from the right. • The stopped bus may block visibility of the stop signs or traffic signals. • At signalized intersections, may result in schedule delays.	• When traffic is heavier on the farside than on the approaching side of the intersection. • When pedestrian access and existing landing area conditions on the nearside are better than on the farside. • When street crossings and other pedestrian movements are safer when the bus stops on the nearside than the farside. • When the bus route goes straight through the intersection. • When adequate sight distance can be achieved at the intersection.
Far side Located immediately after an intersection	• Does not conflict with vehicles turning right. • Appropriate after the route has made a turn.	• The stopped bus obscures the sight distance to the right of drivers entering from the cross street to the right of the bus.	• When traffic is heavier on the nearside than on the farside of the intersection. • At intersections where heavy left or right turns occur.

	• The stopped bus does not obscure sight distance to the left for vehicles entering or crossing from the side street. • At signalized intersections, buses can more easily re-enter traffic. • The stopped bus does not obscure traffic control devices or pedestrian movements at the intersection.	• If the bus stopping area is of inadequate length, the rear of the stopped bus will block the cross street (especially an issue for stops where more than one bus may be stopped at a time). • If the bus stops in the travel lane, it may result in queued traffic behind it blocking the intersection.	• When pedestrian access and existing landing area conditions on the farside are better than on the nearside. • At intersections where traffic conditions and signal patterns may cause delays. • At intersections with transit signal priority treatments.
Mid-Block Located 300′ or more beyond or before an intersection	• The stopped bus does not obstruct sight distances at an intersection. • May be closer to major activity centers than the nearest intersection. • Less conflicts between waiting and walking pedestrians.	• Often, there is no safe crosswalk available mid-block. • May increase customer walking distances if the trip generator is close to an intersection. • Length of mid-block stops can vary due to depth of a turn-out and a bus' ability to maneuver in/out of traffic lanes. • Requires most curb clearance of the three options (unless a mid-block sidewalk extension or bus nub is built).	• When there is a safe, well-marked crossing or signalized crossing (such as a High Intensity Activated CrossWalK HAWK signal) adjacent to the stop.

APPENDIX E: ADA COMPLIANCE CHECKLIST

ADA Compliance & Required Bus Stop Checklist

Question	Response	
Is the ADA landing pad 8 ft wide x 5 ft long? The ADA boarding area refers to the immediate paved landing pad. It should be unobstructed with a min of 8 ft x 5 ft.	Yes	No
Is the curb connected to the sidewalk? - Flat paved boarding area must connect the curb to the sidewalk. - If there is dirt, gravel, grass, or landscape between the sidewalk and curb it is not ADA compliant.	Yes	No
Does it look flat? If it has 2 in. cracks, is uneven, and has more than a 2% slope it is a no.	Yes	No
Does it have a curb ramp at the nearest intersection (with a sidewalk connecting from bus stop intersection)?	Yes	No
Is the bus stop ADA compliant? Yes, if the above listed are **ALL** yes No if **ONE** of the below listed is a no	Compliant	Not Compliant
What is the length of the paved boarding area immediately at the bus stop? (This boarding area refers to the entire paved area that has the landing pad, bus pole, and bus stop amenities.)		LENGTH (in ft):
How wide is the boarding area immediately at the bus stop? **Minimum for ADA landing pad: 8 ft Preferred: 10 ft**		WIDTH (in ft)
What is the material of the boarding area? Concrete; Dirt/Gravel; Grass; Tile; Asphalt; Plant Landscape; Other		MATERIAL:
Does the bus stop have a sidewalk?	Yes	No
What is the width of the sidewalk (besides the boarding area)? **Minimum: 4 ft Preferred: 5 ft or more**		WIDTH (in ft)

What is the condition of the sidewalk? • No sidewalk – The bus stop has no sidewalks • Poor- Big cracks (> 2in), very uneven, damaged, potholes, tree damage. • Fair – Small cracks, weeds, slightly uneven. • Good- Not new but has no cracks, even slope, and in good condition • Excellent- Perfect Condition. No cracks. Even slope.		
General Comment (any other things to note about the bus stop):		

APPENDIX F: GALLERY OF ADA COMPLIANCE AND NON-COMPLIANCE

Noncompliant Bus Stops

A bus stop is much more than an identifying pole. A bus stop area can lack a safe, clear, and stable connection to a sidewalk. Bus stops lacking full ADA compliance are difficult for customers to access and do not meet the minimum requirements. Here are some instances of bad design/missing elements:

Landing Pad: No landing pad or if is less than 4 ft wide or 2 ft long (grass, dirt, gravel, or plant landscape is not considered a landing pad)

NO Curb Connection to Sidewalk

NO Sidewalk

NO Path of Travel

NO Ramps

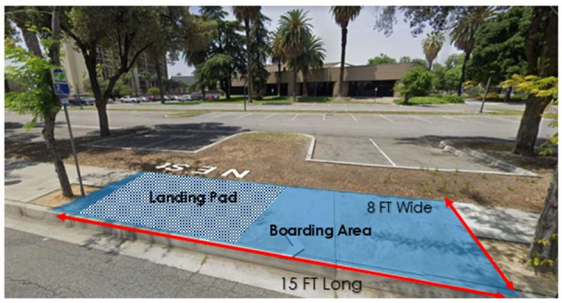
No curb connection to the sidewalk. No clear path to ramps or intersections. There are no sidewalks.

There is no landing pad or boarding area. No access to ramps, intersections, or sidewalks.

There is no landing pad or boarding area. No curb connection to the sidewalk.

Landing pad is less than 3 ft wide.

The landing pad does not adhere to ADA standards. Additionally, the bench partly obstructs it. The path of travel is narrow and cramped, and the sidewalk is not very accommodating.



MINIMUM: Meets all the minimum requirements but no amenities

BASIC: Meets all the requirements and has a bench as a basic amenity.

PREFERRED (Standard): Meets all the requirements and has a standard shelter.

Compliant Bus Stops

MUST MEET ALL OF THE FOLLOWING CRITERIA:

- ✓ **Landing Pad:** Minimum unobstructed 8'x5' area.
- ✓ **Sidewalk Curb Connection:** The curb immediately connects to the boarding area and sidewalk.
- ✓ **Sidewalk Condition:** The boarding area and sidewalk have less than 2% slope and are in good condition.
- ✓ **Path of Travel:** Paved and unobstructed route from the boarding area to an intersection/crosswalk.
- ✓ **Ramps:** Nearby intersections/crosswalks have ramps.

BASIC: Meets all the requirements. The landing pad is at a minimum of 8' x 5' but is not immediately adjacent to the bus stop pole.

PREFERED (Standard): Meets all the requirements. The landing pad is 10' x 5' but is not immediately adjacent to the bus stop pole.

PREMIUM: Meets all the requirements. The landing pad is 10' x 5' and the boarding area is larger than 25' x 10'.

Greetings,

A records check of the Tribal Historic Preservation Office's cultural registry revealed that this
project is not located within the Tribe's Traditional Use Area. Therefore, we defer to the other
tribes in the area. This letter shall conclude our consultation efforts.

Thank you,

Dear: Thomas Grahn
Senior Planner

SUBJECT: Ontario Regional Sports Complex Subsequent Environmental Impact Report

Thank you for the opportunity to offer input concerning the development of the above-identified project. We appreciate your sensitivity to the cultural resources that may be impacted by your project and the importance of these cultural resources to the Native American peoples that have occupied the land surrounding the area of your project for thousands of years. Unfortunately, increased development and lack of sensitivity to cultural resources have resulted in many significant cultural resources being destroyed or substantially altered and impacted. Your invitation to consult on this project is greatly appreciated.

At this time, we are unaware of specific cultural resources that may be affected by the proposed project, however, in the event, you should discover any cultural resources during the development of this project please contact our office immediately for further evaluation.

Very truly yours,

Geramy Martin

Geramy Martin, Tribal Secretary
Augustine Band of Cahuilla Indians

Subject: Meeting question

Good Afternoon

My name is Yeni Hernandez a resident of Ontario for the last 13years.

My question is as followed:
-Is this sport complex also including softball fields?

Everything, I've so far read about this new sport complex is focus on soccer and baseball fields.

If you have any information on how softball fields will be part of this new amazing Ontario complex, will appreciate if you forward to my email.
yhernandez531@yahoo.com

Looking forward to attending this meeting.

Thank you

Yeni Hernandez

Subject: FW: City of Ontario – Notice of Upcoming Scoping Meeting

Good morning, Thomas.

This recent notice for the upcoming scoping meeting for the Ontario Regional Sports Complex spurred a thought. I realize that this idea may be too late in the planning and development process for the complex, although it would be a great and forward-thinking addition. Maybe it could be incorporated into future planning.

As an Ontario resident for the past 50 years and a city employee for 24 years, I'm excited and proud to see the upcoming development in my community, the recreation amenities that are being planned and proposed are clearly well thought out diversified. They are going to pay huge dividends for our community as well as my own family.

Not sure if you are familiar with "Pump Tracks" , but recently I went to one in San Diego with my 18-year-old son and what a fun experience it was. There were 60-year-olds on skateboards, 6-year-olds on scooters, teenagers on bikes. There were kids, moms, dads, grandpas. It clearly transcended ages and generations. Everyone was respectful, supportive of each other, following the rules, and having a great time.

Not to be critical, but the Sports Complex includes a "skate park", which is great and a bit overdue. But why not include something that is on the cutting edge of recreation? Something that only more progressive cities have. Something that is going to attract people to Ontario. Something that sets us apart. Something that Upland, Chino, Chino Hills, Rancho, Eastvale don't have? They all have "skate parks". Ontario should have something a little more, a little better.

Just a thought from a long-time resident. If this idea should be redirected to someone more appropriate, please let me know.

I attached an informational link. https://pumptrack.com/.

Thanks for your time and consideration.

Hello Thomas,
In this sport complex does this include a facility for our recreation team, Ontario Fastpitch Softball Association?

I see the plans but it does not mention our girls league.

Thank you
Faviola

Hello Thomas

Thank you for contacting the Yuhaaviatam of San Manuel Nation (formerly known as the San Manuel Band of Mission Indians) regarding the above-referenced project. YSMN appreciates the opportunity to review the project documentation, which was received by the Cultural Resources Management Department on September 19th, 2023. The proposed project is located outside of Serrano ancestral territory and, as such, YSMN will not be requesting to receive consulting party status with the lead agency or to participate in the scoping, development, or review of documents created pursuant to legal and regulatory mandates.

Respectfully,
Jamie Nord
Tribal Archaeologist

Re: CEQA and Land Use Notice Request for Ontario Regional Sports Complex (File No. PGPA23-002 & PZC23-004, SCH No. 2006111009)

Dear Ms. Mautz and Mr. Grahn,

I am writing on behalf of Supporters Alliance for Environmental Responsibility ("SAFER") regarding the Ontario Regional Sports Complex (File No. PGPA23-002 & PZC23-004, SCH No. 2006111009), which proposes the development of a 16-acre sports entertainment area with a semi professional baseball stadium, supported by ancillary retail buildings (135,000 square feet), a 100-room hotel (70,000 square feet), a 4-level parking structure for 1600 vehicles, 13 lighted soccer fields, 8 multi-use lighted baseball/softball fields, a 159,450-square-foot indoor athletic facility, 45,000 square feet of retail with a 14.25-acre surface parking area to accommodate 1,500 surface parking spaces, a 70,000-square-foot, state-of-the-art community center, and a 13,000-square-foot aquatics facility on an approximately 190-acre site in the City of Ontario ("Project").

We hereby request that the City of Ontario ("City") send by electronic mail, if possible, or U.S. Mail to our firm at the address below notice of any and all actions or hearings related to activities undertaken, authorized, approved, permitted, licensed, or certified by the City and any of its subdivisions, and/or supported, in whole or in part, through contracts, grants, subsidies, loans or other forms of assistance from the City, including, but not limited to the following:

- Notice of any public hearing in connection with the Project as required by California Planning and Zoning Law pursuant to Government Code Section 65091.
- Any and all notices prepared for the Project pursuant to the California Environmental Quality Act ("CEQA"), including, but not limited to:
    - Notices of any public hearing held pursuant to CEQA.
    - Notices of determination that an Environmental Impact Report ("EIR") is required for the Project, prepared pursuant to Public Resources Code Section 21080.4.
    - Notices of any scoping meeting held pursuant to Public Resources Code Section 21083.9.

- Notices of preparation of an EIR or a negative declaration for the Project, prepared pursuant to Public Resources Code Section 21092.
- Notices of availability of an EIR or a negative declaration for the Project, prepared pursuant to Public Resources Code Section 21152 and Section 15087 of Title 14 of the California Code of Regulations.
- Notices of approval and/or determination to carry out the Project, prepared pursuant to Public Resources Code Section 21152 or any other provision of law.
- Notices of any addenda prepared to a previously certified or approved EIR.
- Notices of approval or certification of any EIR or negative declaration, prepared pursuant to Public Resources Code Section 21152 or any other provision of law.
- Notices of determination that the Project is exempt from CEQA, prepared pursuant to Public Resources Code section 21152 or any other provision of law.
- Notice of any Final EIR prepared pursuant to CEQA.
- Notice of determination, prepared pursuant to Public Resources Code Section 21108 or Section 21152.

Please note that we are requesting notices of CEQA actions and notices of any public hearings to be held under any provision of Title 7 of the California Government Code governing California Planning and Zoning Law. **This request is filed pursuant to Public Resources Code Sections 21092.2 and 21167(f), and Government Code Section 65092**, which requires agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency's governing body.

Please send notice by electronic mail, if possible, or U.S. Mail to:

FROM THE DESK OF

Thomas L. Muñoz

October 5, 2023

Thomas Grahn
Senior Planner
303 East B Street
Ontario, Calif. 91764

Dear Mr. Grahn,

Thank you for the informative discussion we had on Sept. 27th at the "Scoping" meeting. You are a high quality individual, and I am glad you are the city's senior planner. I respect your experience of over 30 years.

I am submitting this letter in regards to the Ontario Regional Sports Complex project. I grew up in Anaheim, played competitive baseball, and I had free Dodger baseball on Channel 11, and the California Angels on Channel 5, as well as free Game of the Week on Channel 4. I learned a great deal from watching these sports events. Sports was a big part of my life and I think this project under consideration is a great undertaking, serving the youth of our city well.

I do have some concerns, however. The city council re-zoned many acres of land east of the Edenglen and Creekside East communities, literally clearing the way for the Crowe development project of warehouse distribution centers as well as the expansion of the nearby San Antonio Winery project. When the warehouse distribution centers are up and running, there will be additional big diesel truck traffic which will also bring air and noise pollution. The 60 fwy near our homes is widening on and off ramps for Haven Ave. and Milliken Aves., which I'm guessing is to accommodate extra truck traffic. The following nearby main streets (Archibald Ave., Riverside Drive, Haven Ave.and Milliken Ave.) will all be negatively impacted. Residents will be adversely affected, too, especially during school drop offs and school pickups of young and older kids who go to Creek View Elementary, Grace Yokley Middle School and Colony High School. In our area, we ALREADY are seeing greater traffic flows on Haven, as Eastvale residents are using Haven Ave. to get to the 60 and 10 freeways. And, more home are being built near Riverside Drive and Haven Ave.

2592 OAK SPRINGS PLACE ONTARIO, CALIF. (1761

Is the Regional Sports Complex for the exclusive use of Ontario residents, or is the plan for youth of neighboring cities as well? The amount of additional use of the many soccer and baseball/softball fields will draw extra traffic, obviously, but the minor league baseball team will most certainly draw extra traffic to our area on game days. The stadium has a 6,000 seat capacity. I would hope that the multi-level parking structure that is being built will accommodate thousands of cars. Fans sometimes park in nearby businesses, like our nearby Ralph's shopping center, or our nearby Rite Aid or Walgreens shopping centers. I hope your planning includes prevention of traffic issues. If the minor league team is an affiliate of the Los Angeles Dodgers, there will be great interest and attendance from many cities that have Dodgers fans. And if an occasional Dodger player comes to play in Ontario on a rehab assignment, the game(s) will be a sellout. Imagine Clayton Kershaw coming to town to play.

The extra traffic (cars, trucks, and pedestrians) is my first concern.

My other concern is the funding of the Ontario Regional Sports Complex. Will the recently approved Proposition Q, the additional 1% local tax increase to Ontario residents, fund all or part of the project? Will Ontario issue new municipal bonds? Historically, as evidenced in a 2018 Atlantic Monthly article, and most recently in a September 2023 Forbes Magazine business article, cities end up funding these types of projects with bonds that cost the cities lots of money for years. Proposition Q was campaigned for the necessary services of the city, for improvement in services to the residents. It was not presented by its proponents to pay for a new sports complex.

Those are my two concerns, respectfully submitted. It was a pleasure meeting you at the Scoping gathering, as well as talking to you and Dan Bell, the city's communications director.

Sincerely yours,

Thomas L. Muñoz

Re: Ontario Regional Sports Complex

Dear Thomas Grahn:

The Pala Band of Mission Indians Tribal Historic Preservation Office has received your notification of the project referenced above. This letter constitutes our response on behalf of Robert Smith, Tribal Chairman.

We have consulted our maps and determined that the project as described is not within the boundaries of the recognized Pala Indian Reservation. The project is also beyond the boundaries of the territory that the tribe considers its Traditional Use Area (TUA). Therefore, we have no objection to the continuation of project activities as currently planned and we defer to the wishes of Tribes in closer proximity to the project area.

We appreciate involvement with your initiative and look forward to working with you on future efforts. Pala is now offering tribal monitoring services. If you have questions or need additional information, please do not hesitate to contact Alexis Wallick by telephone at 760-891-3537 or by e-mail at THPO@palatribe.com.

Sincerely,

Shasta C. Gaughen, PhD
Tribal Historic Preservation Officer
Pala Band of Mission Indians

ATTENTION: THE PALA TRIBAL HISTORIC PRESERVATION OFFICE IS RESPONSIBLE FOR ALL REQUESTS FOR CONSULTATION. PLEASE ADDRESS CORRESPONDENCE TO **SHASTA C. GAUGHEN** AT THE ABOVE ADDRESS. IT IS NOT NECESSARY TO ALSO SEND NOTICES TO PALA TRIBAL CHAIRMAN ROBERT SMITH.

South Coast

October 14, 2023

Notice of Preparation of a Subsequent Environmental Impact Report for the Ontario Regional Sports Complex Subsequent Environmental Impact Report (Proposed Project)

South Coast Air Quality Management District (South Coast AQMD) staff appreciates the opportunity to comment on the above-mentioned document. Our comments are recommendations on the analysis of potential air quality impacts from the Proposed Project that should be included in the Subsequent Environmental Impact Report (EIR). Please send a copy of the Subsequent EIR upon its completion and public release directly to South Coast AQMD as copies of the Subsequent EIR submitted to the State Clearinghouse are not forwarded. **In addition, please send all appendices and technical documents related to the air quality, health risk, and greenhouse gas analyses (electronic versions of all emission calculation spreadsheets, air quality modeling, and health risk assessment input and output files, not PDF files). Any delays in providing all supporting documentation for our review will require additional review time beyond the end of the comment period.**

CEQA Air Quality Analysis

Staff recommends that the Lead Agency use South Coast AQMD's CEQA Air Quality Handbook and website[1] as guidance when preparing the air quality and greenhouse gas analyses. It is also recommended that the Lead Agency use the CalEEMod[2] land use emissions software, which can estimate pollutant emissions from typical land use development and is the only software model maintained by the California Air Pollution Control Officers Association.

South Coast AQMD has developed both regional and localized significance thresholds. South Coast AQMD staff recommends that the Lead Agency quantify criteria pollutant emissions and compare the emissions to South Coast AQMD's CEQA regional pollutant emissions significance thresholds[3] and localized significance thresholds (LSTs)[4] to determine the Proposed Project's air quality impacts. The localized analysis can be conducted by either using the LST screening tables or performing dispersion modeling.

The Lead Agency should identify any potential adverse air quality impacts that could occur from all phases of the Proposed Project and all air pollutant sources related to the Proposed Project. Air quality impacts from both construction (including demolition, if any) and operations should be calculated.

[1] South Coast AQMD's CEQA Handbook and other resources for preparing air quality analyses can be found at: http://www.aqmd.gov/home/rules-compliance/ceqa/air-quality-analysis-handbook.
[2] CalEEMod is available free of charge at: www.caleemod.com.
[3] South Coast AQMD's CEQA regional pollutant emissions significance thresholds can be found at: http://www.aqmd.gov/docs/default-source/ceqa/handbook/scaqmd-air-quality-significance-thresholds.pdf.
[4] South Coast AQMD's guidance for performing a localized air quality analysis can be found at: http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/localized-significance-thresholds.

Construction-related air quality impacts typically include, but are not limited to, emissions from the use of heavy-duty equipment from grading, earth-loading/unloading, paving, architectural coatings, off-road mobile sources (e.g., heavy-duty construction equipment) and on-road mobile sources (e.g., construction worker vehicle trips, material transport trips, and hauling trips). Operation-related air quality impacts may include, but are not limited to, emissions from stationary sources (e.g., boilers and air pollution control devices), area sources (e.g., solvents and coatings), and vehicular trips (e.g., on- and off-road tailpipe emissions and entrained dust). Air quality impacts from indirect sources, such as sources that generate or attract vehicular trips, should be included in the analysis. Furthermore, emissions from the overlapping construction and operational activities should be combined and compared to South Coast AQMD's regional air quality CEQA ***operational*** thresholds to determine the level of significance.

In the event that implementation of the Proposed Project requires a permit from South Coast AQMD, South Coast AQMD should be identified as a Responsible Agency for the Proposed Project in the Subsequent EIR. The assumptions in the air quality analysis in the Subsequent EIR will be the basis for evaluating the permit under CEQA and imposing permit conditions and limits. Questions on permits should be directed to South Coast AQMD's Engineering and Permitting staff at (909) 396-3385.

The California Air Resources Board's (CARB) *Air Quality and Land Use Handbook: A Community Health Perspective*[5] is a general reference guide for evaluating and reducing air pollution impacts associated with new projects that go through the land use decision-making process with additional guidance on strategies to reduce air pollution exposure near high-volume roadways available in CARB's technical advisory[6].

The South Coast AQMD's *Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning*[7] includes suggested policies that local governments can use in their General Plans or through local planning to prevent or reduce potential air pollution impacts and protect public health. It is recommended that the Lead Agency review this Guidance Document as a tool when making local planning and land use decisions.

Mitigation Measures

In the event that the Proposed Project results in significant adverse air quality impacts, CEQA requires that all feasible mitigation measures that go beyond what is required by law be utilized to minimize these impacts. Any impacts resulting from mitigation measures must also be analyzed. Several resources to assist the Lead Agency with identifying potential mitigation measures for the Proposed Project include South Coast AQMD's CEQA Air Quality Handbook,[8] South Coast AQMD's Mitigation Monitoring and Reporting Plan for the 2022 Air Quality Management Plan,[9] and Southern California Association of Government's Mitigation Monitoring and Reporting Plan for the 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy.[10].

Mitigation measures for operational air quality impacts from other area sources that the Lead Agency should consider in the Subsequent EIR may include the following:

[5] CARB's *Air Quality and Land Use Handbook: A Community Health Perspective* can be found at: http://www.arb.ca.gov/ch/handbook.pdf.
[6] CARB's technical advisory can be found at: https://www.arb.ca.gov/ch/landuse.htm.
[7] South Coast AQMD. 2005. *Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning*. Available at: http://www.aqmd.gov/docs/default-source/planning/air-quality-guidance/complete-guidance-document.pdf.
[8] https://www.aqmd.gov/home/rules-compliance/ceqa/air-quality-analysis-handbook
[9] South Coast AQMD's 2022 Air Quality Management Plan can be found at: http://www.aqmd.gov/home/air-quality/clean-air-plans/air-quality-mgt-plan (Chapter 4 - Control Strategy and Implementation).
[10] Southern California Association of Governments' 2020-2045 RTP/SCS can be found at: https://www.connectsocal.org/Documents/PEIR/certified/Exhibit-A_ConnectSoCal_PEIR.pdf.

- Maximize use of solar energy by installing solar energy arrays.
- Use light colored paving and roofing materials.
- Utilize only Energy Star heating, cooling, and lighting devices, and appliances.
- Use of water-based or low VOC cleaning products that go beyond the requirements of South Coast AQMD Rule 1113.

Design considerations for the Proposed Project that the Lead Agency should consider to further reduce air quality and health risk impacts include the following:

- Clearly mark truck routes with trailblazer signs, so that trucks will not travel next to or near sensitive land uses (e.g., residences, schools, day care centers, etc.).
- Design the Proposed Project such that truck entrances and exits are not facing sensitive receptors and trucks will not travel past sensitive land uses to enter or leave the Proposed Project site.
- Design the Proposed Project such that any check-in point for trucks is inside the Proposed Project site to ensure that there are no trucks queuing outside.
- Design the Proposed Project to ensure that truck traffic inside the Proposed Project site is as far away as feasible from sensitive receptors.
- Restrict overnight truck parking in sensitive land uses by providing overnight truck parking inside the Proposed Project site.

South Coast AQMD staff is available to work with the Lead Agency to ensure that air quality, greenhouse gas, and health risk impacts from the Proposed Project are accurately evaluated and mitigated where feasible. If you have any questions regarding this letter, please contact me at swang1@aqmd.gov.

Sincerely,

Sam Wang

RE: NOP Comments for Ontario Regional Sports Complex Project

Dear Mr. Grahn,

Thank you for providing Californians Allied for a Responsible Economy ("CARE CA") with the opportunity to comment on the Notice of Preparation ("NOP") for the environmental review of the Ontario Regional Sports Complex Project ("Project"). The Project proposes 540,750 square feet of commercial building space, 450,000 square feet of stadium space, and 272,000 square feet of parking structures.

CARE CA respectfully requests, under CEQA, complete analysis of all impacts, imposition of all feasible mitigation and study of a reasonable range of alternatives to the Project. In addition, we request that the City take into consideration the following comments:

i) Project Description: We encourage the City to ensure that the Project's objectives are not so narrow as to preclude any alternative other than the Project. Such a narrow approach for describing the Project's objectives prevents informed decision making and public participation.

ii) Air Quality & Public Health: CARE CA has a particular interest in air quality and public health. Estimates of the significance of air quality impacts must be consistent with current epidemiological studies regarding the effects of pollution and various kinds of environmental stress on public health. We must not ignore the unjust consequences of toxic pollution on communities. Therefore, the DSEIR should include a Health Risk Assessment.

iii) Greenhouse Gas Emissions: In the DSEIR analysis, the City has the discretion to quantify GHG emissions resulting from a project and/or rely on a qualitative analysis or performance-based standards "based to the extent possible on scientific and factual data" Guidelines §,15064, subd. (b). To determine the significance of the Project's GHG, we urge the City to adopt thresholds that embody climate change's existential threat to humankind and provide detailed

discussion on the Applicant's plan to offset the Project's GHG emissions. For instance, a plan that uses parking as an opportunity to address potential air quality, GHG and traffic impacts should be considered.

iv) Mitigation measures must be effective and enforceable. Every effort must be made to incorporate modern technology in the mitigation measures and MMRP. For example, a requirement that all off-road equipment and trucks using the site during construction be zero emission would reduce air pollution impacts and CO2 emissions.

Thank you for the opportunity to submit NOP comments. CARE CA respectfully urges the City to take this opportunity to protect the environment and the community to the maximum extent feasible. We look forward to reviewing and commenting on subsequent environmental review documents when these documents are released for public review.

Sincerely,

Jeff Modrzejewski

Re: Notice of Preparation (NOP) and Scoping Meeting for Ontario Regional Sports Complex Subsequent Environmental Impact Report (SEIR)

Dear Thomas:

This letter is in response to the Notice of Preparation (NOP) and Scoping Meeting for Ontario Regional Sports Complex Subsequent Environmental Impact Report (SEIR), made available on September 15, 2023. The City's comments are outlined below:

Traffic / Transportation

1) The project's Traffic Impact Analysis should include the LOS analysis of any intersections and roadway segments expected to have 50 or more peak hour trips added by the project. The peak hour should not only include the typical morning and afternoon peak periods but an analysis of anticipated event arrival and dismissal peak periods for major events including weekends. A worse-case scenario should be included in the analysis. Impacts to adjacent facilities should be identified and mitigation measures recommended and conditioned upon the project.

2) As the project is expected to attract regional use, impacts to regional facilities such as freeways, major arterials and public transportation systems should be included to determine anticipated needs for services and impacts to the transportation system to ensure regional movement of traffic is not significantly impacted.

Public Works

3) The Regional Sports complex seems to be tributary to the Lower Cucamonga Spreading Grounds and Cucamonga Creek. Cucamonga Creek does convey to Mill Creek. Please describe the changes, if applicable, to any of the constructed wetlands in the Mill Creek wetlands.

13220 Central Avenue, Chino, California 91710
Mailing Address: P.O. Box 667, Chino, California 91708-0667
(909) 334-3250 (909) 334-3720 Fax
Web Site: www.cityofchino.org

4) Please specify any deviations from the Regional Board letter dated 11/14/2016 to the design capture volume of the regional natural treatment system wetlands BMP to which this was a part of the development known as New Model Colony, to which captured and treated areas by the Mill Creek Wetlands were roughly allocated by land use type.

Noise

5) The EIR should include an analysis on what mitigation measures would be put in place to mitigate noise impacts from the proposed baseball stadium or other parts of the complex that could be used for other events such as concerts, festivals, monster truck events, etc.

If you have any questions, please contact me by email at mhitz@cityofchino.org, or you can call me at 909-334-3448.

Sincerely,

Michael Hitz
Principal Planner

RE: NOTICE OF PREPERATION (NOP) AND SCOPING MEETING FOR THE ONTARIO REGIONAL SPORTS COMPLEX SUBSEQUENT ENVIRONMENTAL IMPACT REPORT (SEIR)

Dear Mr. Grahn:

Thank you for the opportunity to comment on the Notice of Preparation (NOP) and Scoping Meeting for the Ontario Regional Sport Complex Subsequent Environmental Impact Report (SEIR). Eastvale values its relationship with neighboring jurisdictions and is not opposed to development of this site; however, this project has the potential to generate traffic impacts in Ontario and Eastvale. The City of Eastvale offers the following comments for your consideration:

- **Area to be Studied –** According to the Riverside County Transportation Department's Traffic Impact Analysis (TIA) Guidelines, *the minimum area to be studied shall include any intersection of "Collector" or higher classification street, with "Collector" or higher classification streets, at which the proposed project will add 50 or more peak hour trips, not exceeding a 5-mile radius from the project site. The Transportation Department may require deviation from these requirements based on area conditions*.

  Please view the attached exhibit illustrating the intersections that the City of Eastvale requests be included as part of the study area within the TIA. In addition, contribution of fair share costs for any mitigations needed for the applicable intersections (as provided in the attached exhibit), shall also be considered.

- **Draft EIR** - The City of Eastvale will be awaiting to review the Draft EIR for the Ontario Regional Sports Complex.

Eastvale staff would like to request a meeting to discuss these comments and potential solutions that address concerns for both cities. Please contact me at (951) 703-4499 or ggonzalez@eastvaleca.gov to set a date and time to meet.

We look forward to working cooperatively with the City of Ontario on regional issues that affect our respective communities.

Sincerely,

Gustavo N. Gonzalez, AICP
Community Development Director

Re: Comments on Notice of Preparation for the Ontario Regional Sports Complex Subsequent EIR

Dear Mr. Grahn;

I am writing to provide comments on the Notice of Preparation (NOP) for the proposed Ontario Regional Sports Complex Subsequent EIR. The City of Rancho Cucamonga appreciates the opportunity to participate in the scoping process for this significant project, which seeks to develop a new minor league baseball stadium and sports complex in the Ontario Ranch.

1. **Project Description:** We acknowledge the project's potential to contribute positively to the *local and* regional community, providing entertainment and economic benefits. However, the NOP's project description lacks sufficient detail to comprehensively evaluate potential environmental impacts. We request that the NOP be revised to provide a more comprehensive and precise project description, specifically which "parcels in the Vineyard Corridor, south of the project site," where the land uses would be changed to comply with the requirements of SB330 and SB166. A map, parcel numbers, and current zoning information would be much appreciated, as the parcels to the south of the project site are identified as agricultural on the map provided. Furthermore, the current NOP states that the current zoning for the current Specific Plan allows for the development of 891 residential units with an affordable housing overlay. In addition, the specific plan includes the development of an additional 58 units in P.A. 7 if the school site is not developed, increasing the number of units from 891 to 949, not including any applicable affordable housing overlay. We ask that the project description be clarified to show the total number of units possible for the project, including the affordable housing overlay, to show an accurate representation of the number of housing units potentially lost with this project. As noted above, the current Specific Plan identifies P.A. 7 as the site of a future elementary school. Please include information on where that future school site would be relocated, or if not relocated then what other alternative is under consideration and the implications of that change. To the extent that the City's existing soccer fields (the Ontario Soccer Park) north of Whispering Lakes Golf Course will be relocated to this project site and the use of that facility changed, the NOP project description should include the reuse of that site. Additionally, several City of Ontario officials have made statements expressing the City's desire to create a new home for the Rancho Baseball, LLC., franchise, which currently plays its home games at LoanMart Field (the Epicenter) in the City of Rancho Cucamonga, with the stated intent of relocating the team from Rancho Cucamonga to this new facility in the City of Ontario. If this is indeed Ontario's intended course of action, this should be disclosed in a revised NOP as part of the project description. The environmental impacts of moving this *local and* regional draw from one city to another should be disclosed in the Subsequent EIR, including impacts to the City of Rancho Cucamonga. Alternatively, if Ontario's intent is to establish

a new team to play at the stadium, then that should likewise be disclosed in the project description. Without fully understanding the subsequent land use changes as well as the intent to relocate the Rancho Baseball, LLC., franchise, it is difficult to fully comment of the necessary considerations and analysis for the Subsequent EIR.

2. **Traffic and Transportation:** Given the anticipated increase in vehicular traffic to and from the sports complex, it is crucial to assess potential traffic congestion, parking demand, and public transportation options. The EIR should include a detailed traffic impact analysis to understand how the project may affect the surrounding freeways, roadways, and infrastructure. The EIR should address the regional aspect of the project and address the change and potential impact on VMT with a comprehensive VMT analysis. Additionally, the traffic and VMT analysis should investigate and disclose the changes in transportation activities for the full extent of the project, including the land use changes "in the Vineyard Corridor" and at the Ontario Soccer Park. In those areas where the widening of roads would occur to accommodate the increased traffic volumes, please include an environmental impact assessment of the conversion of land to roadways.

3. **Noise and Light Pollution:** The NOP lists noise and aesthetics as topics that will be addressed. To properly evaluate these impacts, we request conducting a comprehensive noise and light pollution study, including event-specific noise and light levels and measures to mitigate any adverse effects on nearby residential areas as well as agricultural areas. Bright lights and loud noise can be especially impactful to agricultural operations. We understand that the City envisions an expedited construction schedule in order to have the minor league stadium operational by April 2025. Please ensure the noise analysis appropriately reflects the increased daily construction activities that would be necessary to accommodate this construction schedule. Additionally, we request the EIR include an analysis of noise levels along all streets where widening would occur as well as where notable traffic increases would occur.

4. **Land Conversion and Onsite Environmental Resources:** The project site may have environmental resources that require protection. We urge a thorough assessment of potential impacts on local flora and fauna, wetlands, water bodies, and archaeological resources. It is essential to identify any mitigation measures that may be necessary to protect these resources. The EIR should also analyze the impacts associated with agricultural land conversion, including the associated cumulative impacts to the broader agricultural economy in the region.

5. **Alternatives Analysis:** The NOP should explore a range of project alternatives, including site locations, project designs, and mitigation measures. Comparative analysis of these alternatives will aid in making informed decisions regarding the project's environmental impacts. Additionally, several City of Ontario officials have made statements expressing the City's desire to create a new home for the Rancho Baseball, LLC., franchise, thereby relocating the team from Rancho Cucamonga to this new facility in the City of Ontario. While the City of Rancho Cucamonga is confident that Major League Baseball and Rancho Baseball, LLC. will be able to secure a second minor league franchise for the region, the EIR should analyze the potential impacts of the minor league franchise moving from Rancho Cucamonga to Ontario if a second franchise is not secured. This should include the traffic, noise, air quality, VMT, and GHG impacts associated with moving the team to Ontario, as well as the potential impacts to the Epicenter, the areas around it, and the City of Rancho Cucamonga should the Epicenter be left vacant.

6. **Climate Change:** We request that the EIR thoroughly assess the project's greenhouse gas emissions and explore measures to reduce its carbon footprint. Given the heightened concerns around global climate change, we suggest the EIR include a lifecycle analysis of GHG emissions, including construction emissions, operational emissions from both the operation and maintenance of the site and transportation and all materials used in the construction of the site. Finally, please ensure the climate change analysis includes the full scope of the project, including changing the land uses along the Vineyard Corridor and the possible change to the Ontario Soccer Park.

7. **Hazards and Hazardous Materials:** From the review of the aerial photograph, it appears that there are a series of settling basins on the site associated with historic agricultural uses. The SEIR should study the disposition of the settling basins and any associated hazardous materials implications from both the basins and the historic agricultural uses.

8. **Air quality:** We request the EIR thoroughly assess the project's criteria for pollutant emissions and impacts on air quality. We understand that the City envisions an expedited construction schedule in order to have the minor league stadium operational by April 2025. Please ensure the air quality analysis appropriately reflects the increased daily construction activities that would be necessary to accommodate this construction schedule. Please ensure the air quality analysis includes the full scope of the project description, including the changes to residential land uses and the change in use of the Ontario Soccer Park, and all the associated changes in transportation patterns.
9. **Public Services and Utilities:** Please ensure the EIR includes a comprehensive analysis of the impacts on public services and utilities associated with the entire extent of the proposed project. Given the ongoing drought facing the Southwest, we ask the EIR to take a comprehensive look at how local, regional, and recycled water supplies and infrastructure, as well as wastewater infrastructure and treatment capacity, would be impacted by this project.

In conclusion, we emphasize the importance of a comprehensive and transparent environmental review process for the proposed Ontario Regional Sports Complex. We are excited for the potential benefits for the region that such a facility might provide. We respectfully request the City of Ontario amend and reissue the NOP with a more complete project description as described above, to ensure all reviewers have an adequate understanding of the proposed project. Otherwise, it is not clear how NOP reviewers could effectively comment on the scope of the EIR or otherwise adequately participate in the environmental review process.

Please consider these comments during the development of the EIR, and feel free to contact me if you require any additional information or clarification. We appreciate the City of Ontario sharing the NOP with the City of Rancho Cucamonga and request that you continue to notify the City of Rancho Cucamonga of all future steps and opportunities to participate in the environmental review process.

Sincerely,

Matt Marquez
Director of Planning and Economic Development
City of Rancho Cucamonga

Subject: Ontario Regional sports complex

Good afternoon,
Jason Alonzo -2602 E Harper st, Ontario CA 91762 I would like to thank you for taking my comments- 1. I would like to see a sport complex that has a lot of walkability to it, and in it. Rather than having a car centric park and go. Let's include biking and other modes for the complex.
2.I see the complex is close to the Cucamonga Chanel so I hope the path will take it all the way to where I live in shadetree.
3. Reduce the parking and allow more open space.
4. Have extra wide sidewalks
5. Increase the trees to keep the area cool.

Thank you.

Subject: NOP - Ontario Regional Sports Complex Comment

Will there be any sections of the complex that can be utilized for roller hockey? For example, sport court used for tennis, indoor soccer or sometimes basketball.

Ontario has a relatively large hockey community due to the Reign & Avalanche programs, but roller is a much more accessible starting point.

Thank you,
Stephen Moye

RE: CEQA – NOTICE OF PREPARATION (NOP) AND SCOPING MEETING FOR THE ONTARIO REGIONAL SPORTS COMPLEX SUBSEQUENT ENVIRONMENTAL IMPACT REPORT (SEIR)

Dear Mr. Grahn:

Thank you for allowing the San Bernardino County Department of Public Works the opportunity to comment on the above-referenced project. **We received this request on September 19, 2023** and pursuant to our review, the following comments are provided:

Environmental Management Division (Karen Carter, Ecological Specialist, 909-387-8109):

1. The proposed Project is located adjacent to a San Bernardino County Flood Control District (SBCFCD) facility and/or right-of-way (R/W) (Cucamonga Channel and Riverside Drive Storm Drain). The applicant will need to obtain an encroachment permit if they are proposing any work within the SBCFCD's facility or R/W. If you have any questions regarding this process, please contact the San Bernardino County Flood Control District Permit Section at (909) 387-1863.

Flood Control Planning/Operations Division (Michael Fam, P.E. Chief, 909-387-8120):

1. We are aware there may be storm drains in and around the site that may be affected by the proposed Project. When planning for or altering existing or future storm drains, be advised that the Project is subject to the Ontario MPD, dated March 2012. It is to be used as a guideline for drainage in the area and is available in the City of Ontario's Offices. Any revision to the drainage should be reviewed and approved by the jurisdictional agency in which the revision occurs.

2. The proposed Project is located adjacent to and within a San Bernardino County Flood Control District (SBCFCD) right-of way/facility (1-301-1A-Cucamonga Channel, C/E), located along the eastern portion of the project. Any encroachments including, but not limited to: access for grading, grading on, construction of driveways, fence/wall removal and installation, side drain connections, and bridges on the District's right-of-way or facilities will require a fully executed permit from the SBCFCD prior to start of any construction activities. Also, SBCFCD facilities built by the Army Corps of Engineers (ACOE) will require the SBCFCD to obtain approval (408-Permit) from the ACOE. Please contact the San Bernardino County Flood Control Permit Section at (909) 387-7995 for further information regarding this process

Flood Control Planning/Water Resources Division (Michael Fam, Chief, 909-387-8120):

The proposed Project is located north of Chino Avenue, south of Riverside Drive and east of Vineyard Avenue, in the City of Ontario, in which the entire easter border abuts Cucamonga Creek Channel (COE; ultimate channel) and Riverside Drive Storm Drain along the southern border, both San Bernardino County Flood Control District (District) facilities.

The District also possesses fee-owned Right-of-Way (ROW) that abuts the northeastern corner and an easement along the entire southern border of the Project.

The Project is part of:

- Comprehensive Storm Drain Plan (CSDP) No. 1 – July 1966 by Moffat & Nichol
- Ontario Master Plan of Drainage (MPD) – June 2017 by Hunsaker & Associates Irvine, Inc.
- Ontario Colony MPD – April 2000 by L.D. King

The District's recommendations are most often made for site specific conditions. Therefore, the recommendations made here are general in nature until such time as more detailed plans become available.

We have reviewed the Project Notice (PN) and offer these comments:

1. According to the most recent FEMA Flood Insurance Rate Map (FIRM), Panel 06071C8638H, dated August 28, 2008, the Project lies within Zone X-shaded (500-yr. floodplain).

2. If any encroachment on District Right-of-Way is anticipated, a permit shall be obtained from the District. Other on-site or off-site improvements may be required, which cannot be determined at this time.

3. One of the benefits of the CSDP and MPD is to identify the alignment of future drainage and flood control facilities. It is hoped that the City of Ontario will continue to use this document to protect the alignment of these future facilities.

4. We recommend that the Project include, and the City enforce, the most recent FEMA regulations for development within a floodplain.

NPDES Division (Jonathan Dillon, P.E., Chief 909-387-8119):

1. In compliance with the Municipal separate storm sewer system (MS4) Permit, a Water Quality Management Plan (WQMP) should be prepared for the proposed Project. Impacts associated with the development and implementation of the WQMP and any proposed mitigation should be discussed within the EIR prior to adoption and certification. If you have any questions regarding this process, please contact the SBCFCD Permit Section at (909) 387-1863.

2. The proposed Project shall be in conformance with the Construction General Permit.

We respectfully request to be included on the circulation list for all project notices, public reviews, or public hearings. In closing, I would like to thank you again for allowing the San Bernardino County Department of Public Works the opportunity to comment on the above-referenced project. Should you have any questions or need additional clarification, please contact the individuals who provided the specific comment, as listed above.

Sincerely,

Nancy Sansonetti

Guaranteed Performance: The ILLUMINATION described above is guaranteed per your Musco Warranty document and includes a 0.95 dirt depreciation factor.

Field Measurements: Individual field measurements may vary from computer-calculated predictions and should be taken in accordance with IESNA RP-6-15.

Electrical System Requirements: Refer to Amperage Draw Chart and/or the **"Musco Control System Summary"** for electrical sizing.

Installation Requirements: Results assume ± 3% nominal voltage at line side of the driver and structures located within 3 feet (1m) of design locations.

Applied Circuits	A,B,C,D,E,F,G,H,I,J,K,L,M,N,O
Average LLF	0.988
No. of Luminaires	**1135**
Total Load	1210.99 kW

Guaranteed Performance: The ILLUMINATION described above is guaranteed per your Musco Warranty document and includes a 0.95 dirt depreciation factor.

Field Measurements: Individual field measurements may vary from computer-calculated predictions and should be taken in accordance with IESNA RP-6-15.

Electrical System Requirements: Refer to Amperage Draw Chart and/or the **"Musco Control System Summary"** for electrical sizing.

Installation Requirements: Results assume ± 3% nominal voltage at line side of the driver and structures located within 3 feet (1m) of design locations.

On-Site Roadways						
Ontario Avenue	158,400	158,400	3.64	-	31,680	-
Street A	129,000	129,000	2.96	-	30,100	-
Street B	48,000	48,000	1.10	-	11,200	-
Off-Site Improvements						
Chino Avenue	142,877	142,877	3	-	45,500	-
Riverside Drive	142,877	142,877	3	-	22,750	-
Vineyard Avenue	1,055,894	1,055,894	24	-	147,840	-

Notes:

1. Building square feet for parking lots and structures that are unknown at this time, CalEEMod defaults were utilized based on parking stalls provided
2. Known landscaping for the multipurpose fields, multiuse fields, and park represent areas that are assumed to consist of natural grass turf
3. Known special landscaping for the multipurpose fields, multiuse fields, and park represent areas that are assumed to consist of synthetic turf

Land Uses Used in CalEEMod Models

Proposed Project Component (In Schedule Sequence)	CalEEMod Land Use Subtype	Unit Amount	Size Metric	Lot Acreage	Land Use Square Feet	Landscaping Square Feet[1]

Notes:

1. Landscaping square footage for development components where the anticipated landscaped area is unknown assumes the balance of that area is landscaped after accounting for building footprints (i.e., [acreage x 43,560 sf] - building footprint sf).

Material Hauling

Debris Component	Amount to be Hauled (Cubic Yards)	Amount to be Hauled (Tons)	Haul Distance (miles)[2]	Total Trip Ends	Duration (days)	Trip Ends Per Day
Model: Phase 1 (PAs 1-3) Mass Grading and Demolition						
Building Demolition Debris	-	4,000	50	400	20	20

Manure Removal	28,000	-	50	2,800	14	200
Model: Phase 3 (PA 6) Mass Grading and Demolition						
Building Demolition Debris	-	-	50	-	-	-
Manure Removal	-	-	50	-	-	-
Model: Phase 4 (PA 7) Mass Grading and Demolition						
Building Demolition Debris	-	1,600	50	160	8	20
Manure Removal	-	-	50	-	-	-

Notes

[1] CalEEMod default of 20-ton haul truck capacity used. Applicant provided 20-CY haul truck capacity for Manure Removal.

[2] Haul distanced provided by applicant.

[3] Asphalt debris will be crushed and recycled on-site.

[4] Cut/fill will balance on-site.

Construction Hours

Duration of Work Week:	Monday - Saturday
Hours per Workday:	8 hours

(7:00 AM to 5:00 PM w/ 1 hr break)

Architectural Coating

	Default Percent Painted
Interior Painted:	100%
Exterior Painted:	100%

South Coast AQMD Rule 1113

Interior Residential Paint VOC content:	50	grams per liter
Exterior Residential Paint VOC content:	50	grams per liter

CalEEMod Construction Off-Road Equipment Inputs: Mass Grading and Demolition Activities

Water Truck Vendor Trip Calculation

Amount of Water	Water Truck
10,000	2,000

Notes:

[1] Based on data provided in Guidance for Application for Dust Control Permit

Maricopa County Air Quality Department. 2005, June. Guidance for Application of Dust Control Permit. https://www.epa.gov/sites/default/files/2019-04/documents/mr_guidanceforapplicationfordustcontrolpermit.pdf

[2] Based on standard water truck capacity:

McLellan Industries. 2023, November (access). Water Trucks. https://www.mclellanindustries.com/trucks/water-trucks/

[3] Assumes that dozers, tractors/loaders/backhoes, and graders can disturb 0.50 acres per day and scrapers can disturb 1 acre per day.

10,000	2,000

Notes:

[1] Based on data provided in Guidance for Application for Dust Control Permit

Maricopa County Air Quality Department. 2005, June. Guidance for Application of Dust Control Permit. https://www.epa.gov/sites/default/files/2019-04/documents/mr_guidanceforapplicationfordustcontrolpermit.pdf

[2] Based on standard water truck capacity:

McLellan Industries. 2023, November (access). Water Trucks. https://www.mclellanindustries.com/trucks/water-trucks/

[3] Assumes that dozers, tractors/loaders/backhoes, and graders can disturb 0.50 acres per day and scrapers can disturb 1 acre per day.

Building Construction Equipment Details						
Applicant-Provided Equipment[1]	**CalEEMod Equipment**	**# of Equipment**	**Hours/Day**	**Horsepower**	**Engine Tier**	**Total Trips/Day**
Demolition-Clear & Grub						
Cat 966G Loader	Tractors/Loaders/Backhoes	3	8	260	3	
Ford F750 2000 Gallon Water Truck V8	Water Trucks	2	-	270	-	
Foreman's Pick-up F150	Foreman Pick-up: MDV	1	8	375	-	
Cat 336EL Excavator	Excavators	1	8	300	4	
Worker Trips						16
Vendor Trips (Water Truck Trips)						20
Hauling Trips						0
Water Trucks (On-site Activity)			Acres Disturbed:	2.00		2
			On-site Travel (mi/day):	0.83		
Rough Grading						
Cat 637 Motor Scraper	Scrapers	4	8	450	4	
Cat D-6T Dozer	Crawler Tractors	2	8	310	4	
Cat 834K Rubber Tire Dozer	Rubber Tired Dozers	1	8	196	4	
Cat 14M3 Blade (Motor Grader)	Graders	2	8	238	4	
Ford F750 2000 Gallon Water Truck	Water Trucks	3	-	270	-	
Foreman's Pick-up F150	Foreman Pick-up: MDV	1	8	375	-	
Worker Trips						20
Vendor Trips (Water Truck Trips)						20
Hauling Trips						0
Water Trucks (On-site Activity)			Acres Disturbed:	2.00		3
			On-site Travel (mi/day):	0.55		
Fine Grading						
Cat 14M3 Blade (Motor Grader)	Graders	2	8	238	4	
Ford F750 2000 Gallon Water Truck	Water Trucks	2	-	270	-	
Cat 623K Motor Scraper	Off-Highway Tractors	2	8	240	4	
Worker Trips						20
Vendor Trips (Water Truck Trips)						10
Hauling Trips						0
Water Trucks (On-site Activity)			Acres Disturbed:	1.00		2
			On-site Travel (mi/day):	0.41		
Utilities Trenching						
Cat 336EL Excavator	Excavators	3	8	300	4	
Cat 950K Loader	Rubber Tired Loaders	3	8	230	4	
Cat 450F Backhoe	Trenchers	2	8	144	4	
Cat 414EL Skip Loader	Other Material Handling Equipment	2	8	93	3	
Ford F750 2000 Gallon Water Truck	Water Trucks	2	-	270	-	
Ford F350 Crew Truck	Crew Truck: LHDT2	2	8	385	-	
Foreman's Pick-up F150	Foreman Pick-up: MDV	2	8	375	-	
Worker Trips						50
Vendor Trips (Delivery and Water Truck Trips)						18
Hauling Trips						0
Water Trucks (On-site Activity)			Acres Disturbed:	1.50		2
			On-site Travel (mi/day):	0.62		
Roadway Paving Construction						
Cat 14M3 Blade (Motor Grader)	Graders	2	8	238	4	
Cat AP655F Paving Machine	Pavers	1	8	173	4	
Cat CB44B Vibratory Roller	Rollers	2	8	110	3	
Ford F750 2000 Gallon Water Truck	Water Trucks	1	-	270	Avg	
Cat 623K Motor Scraper	Off-Highway Tractors	1	8	240	4	
Foreman's Pick-up F150	Foreman Pick-up: MDV	1	8	375	Avg	
Worker Trips						30
Vendor Trips (Delivery and Water Truck Trips)						22
Hauling Trips						0
Water Trucks (On-site Activity)			Acres Disturbed:	2.00		1
			On-site Travel (mi/day):	1.65		
Finishing/Landscaping						
Cat 450F Backhoe	Trenchers	2	8	144	4	
Cat 950K Loader	Rubber Tired Loaders	1	8	230	4	
Ford F750 2000 Gallon Water Truck	Water Trucks	1	-	270	-	
Ford F350 Crew Truck	Crew Truck: LHDT2	2	8	385	-	
Foreman's Pick-up F150	Foreman Pick-up: MDV	1	8	375	-	
Cat 414EL Skip Loader	Other Material Handling Equipment	2	8	93	3	
Worker Trips						40
Vendor Trips (Delivery and Water Truck Trips)						28
Hauling Trips						0
Water Trucks (On-site Activity)			Acres Disturbed:	2.5		1
			On-site Travel (mi/day):	2.06		

Groundwork Activities and Schedule Assumptions

(Based on schedule provided by the Applicant/City)

Activities		Schedule		
Construction Activities	**Activity Type**	**Start Date**	**End Date**	**CalEEMod Duration (Workdays)**
Phase 1 Mass Grading and Demolition				
Asphalt Demolition & Reprocessing	Demolition	9/3/2024	10/1/2024	25 days
Building Demolition	Demolition	9/3/2024	9/25/2024	20 days
Manure Removal	Site Preparation	9/26/2024	10/30/2024	30 days
Rough Grading	Grading	10/31/2024	11/22/2024	20 days
Fine Grading	Grading	11/18/2024	12/16/2024	25 days
Phase 2 (PA 4) Mass Grading and Demolition				
Building Demolition	Demolition	9/26/2024	10/1/2024	5 days
Manure Removal	Site Preparation	10/31/2024	11/15/2024	14 days
Rough Grading	Grading	11/26/2024	11/30/2024	5 days
Fine Grading	Grading	12/2/2024	12/6/2024	5 days
Phase 2 (PA 5) Mass Grading and Demolition				
Building Demolition	Demolition	11/16/2024	11/21/2024	5 days
Manure Removal	Site Preparation	11/16/2024	12/2/2024	14 days
Rough Grading	Grading	12/23/2024	2/12/2025	45 days
Fine Grading	Grading	2/15/2025	4/25/2025	60 days
Phase 3 Mass Grading and Demolition				
Rough Grading	Grading	12/2/2024	12/12/2024	10 days
Fine Grading	Grading	12/13/2024	12/30/2024	15 days
Phase 4 Mass Grading and Demolition				
Building Demolition	Demolition	10/2/2024	10/10/2024	8 days
Rough Grading	Grading	12/13/2024	12/21/2024	8 days
Fine Grading	Grading	1/2/2025	1/13/2025	10 days

Off-Site Activities and Schedule Assumptions

(Based on schedule provided by the Applicant/City)

Activities		Schedule		
Construction Activities	**Activity Type**	**Start Date**	**End Date**	**CalEEMod Duration (Workdays)**
Vineyard Avenue (10,560 Linear Feet)				
Demolition-Clear & Grub	Demolition	9/4/2024	9/26/2024	20 days
Rough Grading	Grading	9/27/2024	10/8/2024	10 days
Fine Grading	Grading	10/9/2024	10/23/2024	13 days
Utility Trenching (SWR)	Trenching	10/12/2024	6/2/2025	200 days
Utility Trenching (SD, WTR, Dry's)	Trenching	4/11/2025	6/7/2025	50 days
Roadway Paving	Paving	10/1/2025	1/24/2026	100 days
Landscaping	Other	9/2/2025	11/15/2025	65 days
East Riverside Drive (3,250 Linear Feet)				
Demolition-Clear & Grub	Demolition	9/4/2024	9/9/2024	5 days
Rough Grading	Grading	9/10/2024	9/14/2024	5 days
Fine Grading	Grading	9/16/2024	9/24/2024	8 days
Utility Trenching (SWR, SD, WTR, Dry's)	Trenching	9/25/2024	12/26/2024	80 days
Roadway Paving	Paving	12/31/2024	1/22/2025	20 days
Landscaping	Other	1/24/2025	2/15/2025	20 days
Chino Avenue (3,250 Linear Feet)				
Demolition-Clear & Grub	Demolition	4/14/2025	4/24/2025	10 days
Rough Grading	Grading	4/25/2025	5/8/2025	12 days
Fine Grading	Grading	5/9/2025	5/26/2025	15 days
Utility Trenching (SWR, SD, WTR, Dry's)	Trenching	5/28/2025	8/28/2025	80 days
Roadway Paving	Paving	8/30/2025	10/3/2025	30 days
Landscaping	Other	10/6/2025	10/16/2025	10 days

On-Site Roadway Activities and Schedule Assumptions

(Based on schedule provided by the Applicant/City)

Activities		Schedule		
Construction Activities	**Activity Type**	**Start Date**	**End Date**	**CalEEMod Duration (Workdays)**
Ontario Avenue (2,640 Linear Feet)				
Fine Grading	Grading	5/9/2025	5/26/2025	15 days
Utility Trenching (SWR, SD, WTR, Dry's)	Trenching	5/28/2025	8/28/2025	80 days
Roadway Paving	Paving	8/30/2025	10/3/2025	30 days
Landscaping	Other	10/6/2025	10/16/2025	10 days
Street A Construction (East Riverside Dr. to Ontario Ave, 2,150LF)				
Fine Grading	Grading	1/25/2025	1/30/2025	5 days
Utility Trenching (SWR, SD, WTR, Dry's)	Trenching	1/31/2025	3/20/2025	42 days
Roadway Paving	Paving	3/22/2025	4/11/2025	18 days
Landscaping	Other	4/12/2025	5/10/2025	25 days
Street B Construction (Street A to Ontario Ave, 800LF)				
Fine Grading	Grading	3/22/2025	3/25/2025	3 days
Utility Trenching (SWR, SD, WTR, Dry's)	Trenching	3/26/2025	4/12/2025	16 days
Roadway Paving	Paving	4/14/2025	4/21/2025	7 days
Landscaping	Other	4/22/2025	5/2/2025	10 days

Phase 1B Construction Activities and Schedule Assumptions

(Based on schedule provided by the Applicant/City)

Activities		Schedule		
Construction Activities	**Activity Type**	**Start Date**	**End Date**	**CalEEMod Duration (Workdays)**
PA 1 Baseball Stadium				
Utility Construction	Trenching	1/1/2025	2/21/2025	45 days
Foundation, FTGs, & Substructure	Building Construction	1/25/2025	4/11/2025	66 days
Superstructure-Columns, Elevated Decks	Building Construction	3/19/2025	6/3/2025	66 days
Superstructure-Structural Steel , Rough Metal, Stud Framing, Sheating, etc.	Building Construction	5/9/2025	9/13/2025	110 days
Exterior Envelope	Building Construction	6/5/2025	10/10/2025	110 days
Canopies w/Lighting (incl. Outfield Lighting) Finishes	Building Construction	8/22/2025	11/6/2025	66 days
Interior Finishes and Buildout (MEP, FP)	Building Construction	10/14/2025	1/23/2026	88 days
Architectural Coating	Architectural Coating	12/6/2025	2/20/2026	66 days
Finishing/Landscape	Other	12/6/2025	2/20/2026	66 days
PA 1 Parking Structure A				
Utility Construction	Trenching	12/19/2024	1/13/2025	22 days

CalEEMod Inputs-Ontario Sports Complex Project, Operation

Name:	Ontario Sports Complex Project, Construction
Project Number:	ONT-06
Project Location:	Ontario, CA
County/Air Basin:	San Bernardino County
Climate Zone:	10
Land Use Setting:	Urban
First Year of Operation:	2027
Electricity Company:	Southern California Edison (SCE)
Air Basin:	South Coast Air Basin (SCAB)
Air District:	South Coast Air Quality Management District (South Coast AQMD)
SRA:	33 - Southwest San Bernardino Valley

Notes:
1. Building square feet for parking lots and structures that are unknown at this time, CalEEMod defaults were utilized based on parking stalls provided.
2. Known landscaping for the multipurpose fields, multiuse fields, and park represent areas that are assumed to consist of natural grass turf.
3. Known special landscaping for the multipurpose fields, multiuse fields, and park represent areas that are assumed to consist of synthetic turf.

TOTALS	**18,182,838**	**60,565,010**

Notes:

1. Land uses with no indoor water consumption are generally considered as part of the predominant development component they are associated with. For example, the indoor water consumption estimates for PA 7 Community Center / Admin Building generally covers the PA 7 Activity Center water consumption as well. Land uses with no outdoor water consumption are generally considered as part of the Fields and Park land use outdoor water consumption. Assumes 100% aerobic treatment for the City's Wastewater Treatment Facility.

Notes:

[1] While the average daily mobile source emissions are based on an annual VMT of 60,037,257, the annual VMT estimates provided by Fehr & Peers were updated after the completion of emissions modeling to add potential off-season game vehicle travel, which resulted in an updated annual VMT of 60,160,113. This update results in an increase in annual VMT generation by 122,856, or approximately 0.2%. Therefore, to account for the associated increase in vehicle emissions, mobile source emissions were multiplied by 1.002 in this table.

Annual Construction GHG Emissions Overview

Construction Year	Metric Tonnes of CO2e
2024	2,676
2025	6,661
2026	722
2027	629
Total	**10,687**
Construction GHG Emissions Amortized over 30 Years[2]	**356**

Notes

1 CalEEMod, Version 2022.1

2 Total construction emissions are amortized over 30 years per SCAQMD methodology; SCAQMD. 2009, November 19. Greenhouse Gases (GHG) CEQA Significance Thresholds Working Group Meeting 14. http://www.aqmd.gov/docs/default-source/ceqa/handbook/greenhouse-gases-(ghg)-ceqa-significance-thresholds/year-2008-2009/ghg-meeting-14/ghg-meeting-14-main-presentation.pdf?sfvrsn=2.

GHG Emissions Inventory - Operations

Unmitigated Proposed Project Operation 2027

Operational Emissions Source	Annual GHG Emissions (Metric Tonnes/Year)					
	BCO2	NBCO2	CH4	N2O	Refrigerants	CO2e
Mobile	0	17,154	1	1	25	17,369
Area	0	25	<1	<1	0	25
Energy	0	4,132	0	0	0	4,149
Water	6	99	1	0	0	120
Waste	38	0	4	0	0	94
Refrig.	0	0	0	0	20	20
Total	**43**	**21,410**	**5**	**1**	**45**	**21,777**

Notes: BCO2 = Biogenic CO2. NBCO2 = Non-biogenic CO2. Only Non-biogenic CO2 is utilized in the CEQA GHG emissions analysis.

Mitigated Proposed Project Operation 2027

[1] Includes incorporation of Mitigation Measure AQ-2, which requires the use of zero-emission landscaping equipment.

Operational Emissions Source	Annual GHG Emissions (Metric Tonnes/Year)					
	BCO2	NBCO2	CH4	N2O	Refrigerants	CO2e
Mobile	0	17,154	1	1	25	17,369
Area	0	0	0	0	0	0
Energy	0	4,137	0	0	0	4,154
Water	6	99	1	0	0	120
Waste	38	0	4	0	0	94
Refrig.	0	0	0	0	20	20
Total	**43**	**21,390**	**5**	**1**	**45**	**21,757**

Notes: BCO2 = Biogenic CO2. NBCO2 = Non-biogenic CO2. Only Non-biogenic CO2 is utilized in the CEQA GHG emissions analysis.

Global Warming Potentials (GWP)		
GHG	**AR4**	**AR5**
CO_2	1	1
CH_4	25	28
N_2O	298	265

Based on Intergovernmental Panel on Climate Change Fourth Assessment Report global warming potentials for CH4 and N2O; Intergovernmental Panel on Climate Change (IPCC).

Assumptions:

1. Each vehicle assumed to travel 0.1 mile at 15 miles per hour for every hour on-site.

2. Each vehicle assumed to start once and idle for 5 minutes per hour on-site.

Table G-11. Statewide Average Annual Offroad Equipment Emission Factors (grams per horsepower-hour)
